BML – WITH THE RIGHT METAL AND THE RIGHT PARTNER IN THE RIGHT PLACE.

INVESTOR PRESENTATION
July 2015 UPDATE

BOTSWANA METALS LIMITED PROFILE (ASX: BML)

DISCLAIMER

GENERAL DISCLAIMER

This presentation has been prepared by Botswana Metals Limited ("BML"). The information contained in this presentation is for informational purposes only and does not constitute an offer to issue, or arrange to issue, securities or other financial products. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of BML, its directors, employees or agents, not any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. No representation is made that, in relation to the tenements the subject of this presentation, BML has now or will at any time in the future develop further resources or reserves within the meaning of the Australian Code for Reporting of Exploration Results, Mineral resources and Ore Reserves (The JORC Code).

Before making an investment decision, you should consider, with or without the assistance of a financial adviser, whether an investment is appropriate in light of your particular investment needs, objectives and financial circumstances. You should have consideration to the risks involved in investment in BML some of which are detailed in BML's prospectus dated 26th October 2007 as lodged with the Australian Securities and Investment Commission and available from either Australian Securities Exchange Limited or BML on request.

By accepting this presentation, the recipient represents and warrants that it is a person to whom this presentation may be delivered or distributed without a violation of the laws of any jurisdiction.

This presentation is not to be disclosed to any other person or used for any other purpose and any other person who receives this presentation should not rely or act upon it. Information contained in this presentation is confidential information and the property of BML. It is made available strictly for the purposes referred to above. The presentation and any further confidential information made available to any recipient must be held in complete confidence and documents containing such information may not be reproduced, used or disclosed with the prior written consent of BML.

This presentation must not be disclosed, copied, published, reproduced or distributed in whole or in part at any time without the prior written consent of BML and by accepting the delivery or making to it of this presentation, the recipient agrees not to do so and to return any written copy of this presentation to BML at the request of BML.

COMPETENT PERSONS STATEMENT

Information in this presentation that relates to BML Exploration Results, Exploration Targets, geology, drilling and mineralisation is based on information compiled by Peter Temby, an employee of Anpet Exploration Pty Ltd and/or Steve Groves who are both Members of the Australian Institute of Geoscientists. Both Mr Temby and Mr Groves have sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activities that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Both Peter Temby and Steve Groves have consented to the inclusion in this presentation of matters based on their information in the form and context in which it appears.

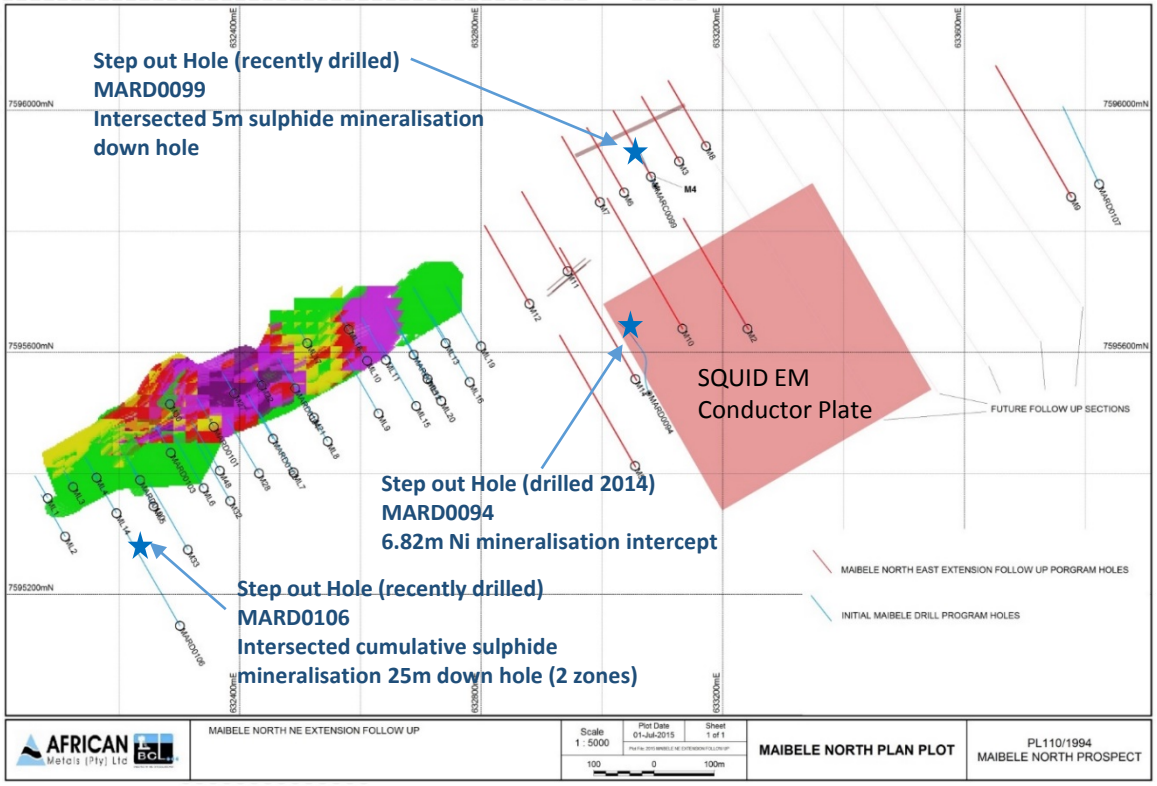
Information in this report that relates to exploration results where %Ni Equivalent results have been calculated is based on information compiled by Mr Steven Groves in compliance with 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.". All other Exploration Results included in this report have previously been released publicly in compliance with the JORC Code 2004 and have not materially changed since the original disclosure.

JV PRIORITY OBJECTIVE IS TO INCREASE RESOURCE AT MAIBELE NORTH

BOTSWANA Metals Limited

Cut-off (Ni)	Tonnes (Mt)	Ni (%)	Cu (%)	Pt (g/t)	Pd (g/t)	Rh (g/t)	Ru (g/t)	Au (g/t)
0.30	2.38	0.72	0.21	0.08	0.36	0.04	0.05	0.10

- At 0.3% Cut-off determined by economic parameters from Selebi Phikwe Mine



Aggressive 12,500m drill program well underway

- Designed to increase resource
- Designed to increase confidence level of known resource (inferred to indicated)
- Designed to optimise metallurgical processes
- Designed to test strong SQUID EM anomalies along strike to potentially extend orebody

