02 July 2025

Vault Ventures PLC

("**Vault Ventures**" or the "**Company**")

Solana Purchase

Vault Ventures plc (AQSE:VULT), a London based technology developer focused on blockchain and fintech innovation, is pleased to announce that it has purchased Solana ("SOL"). This forms part of the Company's broader digital asset treasury strategy, as announced on 26 June 2025, which includes holdings in Bitcoin ("BTC") and Ethereum ("ETH").

Solana has been selected for its staking functionality and growing relevance within blockchain infrastructure, offering additional diversification and growth potential for the Company's treasury strategy whose primary purpose is to support the operations of the Company.

The following purchase of SOL was made:

- Number of SOL purchased: 881.10
- Average Purchase Price: £109.60 per SOL ($149.45)

The total assets in Treasury following the purchases above are:

- Number of ETH: 437.843 (c.75.17%)
- Number of BTC: 2.076 (c.15.68%)
- Number of SOL: 881.10 (c.9.14%)

Market-to-Net-Asset-Value Ratio (mNAV)

As at 2 July 2025, the value of Vault's treasury holdings totals approximately £1,042m comprising 2.076 BTC,881.10SOL and 437.843 ETH. The Company's market capitalisation at the time of this announcement is approximately £3.28 million, resulting in a market-to-net-asset-value (mNAV) ratio of 3.15.

mNAV is calculated by dividing the Company's market capitalisation by its net asset value, in this calculation we have used Vault's value of its digital asset treasury following the above-mentioned purchase. This ratio provides a simple measure of how a company's market capitalisation compares to the assets it holds. A lower mNAV may indicate a closer alignment between the Company's market value and its digital asset treasury.

Chair, Brian Stockbridge commented:

ÒAdding Solana to our treasury strategy is a natural progression for Vault. Solana is a high-utility network with strong developer activity, growing institutional recognition, and a staking structure that aligns well with our yield-generating approach.

Importantly, Vault continues to maintain a disciplined structure, with its current market capitalisation reflecting an M/NAV ratio of 3.15. This in our opinion compares favourably with other AQSE-listed companies with

announced digital asset treasury strategies and underscores the Board's view that Vault's valuation is well-aligned with the value of its treasury holdings.

About Vault

Vault PLC is a UK-based technology company specializing in identifying, developing and commercialising early-stage technology businesses, primarily in the blockchain and fintech sectors. Vault has adopted Ethereum and Solana as core digital assets within its treasury strategy, reflecting confidence in Ethereum's long-term utility and ecosystem strength and in Solana's attractive staking yields and growing institutional adoption. Together these offer Vault an efficient, scalable, and yield-generating alternative for treasury management.

Important Notice:

This announcement includes information relating to the Company's treasury management strategy. The Company's treasury activities involve investment in financial instruments that may fluctuate in value and are subject to market, credit and liquidity risks. These investments are undertaken for corporate purposes and are not offered to the public. This announcement does not constitute investment advice or an offer or invitation to invest. Past performance is not a reliable indicator for future results. Capital is at risk and returns are not guaranteed.

1. **Capital at risk**

Investments made as part of the treasury strategy may fluctuate in value. There is a risk that capital may be lost.

2. **No guarantee of returns**

Returns generated through treasury activities are not guaranteed and may vary depending on market and economic conditions.

3. **Liquidity risk**

Some treasury assets may be illiquid or subject to market constraints, which could affect the companyÕs ability to access funds when needed.

4. **Market and Interest Rate Exposure**

Changes in interest rates. Inflation or broader market conditions may adversely impact the value or performance of treasury investments.

5. **Credit and counterparty risks**

The Company is exposed to the risk that counterparties may default on their obligations, potentially resulting in financial loss.

6. **Regulatory and Taxation Uncertainty**

Future changes in regulation or tax treatment may affect the structure or outcomes of the treasury strategy.

7. **Not a financial promotion**

This communication is provided for information purposes only and does not constitute an offer or invitation to invest. The treasury strategy is managed for corporate purposes and is not marketed to the public.
