**ASX Release**
4 December 2018

# Appendix 3B - Notification

Spectur Limited **(ASX:SP3)** "Spectur" or "the Company" advises that on 29 November 2018, two Appendix 3B's were lodged with ASX online.

Please note that the second Appendix 3B replaces the initial Appendix 3B lodged, due to a typographical error, and is not in addition to it.

Yours faithfully

Suzie Foreman
Company Secretary

**ABOUT SPECTUR**
Spectur Limited is an Australian-based company which owns the rights to its innovative hardware and disruptive cloud based IOT and security systems which operate in Australia. The two key industries that Spectur currently services are the building/construction/civil industry and the critical infrastructure industry. The Company's focus is to service the commercial, industrial and governments sectors. Spectur's core product is the HD4 security camera system and associated cloud based platform. The HD4 is a solar powered battery backup security system which is remotely accessed and connected via 3G/4G technology which is connected to the cloud based platform. Spectur has also added thermal camera surveillance as a stand-alone system to complement its existing product base. The Company is rapidly implementing a growth plan to firstly grow revenues and market share in the Australian security surveillance sector and, secondly to penetrate other key strategic markets.
