25 September 2024

Time To ACT plc
("Time To ACT" or the "Company")

Investor Evening

Time To ACT plc (AQSE: TTA), an engineering-led group focused on technology for the energy transition supply chain, is pleased to announce its participation in "The Pub Test" Investor Evening. This event is co-hosted by the Aquis Exchange and InvestorHub and will take place on Wednesday, 2nd October 2024 at The Jamaica Wine House, St Michael's Alley, Cornhill, EC3V 9DS, starting at 6:00 PM.

The Company's Executive Chairman, Chris Heminway, will engage in a fireside conversation designed especially for private investors. This setting offers a unique opportunity for attendees to interact directly with company executives, ask questions, and network with fellow investors.

Commenting on the event, Chris said:
"We look forward to meeting and engaging with interested parties, shareholders, potential shareholders, and stakeholders. This event is a fantastic opportunity to share our vision and answer any questions investors may have."

All attendees will have the chance to network over drinks and a buffet.

To register for the event, please use the following link:https://www.pubtestevents.com/upcoming-events

About Time To ACT plc
Time To ACT plc is an engineering-led group focused on technology for the energy transition supply chain. It currently has two principal operating businesses: Diffusion Alloys and GreenSpur. As the parent company of the Group, Time To ACT provides strategic and operational support to the operating companies and capital to enable their growth.

About GreenSpur
GreenSpur is an intellectual property creator and generator designer that has developed a credible solution for renewable energy applications to the Rare Earth magnet problem.

Magnets constructed using Rare Earth Elements (REEs) are fundamental components in electrical generators and electric vehicle motors which are critical to delivering the clean energy transition. However, there are substantial supply chain constraints and risks in the sourcing of REEs that are needed for these magnets.

GreenSpur's generator design eliminates the need for Rare Earth magnets and copper coils without any loss in electrical performance.

About Diffusion Alloys
Diffusion Alloys supplies diffusion coatings. A diffusion coating is an intermetallic layer that protects metal components from degradation at high temperatures and in highly corrosive environments, such as those found in hydrogen and nuclear energy generation.

Diffusion Alloys has joined forces with Johnson Matthey plc, the market leaders in synthesis gas ("syngas") with a significant pipeline of Blue Hydrogen projects, to scale-up production and address the increasing demand for low carbon hydrogen used to reduce global carbon emissions.

In addition to working for numerous historic and existing customers, the Directors believe that Diffusion Alloys is the only credible diffusion coater in the world for blue hydrogen components, has already been coating in volume for a leading European vendor in the green hydrogen space and is also in pre-commercial discussions with new cleantech equipment manufacturers.

Diffusion Alloys has two distinct areas of focus:

- Coating Technology: Selling technical excellence in coating capability supported by the concept of "flexible capacity" - the ability to provide customers with capacity wherever they need it, whether for the coating of Large Parts or Small Parts.
- Coating Services: Plant-led coatings business centred on its Middlesbrough site.