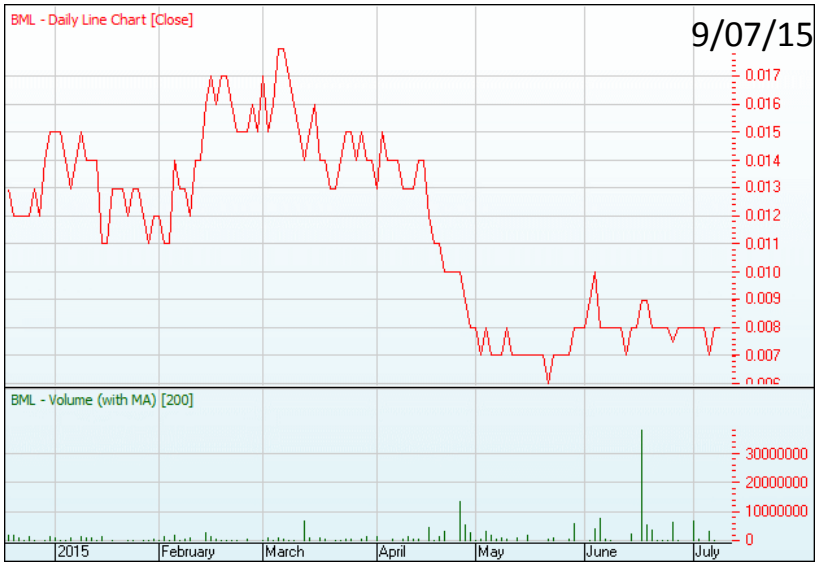
Maibele North orebody and in red the 12 additional step out holes that will be drilled in addition to the 5 step out holes shown in blue.

BOTSWANA METALS LIMITED PROFILE (ASX: BML)

Botswana Focus with BCL – THE RIGHT PARTNER IN THE RIGHT PLACE

JV Funding – Maiden Resource – Potential New discoveries = De-risked opportunity

Current Share Price	A$0.008
Shares On Issue*	568 million
Options on Issue (ex price at 1.5c to 31 Dec 2016)	410 million*
Performance shares	3.5 million
Cash at 31 March 2015	~A$.35million
Debt	NIL



***SPP to up to $1.2m open until 17 July**

Market Capitalisation (undiluted for options)	~A$4.5million
Enterprise value (31 Dec 2014)	A$7.5 million

Low cash burn rate (~A$130k in March qtr)

52 week trading range – ord shares	0.6c to 4.5c
Average daily vol (based on past 12 months)	4 million
Top 20 (1st May 2015)	45%
Management	18%

BML TEAM: WE KNOW BOTSWANA

BOTSWANA Metals Limited

BOARD OF DIRECTORS AND MANAGEMENT

- **Mr Patrick Volpe** – Chairman (~12.5% equity)
- **Dr Paul Woolrich** - Non-Executive Director (~0.5%)
- **Mr Massimo Cellante** - Non-Executive Director (~5%)
- **Mr Steve Groves** - GM Exploration
- **Mr Elvis Mosweu** – Country Manager

OVER 100 YEARS EXPERIENCE IN BOTSWANA

Excellent relationships with Local Stakeholders

- Department of Mines
- BCL Limited- World Class Nickel mining and smelting operation
- Local tribal chiefs
- Local suppliers for BML
- Local institutions and Botswana Exchange

WE KNOW BOTSWANA

Board Members and Management have been instrumental in:

- Discovery of one the largest U discoveries in the world (A-Cap Resources)
- First discovery of graphite mineralisation in Bots (QPene)
- Recent Discovery potash (Cambow)
- Biggest Gold Mine in Botswana (Mupane Gold Mine)
- Discovery of several very large coal deposits in Botswana (A-Cap Resources)

BML Team operates in Australia and Botswana

BCL – THE RIGHT PARTNER

- **BCL** is an international mining company owned by the Botswana Government
- **BCL** is hungry for ore after mining 175Mt to 1km depth over past 50 years
- **BCL** Mining and Smelting Operation:
  - supports a town of over 50,000 people
  - employs 5000 people from the local area

- **BML Joint Venture**
  - is a priority exploration play for BCL
  - only 55KM from BCL mining operation
  - **BCL** providing open chequebook until completion of BFS (subject to positive Scoping Study)
  - **BCL** also funding exploration for potential new discovery areas at Takane
  - **BCL** have first right of refusal over any new discoveries outside JV
  - Offtake agreement is in place with **BCL**

WHY INVEST IN BML – A LEVERAGED EMERGING NICKEL PLAY

BCL Joint Venture funding provides shareholders a de-risked opportunity to participate in early cash flow

And

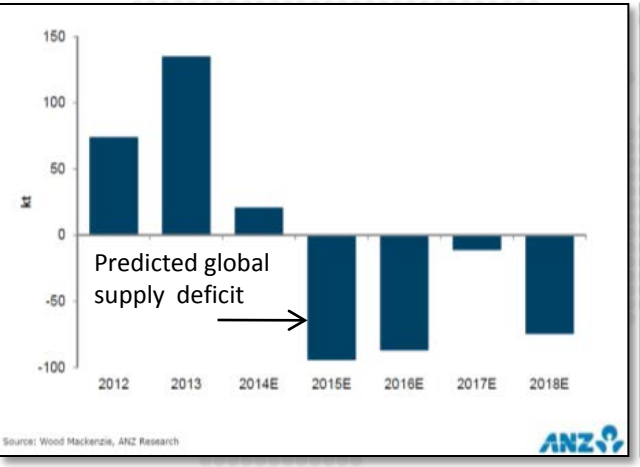
Potential to declare Eastern Botswana a new mineralised province

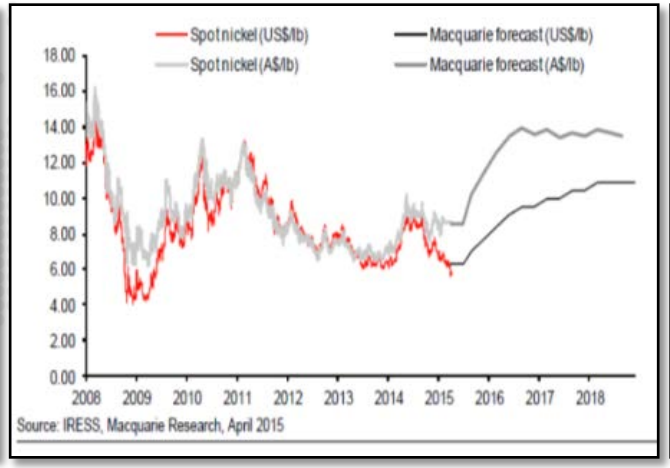
- **BML leveraged to Ni price**
- **Aggressive 12,500m drill program well underway at Maibele North**
- **Potential to significantly increase resource and resource status**
- **Takane expected to contain new drill targets**
- **BCL open chequebook until completion of BFS (subject to positive Scoping Study)**
- **Potential to make new discovery on PL59/2008 100% owned by BML (to be funded by SPP)**
- **BML Board strategy to allow shareholders to participate where possible (**SPP in progress – attractive offer to shareholders at $0.0075)
- **Positive drill results should re-rate BMLs market cap**
- **Current low market cap of only $4.5m**

