Market-to-Net-Asset-Value Ratio (mNAV)

As of 17 July 2025, the Company's market capitalisation at the time of this announcement is approximately £4.50 million, resulting in a market-to-net-asset-value (mNAV) ratio of 1.82. This ratio provides a simple measure of how a company's market capitalisation compares to the assets it holds. A lower mNAV may indicate a closer alignment between the Company's market value and its digital asset treasury.

Chair, Brian Stockbridge commented:

"Our recent additions to Bitcoin and Solana were made primarily to round out our existing positions, ensuring a cleaner and more intentional allocation across the treasury. The majority of capital in this deployment was focused on increasing our exposure to Ethereum, which we continue to see as a core long-term holding. Following this update, Vault's mNAV ratio stands at Circa.1.82, reflecting both the strength of our asset base and our ongoing commitment to strategic, measured treasury management."

About Vault

Vault PLC is a UK-based technology company specializing in identifying, developing and commercialising early-stage technology businesses, primarily in the blockchain and fintech sectors. Vault has adopted Ethereum and Solana as core digital assets within its treasury strategy, reflecting confidence in Ethereum's long-term utility and ecosystem strength and in Solana's attractive staking yields and growing institutional adoption. Together these offer Vault an efficient, scalable, and yield-generating alternative for treasury management.
