Time To ACT plc
("Time To ACT", "the Company" or "the Group")

Time To ACT plclaunches new interactive investor hub
to provide shareholders with a more proactive way of communication and enquiry support

Time To ACT plc (AQSE: TTA), an engineering-led group focused on technology for the energy transition supply chain, is pleased to announce the launch of its interactive investor hub. For both existing and prospective shareholders, the new investor hub brings all Time To ACT content into a single integrated platform to better inform and engage with investors and stakeholders, including:

- Regulatory announcements
- Reports
- Presentations
- Educational material
- Interviews
- Corporate research

The investor hub also provides an interactive online experience allowing Time To ACT stakeholders to comment and ask questions via a portal which will be monitored and responded to in a timely manner.

How to sign up for the Time To ACT investor hub:

1. Visithttps://investors.timetoactplc.com/
2. Follow the prompts to sign up for an investor hub account
3. Complete your account profile

Chris Heminway, Executive Chairman of Time To ACT commented:
"At Time To ACT, fostering transparent communication with our shareholders is a cornerstone of our strategy. Having listed on the Aquis Exchange on 29 May 2024, we're committed to top-tier shareholder engagement from the outset.
"Our new investor hub is a vital tool in this mission, offering current and prospective shareholders a wealth of video content, insights, and updates about our activities and vision. We invite our stakeholders to explore the hub and share their feedback as we refine and expand our communication efforts."

Engage with the Time To ACT management team directly by asking questions, watching video summaries and seeing what other shareholders have to say. Navigate to our interactive investor hub here:https://investors.timetoactplc.com/link/pegkve

About Time To ACT plc

Time To ACT plc is an engineering-led group focused on technology for the energy transition supply chain. It currently has two principal operating businesses: Diffusion Alloys and GreenSpur. As the parent company of the Group, Time To ACT provides strategic and operational support to the operating companies and capital to enable their growth.

About GreenSpur

GreenSpur is an intellectual property creator and generator designer that has developed a credible solution for renewable energy applications to the Rare Earth magnet problem.

Magnets constructed using Rare Earth Elements (REEs) are fundamental components in electrical generators and electric vehicle motors which are critical to delivering the clean energy transition. However, there are substantial supply chain constraints and risks in the sourcing of REEs that are needed for these magnets.

GreenSpur's generator design eliminates the need for Rare Earth magnets and copper coils without any loss in electrical performance.

About Diffusion Alloys

Diffusion Alloys supplies diffusion coatings. A diffusion coating is an intermetallic layer that protects metal components from degradation at high temperatures and in highly corrosive environments, such as those found in hydrogen and nuclear energy generation.

Diffusion Alloys has joined forces with Johnson Matthey plc, the market leaders in synthesis gas ("syngas") with a significant pipeline of Blue Hydrogen projects, to scale-up production and address the increasing demand for low carbon hydrogen used to reduce global carbon emissions.

In addition to working for numerous historic and existing customers, the Directors believe that Diffusion Alloys is the only credible diffusion coater in the world for blue hydrogen components, has already been coating in volume for a leading European vendor in the green hydrogen space and is also in pre-commercial discussions with new cleantech equipment manufacturers.