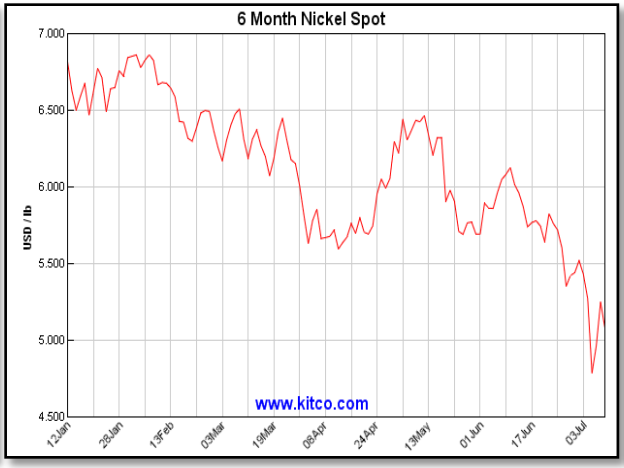
THE RIGHT METAL – BML EXPLORING FOR NI AND CU

BOTSWANA Metals Limited

- Reduction in global supply of Ni – e.g. Indonesian decision for mandatory in-country smelting
- In the short term: build up of inventories in China and increased exports (e.g. supply from Philippines) are headwinds for the nickel price.
- Indonesia expected to keep export ban in place and drive investment in NPI plants in-country
- LME stockpiles have been increasing but are stabilising in 2015
- Ni world market balance predicted to be in deficit from mid – late 2015
- Most forecasters predicting Ni price rises in med/long term





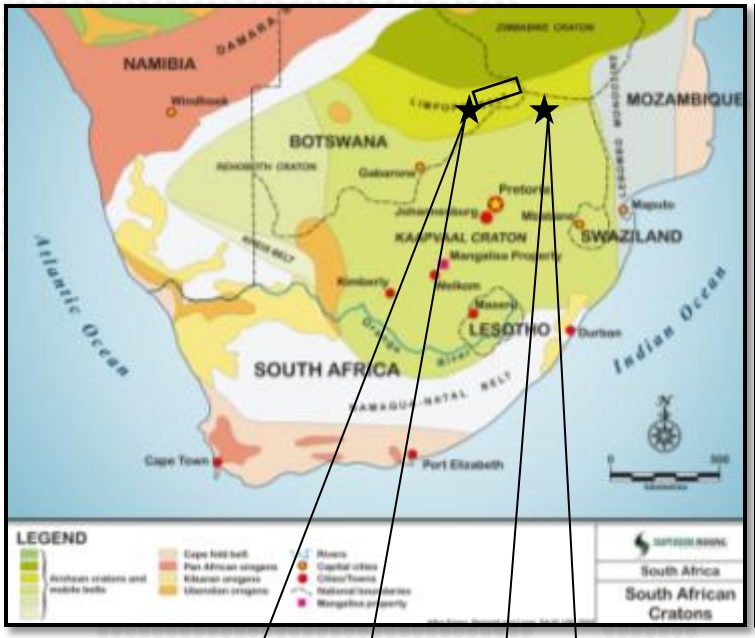


The last LME deficit (2006) was 51k tonnes – Ni price moved to $35k/tonne!

PROTEROZOIC MOBILE BELTS – LIMPOPO ANALOGUES

BOTSWANA Metals Limited

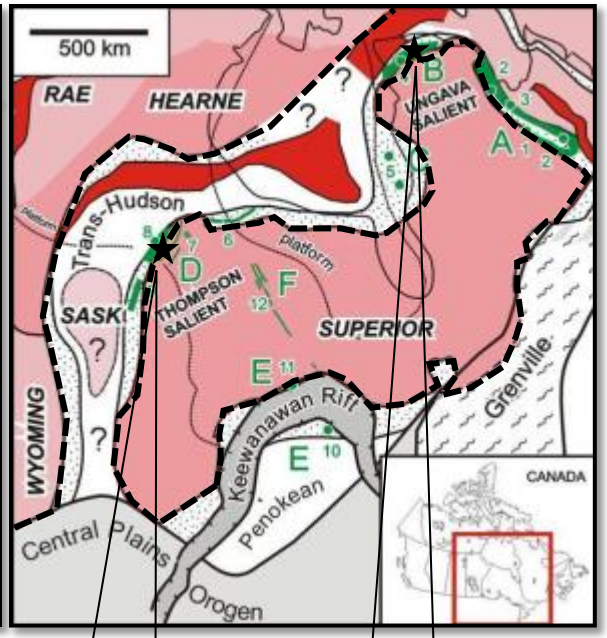
Limpopo Mobile Zone
Ultramafic Volcanism ~ 2.05Ga (similar age to Bushveld?)



Selebi Phikwe (BCL Mine)
175 Mt @ 0.81% Ni, 0.85% Cu

Messina Cu (Karoo?)
40Mt @ ~1.75% Cu
(historical est.)

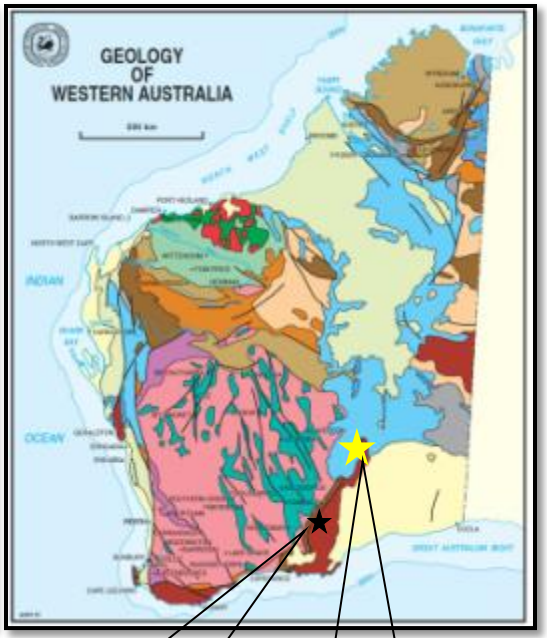
Circum-Superior Belt
Ultramafic Volcanism ~ 1.88Ga



