IntelliAM AI plc

("IntelliAM" or the "Group")

Orders from New Customer in Frozen Food Vertical

IntelliAM AI plc (AQSE: INT), a leading provider of AI-driven software solutions for the manufacturing and engineering sectors, is pleased to announce that it has secured a new contract with one of the world's largest manufacturers of frozen potato products and a major global provider of frozen food solutions.

Under the agreement, IntelliAM will provide its asset management services and software platform across four manufacturing facilities in the UK, supporting operational reliability, maintenance optimisation, and performance assurance across the UK manufacturing footprint.

The contract has an initial value of a minimum of £115,000 per annum, and represents another important step forward in IntelliAM's strategy to expand its presence within the food and manufacturing verticals, where operational uptime and asset resilience are critical.

Tom Clayton, Chief Executive Officer of IntelliAM, said:

"This is a landmark win for IntelliAM. Securing a multi-site agreement with a globally significant manufacturer reinforces the strength of our proposition, combining deep asset management expertise with modern software that delivers measurable operational impact.

"We are increasingly being selected by major producers who require reliability, compliance, and performance across complex manufacturing estates. This contract is further validation of our momentum in the food sector and supports our continued growth strategy within this vertical."

IntelliAM will provide further appropriate updates as deployment progresses.
