Adsure Services PLC

("Adsure" or the "Company")

Adsure Services signs contract with K10 Vision for Audit Working Paper Software

Adsure Services PLC ("Adsure" or the "Company"), a leading provider of audit and assurance services, is pleased to announce that its operating subsidiary, TIAA Ltd, has signed a contract with K10 Vision to implement its audit working paper software.

Following a competitive selection process, K10 Vision was chosen as the preferred supplier due to their platform's innovative solutions. This move marks a key milestone in Adsure's digital transformation and growth strategy, particularly in the development of proprietary Large Language Model (LLM) AI tools targeted at improving the operational efficiencies of government-funded organisations, including NHS trusts, housing associations and local governments.

The transition to an online working paper system will enhance the efficiency and accuracy of TIAA Ltd's audit processes. Additionally, the structured data tables within K10 Vision's software will create a robust database to train advanced AI algorithms, further strengthening Adsure's technological capabilities in the audit and assurance sector.

The implementation process is already underway, with full integration expected to be completed in the coming months.

Kevin Limn, CEO of Adsure Services PLC, commented:

"Implementing K10 Vision's cutting-edge audit software is a significant step forward in our strategic roadmap. This system will not only enhance our operational efficiencies but also provide a structured foundation for developing next-generation AI tools tailored to audit and assurance services."

Paul Gascoigne, CEO of K10 Vision, commented:

"We are delighted to be partnering with TIAA Ltd the wholly owned subsidiary of Adsure Services PLC on their digital transformation journey. Our audit working paper solution is designed to provide structure, security, and scalability, and we look forward to supporting their ambitions in AI-driven audit technology."

-Ends-