Thompson Belt
120Mt @ 2.1% Ni

Raglan Deposits
35Mt @ 2.9% Ni

Albany – Fraser
Ultramafic Volcanism ~1.3Ga



Nova-Bollinger
14.3Mt @ 2.4%Ni, 0.9%Cu, 0.08%Co

Tropicana Gold
117 Mt @ 2.06g/t Au

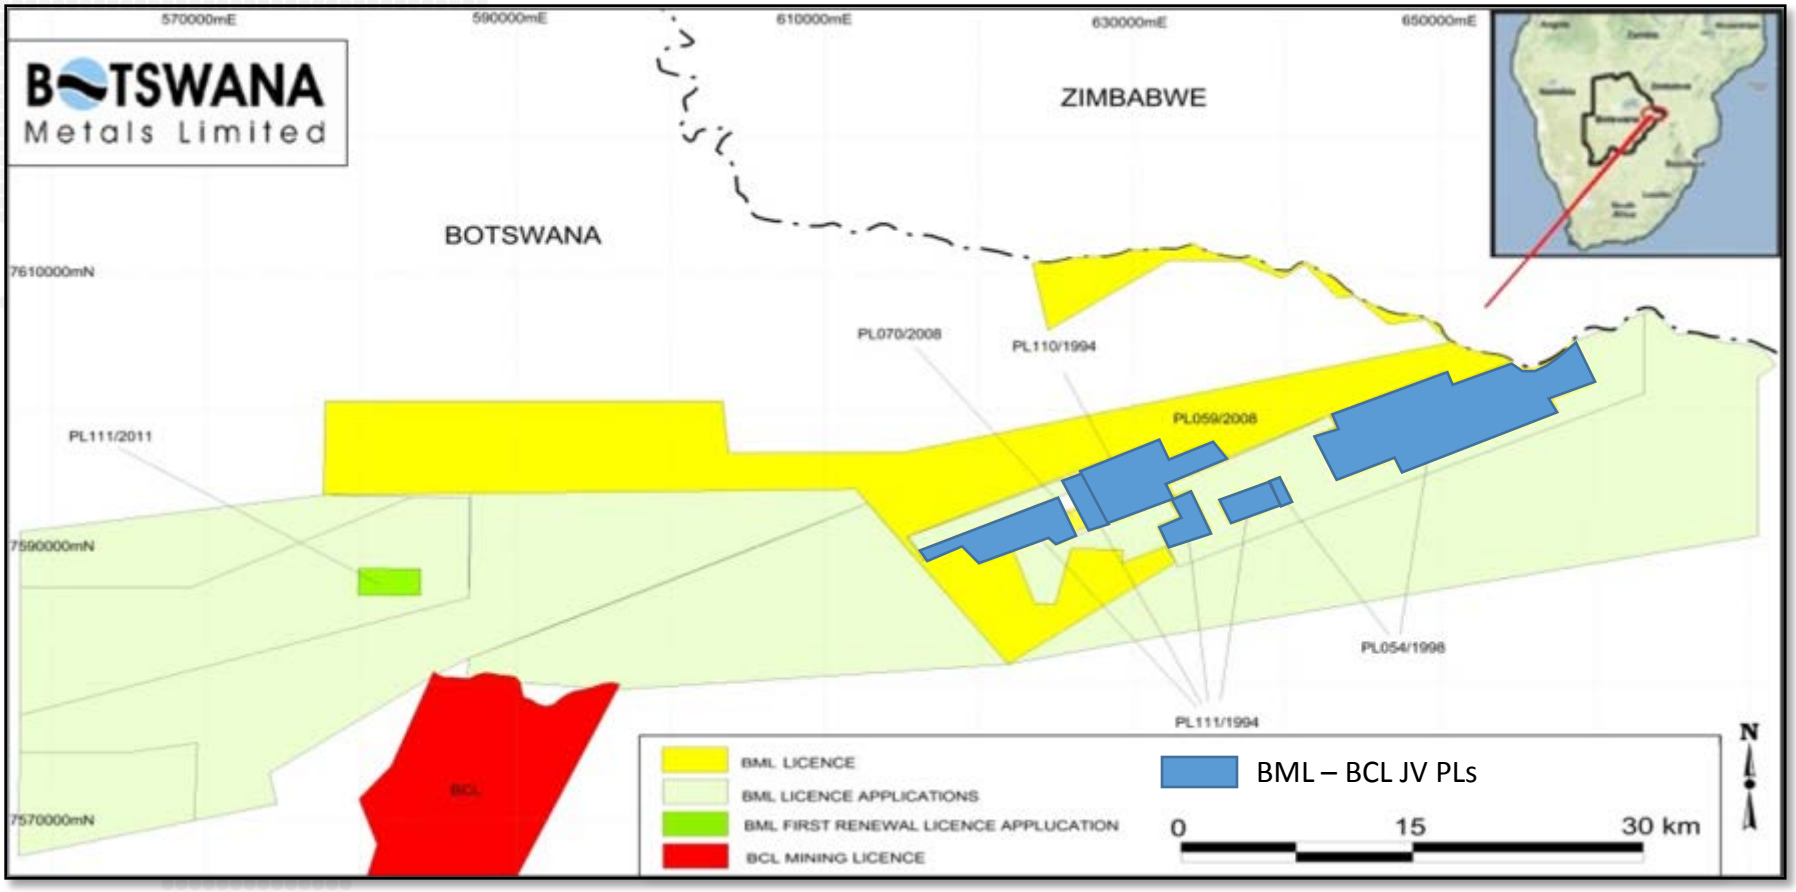
Limpopo Mobile Belt in Botswana Chronically Underexplored!

- **Maibele North ~50km away from Selebi Phikwe where 175Mt have been mined**
- **BMLs Portfolio contains up to 32km strike length of the same geology**

