15 October 2025

Vault Ventures Plc
("Vault Ventures" or the **"Company")**

vSignal.ai Product Update

Vault Ventures Plc (AQSE: VULT), a London-based technology developer focused on blockchain and AI innovation, is pleased to provide an update on the development of its proprietary product, vSignal.ai. This announcement marks the completion of the platform's second development cycle.

The goal of this cycle was to bring together all major components of the platform into a fully integrated and operational system in preparation for deployment.

Key Achievements

- **Infrastructure ready for scale:** vSignal.ai is now live across its full cloud environment, providing a secure and scalable foundation, a key preparatory step as the product moves towards launch.
- **Seamless user access:** Secure login and sign-up processes, including Google and email authentication with verification, are now fully operational.
- **Dynamic content experience:** The homepage now supports different content or features depending on a user's access level, allowing the Company to control who sees what during testing.
- **AI-driven insight engine:** Live news and data feeds are powered by CryptoPanic and Gemini AI, which automatically summarises and prioritises market updates for users.
- **Contextual signal generation:** Perplexity AI has been integrated to surface relevant news based on macroeconomic data trends, helping users understand why key indicators are moving and delivering early trading and investment signals.
- **Comprehensive data coverage:** Historical and live macroeconomic and cryptocurrency data are now fully integrated, supporting deeper, context-rich analysis.
- **Smarter user interface:** Updated layouts, modals and interactive components improve navigation and data visibility, particularly on mobile devices.

Next Goals

With over 95% of backend functionality complete, the next phase will focus on final product polish and expansion. The development team is improving the sign-on experience by adding guidance for choosing coins and making visuals more attractive. Charting tools are being upgraded to support custom date ranges, and refinements to the user interface and user experience are under way to optimise responsiveness and visual design.

Our final development sprint starts next week ahead of closed user testing which starts on the 29th October. In the coming weeks we'll be in a position to finalise launch timings, including when shareholders will get first access.

About Vault

Vault Ventures PLC is a UK-based technology development company focused on building and commercialising proprietary products in the blockchain, AI, and fintech sectors. Product development is undertaken through its operating subsidiary, System7, which is responsible for the design and launch of new technologies with the potential to generate revenues. To support its operating strategy, Vault also maintains a digital asset treasury with holdings in Ethereum.

Important Notice:

The Company operates a cryptocurrency treasury. The Company's treasury activities involve investment in financial instruments that may fluctuate in value and are subject to market, credit and liquidity risks. These investments are undertaken for corporate purposes and are not offered to the public. This announcement does not constitute investment advice or an offer or invitation to invest. Past performance is not a reliable indicator for future results. Capital is at risk and returns are not guaranteed.

1. **Capital at risk**

Investments made as part of the treasury strategy may fluctuate in value. There is a risk that capital may be lost.

2. **No guarantee of returns**

Returns generated through treasury activities are not guaranteed and may vary depending on market and economic conditions.

3. **Liquidity risk**

Some treasury assets may be illiquid or subject to market constraints, which could affect the company's ability to access funds when needed.

4. Market and Interest Rate Exposure

Changes in interest rates. Inflation or broader market conditions may adversely impact the value or performance of treasury investments.

5. Credit and counterparty risks

The Company is exposed to the risk that counterparties may default on their obligations, potentially resulting in financial loss.

6. Regulatory and Taxation Uncertainty

Future changes in regulation or tax treatment may affect the structure or outcomes of the treasury strategy.

7. Not a financial promotion

This communication is provided for information purposes only and does not constitute an offer or invitation to invest. The treasury strategy is managed for corporate purposes and is not marketed to the public.
