IntelliAM AI plc
('IntelliAM' or the 'Company')
Senior Management Team Strengthened to Drive Growth

IntelliAM AIplc(AQSE: INT), the software company leveraging the power of AI and machine learning in the manufacturing industry, is pleased to announceit has strengthened its senior team as it plans further growth.

IntelliAM, which uses machine learning and AI solutions to tap into billions of manufacturing data points to boost productivity and reduce operating costs for customers, is seeking to build on a strong start following its listing on the Aquis Stock Exchange last year. Customers include Muller, Mars, ADM, Weetabix, and Hovis.

Jane Robinson has been appointed as Vice President for Business Development at IntelliAM which counts six of the world's top 12 food and drink producers as customers.

Jane is a former Founding Director of engineering business Cutting Technologies and has more recently delivered financial change management projects for large public sector organisations and private sector companies.

A well-known figure in the South Yorkshire business community, and a Member of the Company of Cutlers in Hallamshire, Jane will lead IntelliAM's accelerated growth and cross-channel marketing.

IntelliAM has also recently appointed Ian Wild as VP of Product. Ian, who is based in San Francisco, has significant multi-national experience as a Customer Experience VP, Partner Solutions VP and Senior Solutions Architect.

Owain Lewis has been appointed as VP of Data Engineering . Owain joins IntelliAM following a lengthy career as a senior applications architect working for PLCs and limited companies including PlusNet and TechnoPhobia.

IntelliAM CEO, Tom Clayton, said:"IntelliAM is fast becoming a leader in the science of manufacturing, and we are thrilled Jane has joined us permanently to help drive our brand forward, both in the UK and globally.

"Jane has a deep knowledge of the manufacturing and engineering sectors and, as a former director at a successful SME, she knows how to leverage growth through smart business development and impactful marketing."

Jane Robinsonadded: "Manufacturers do not need to break the bank to rebuild old factories or replace legacy equipment - instead, they can use the data taken from existing machines to understand how efficiency can be improved, productivity increased, downtime minimised, and energy reduced.

"The scope for game-changing improvement across the entire manufacturing sector is colossal, and I'm looking forward to growing both internal and external relationships to support IntelliAM's expansion."

About IntelliAM

IntelliAM- which stands for intelligent asset management -is an innovative UK tech companythat specialises in AI and machine learning for the manufacturing industry.

Many of the world's biggest manufacturers, including half of the world's top 12 food and drinks producers, use IntelliAM's machine learning and AI solution to tap into billions of manufacturing data points to boost productivity and reduce operating costs.

TheAquis-listed tech companywas founded in 2023 and isunderpinned by the strong technical foundations and manufacturing expertise of 53 Degrees North (53N) - an asset care company established over a decade ago, which functions as IntelliAM's engineering consultancy division.

IntelliAM is powering a new industrial revolution-unlocking greater productivity, quality, performance, efficiency, and safety, while also reducing waste and increasing throughput in the UK's manufacturing sector.