JV COVERS 180 SQKM OF BML EXISTING 1000SQKM PORTFOLIO

BOTSWANA Metals Limited

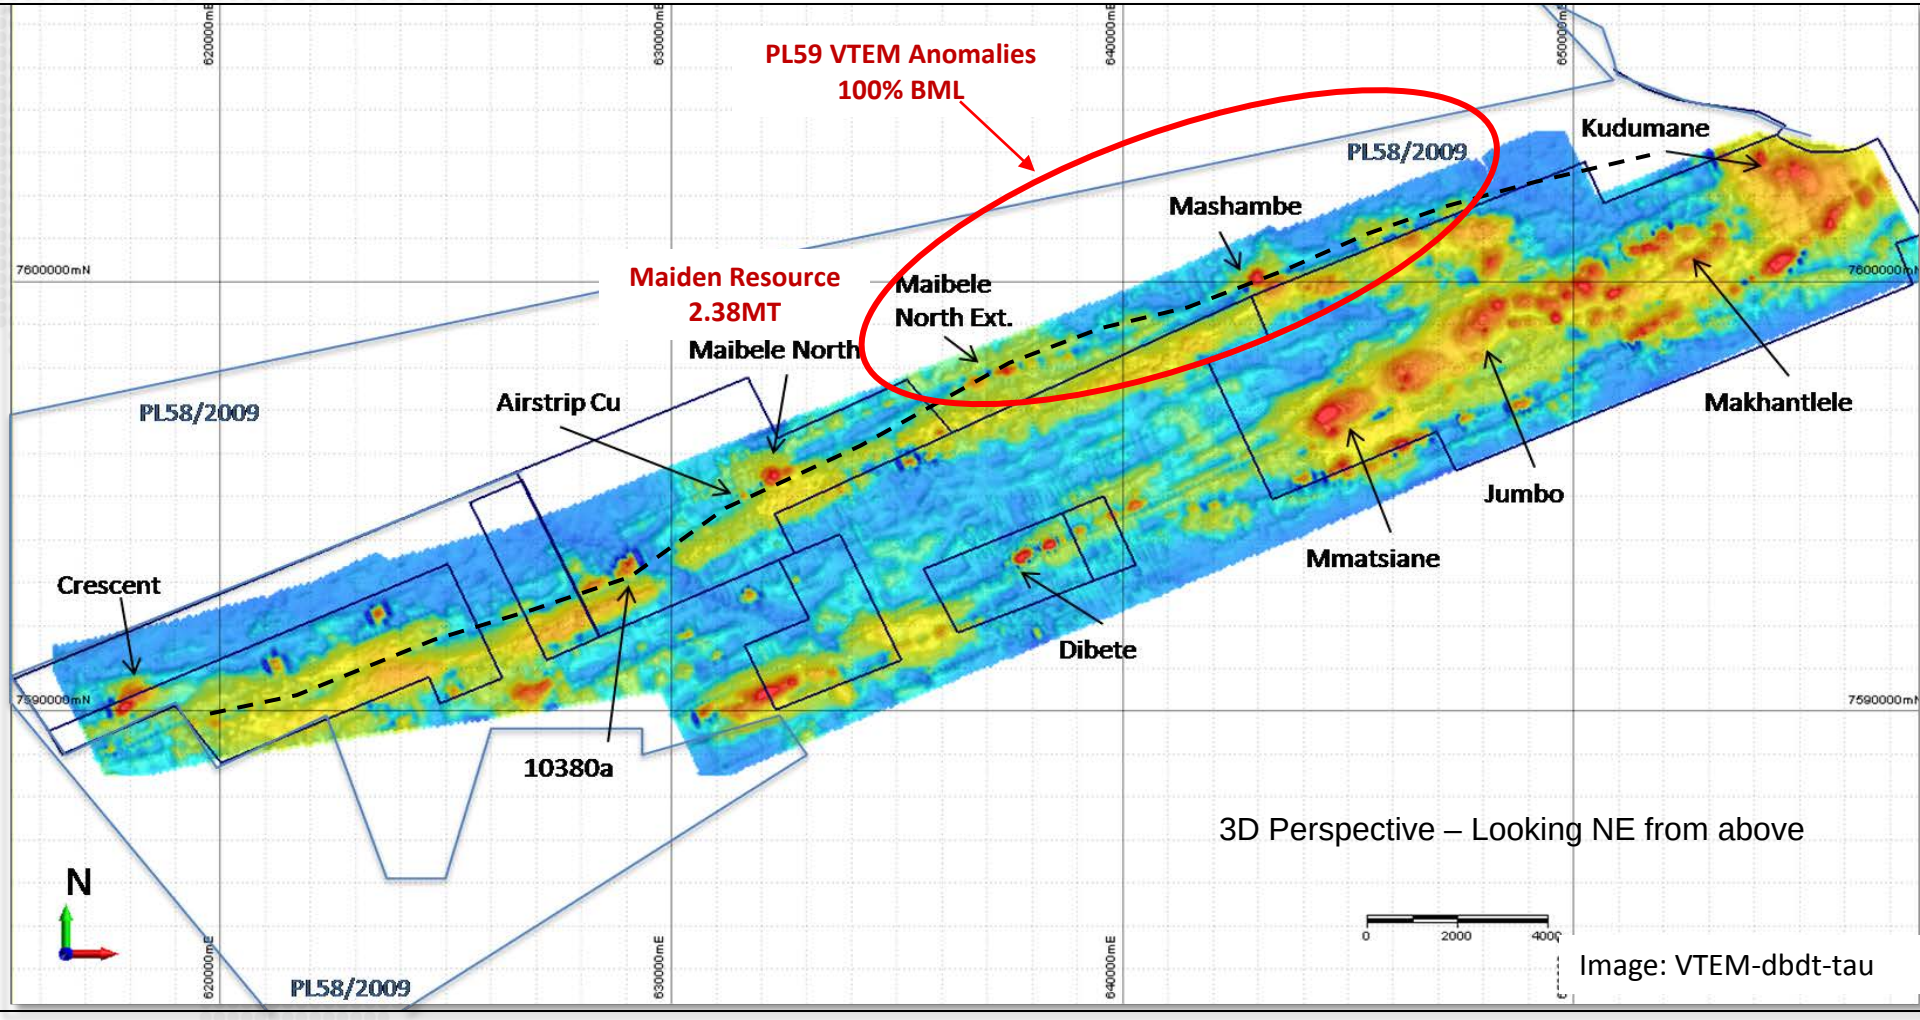
If granted, new applications will increase portfolio threefold



- All BML Prospecting Licenses are within the **Limpopo Mobile Belt** in Eastern Botswana

10

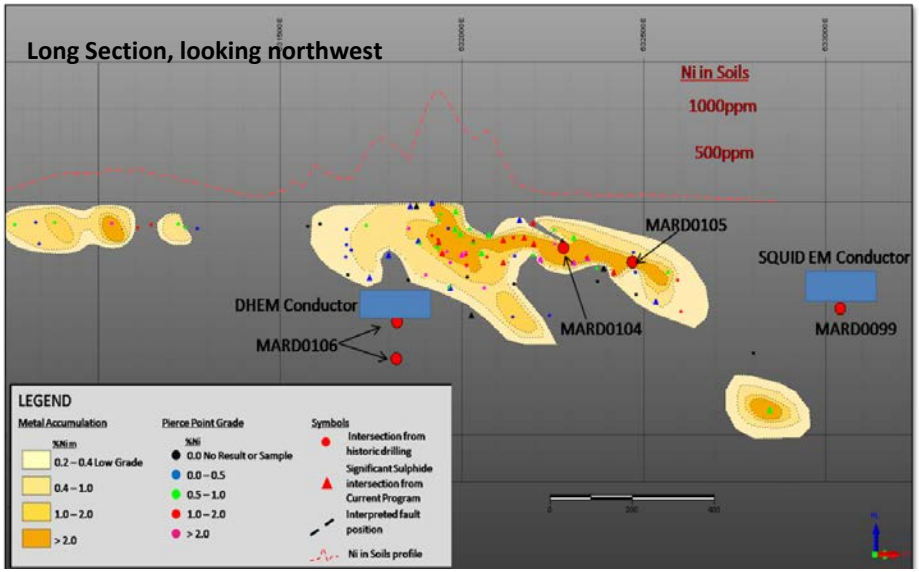
OVERVIEW OF EXPLORATION PROSPECTS

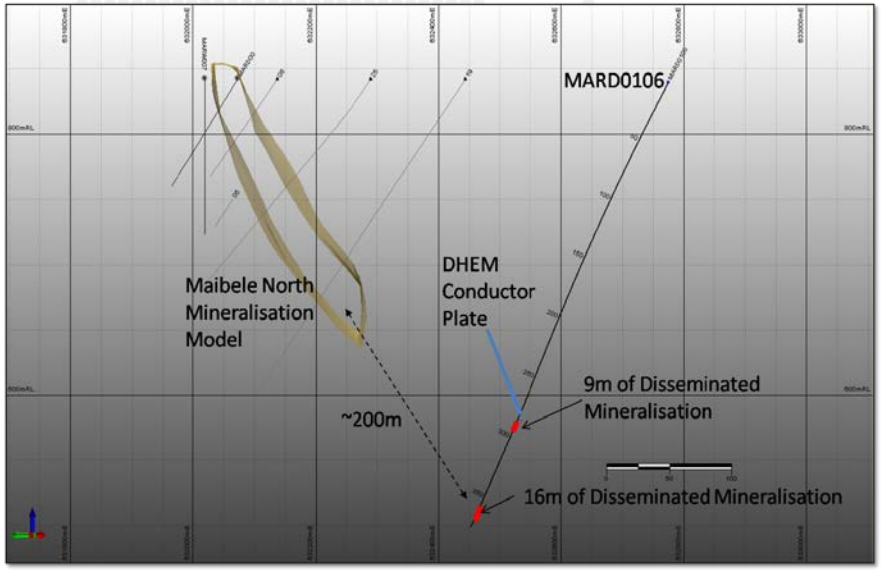


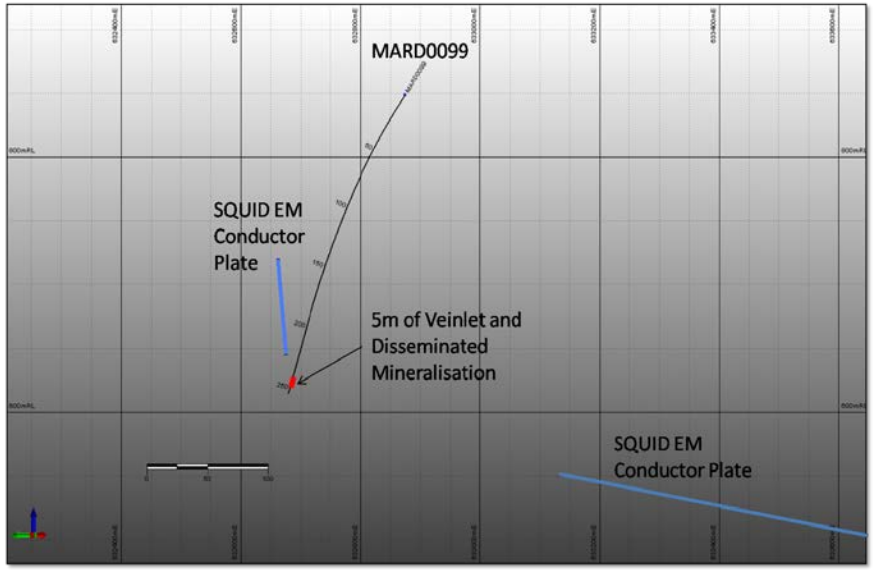
- 16km long mineralised trend encompassing
  - 10780a ,10830a, Airstrip Ni, Maibele North, Maibele New, Maibele Extension (*100%) Mashambe (100%)

SQUID EM SUCCESSFUL FOR TARGETING NEW MINERALISATION

- 17 step out holes to be drilled (3 completed)
- Every hole targeting SQUID EM anomalies has encountered sulphide mineralisation
- Three holes drilled to date have missed conductor targets yet still intersected significant sulphide mineralisation
- Anomalies extend to at least 200m below current resource and up to 1km along strike

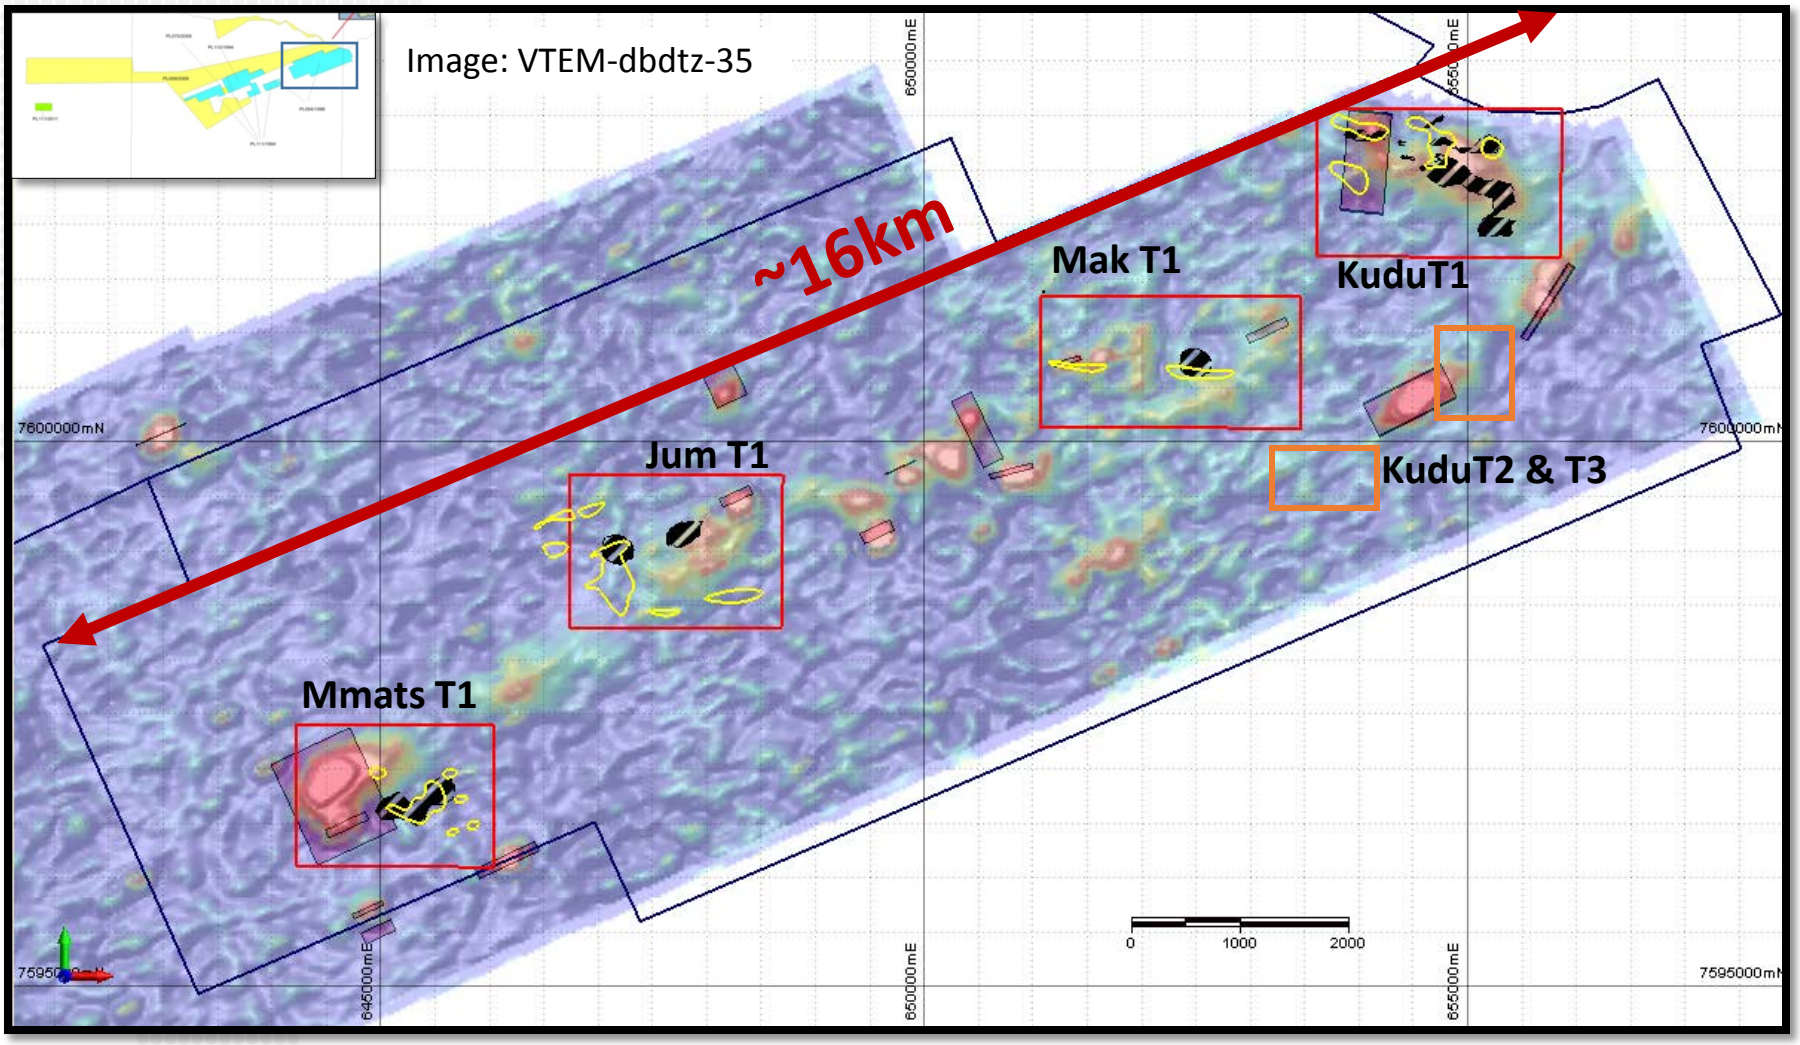






PL54/1998 TAKANE – POTENTIAL NEW DISCOVERY BELT

BOTSWANA Metals Limited

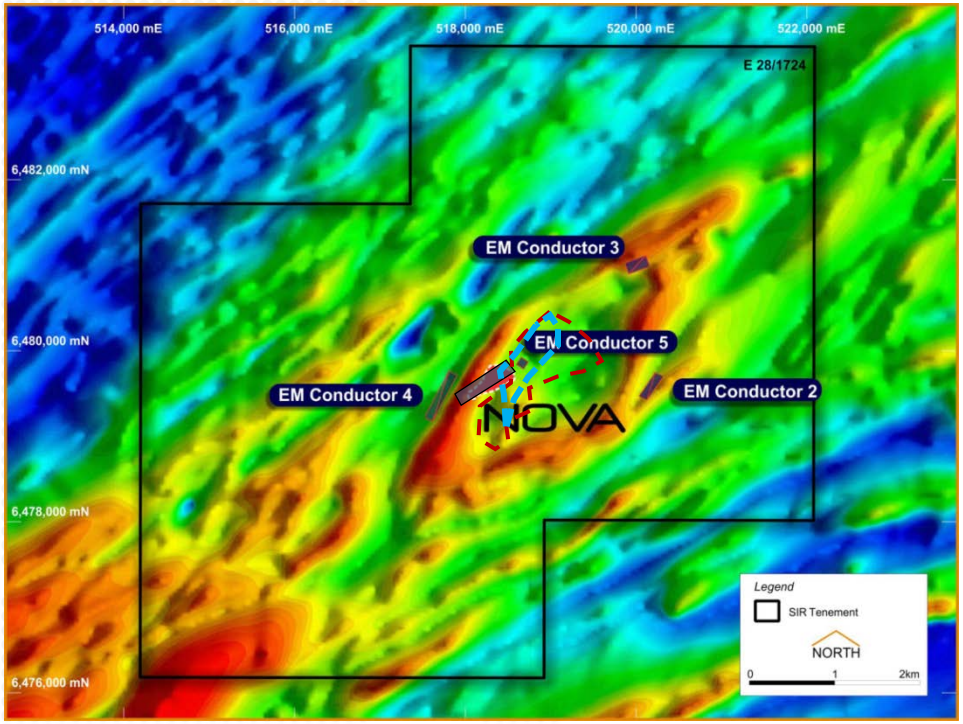


Cu Anomaly >100ppm

Mapped Ultramafic Intrusion

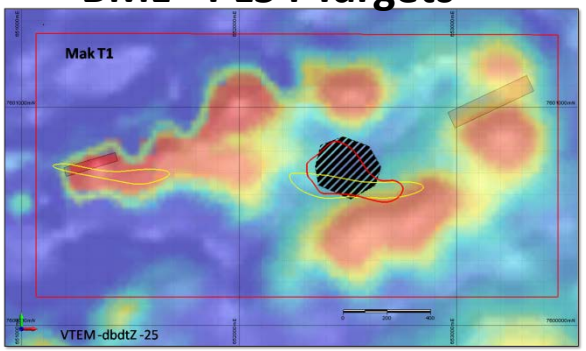
Modelled VTEM conductor plate

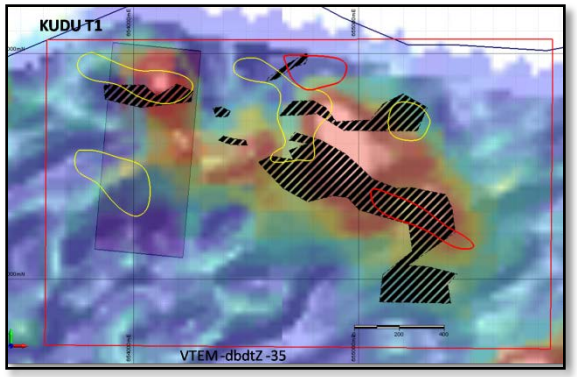
Takane to test similar anomalies to the Sirius Resources Nova – Bollinger discovery

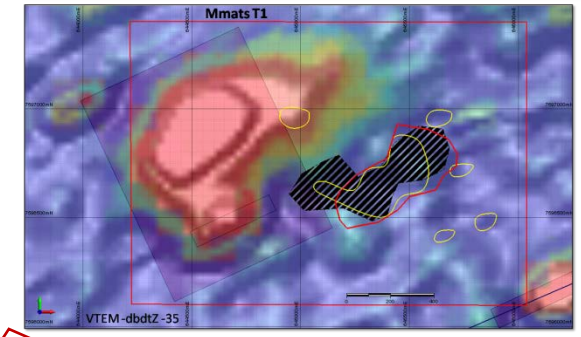


- "Eye" Magnetic feature ~ 4km long
- ~2km long Cu and Ni Soil anomaly
  - Peak Cu mostly 120 – 200ppm
  - Peak Ni mostly 200 – 500ppm
- A number of discrete EM conductor plates associated with soil and magnetic anomaly

BML - PL54 Targets



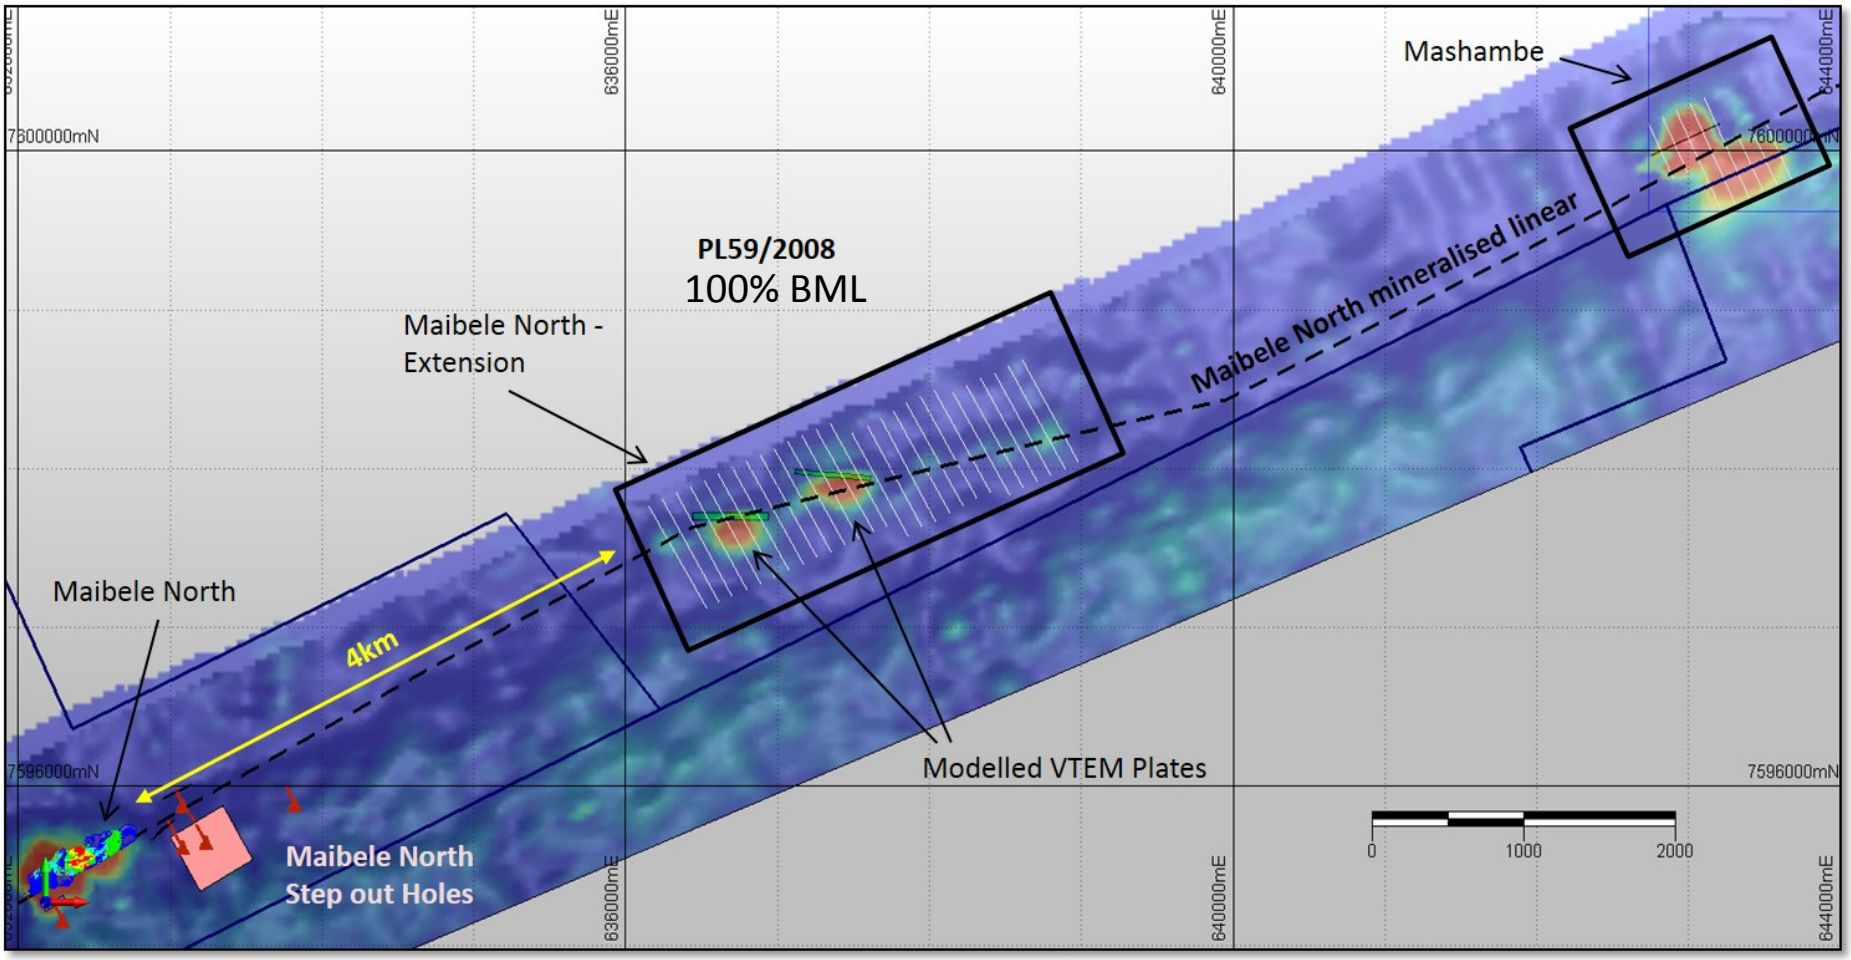




Ni Anomaly >500ppm (figs 2x scale)

BML HAS 100% OWNED PLS WITH POTENTIAL FOR ADDITIONAL DISCOVERIES

- BCL has first right of refusal of any new discovery outside JV ground
- New discoveries on this belt would be a game changer for BML shareholders



WHY INVEST IN BML – A LEVERAGED EMERGING NICKEL PLAY

BOTSWANA Metals Limited

BCL Joint Venture funding provides shareholders a de-risked opportunity to participate in early cash flow

And

Potential to declare Eastern Botswana a new mineralised province

- **BML leveraged to Ni price**
- **Aggressive 12,500m drill program well underway**
  - Designed to increase orebody
  - Strong SQUID EM anomalies along strike with potential to extend orebody to be tested
  - Designed to increase confidence level of known resource (infill drilling to indicated status)
  - Designed to collect additional samples to optimise metallurgical processes
- **Positive drill results should re-rate BMLs market cap**
- **Takane expected to contain new drill targets**
  - Completed ground geophysics shows targets with similar features to Fraser Range in WA
- **BCL open chequebook until completion of BFS (subject to positive Scoping Study)**
  - Maiden Inferred JORC Resource of 2.38Mt at Maibele North with potential to grow quickly
