23 October 2025

Vault Ventures Plc

("Vault Ventures" or the **"Company")**

vSignal.ai Product Update - Completion of Third Cycle

Vault Ventures Plc (AQSE: VULT), a London-based technology developer focused on blockchain and AI innovation, is pleased to provide an update on the progress of its proprietary product, **vSignal.ai**. This announcement marks the completion of the platform's third development cycle, focused on final feature integrations, enhancing system stability, and refining the frontend in preparation for launch.

The third cycle delivered major improvements to chart functionality, interface design, and overall platform performance, with final backend and data synchronisation refinements to follow in the final development phase.

Vault remains on schedule to complete its final sprint ahead of **closed user testing commencing on 29 October 2025**.

Key Achievements

- **Chart data integration:**
  Chart data from CoinGecko is now fully implemented across all supported time ranges (1D, 7D, 1M, 3M, 1Y, and All). Both real-time updates and historical visualisations have been tested and are performing smoothly, which will provide users with fast, accurate and detailed price insights.
- **Macro Signals Framework:**
  The new Macro Signals Framework (which organises and explains the macroeconomic factors influencing digital asset prices) has been fully designed and integrated into the product. This system is intended to help users interpret why asset prices are moving, grouping global drivers such as inflation, interest rates, and liquidity trends into clear, actionable categories.
- **News and engagement tools:**
  The news feed has been stabilised, with improved reliability in fetching and displaying stories. Users will be able to interact with content via like/dislike functionality, allowing vSignal.ai to learn individual user preferences over time enabling more personalised and relevant insights.
- **Catch-up section:**
  The Catch-up interface has been refined to improve layout, readability, and responsiveness across all devices.
- **Chart utilities:**
  Users can now download or share chart images directly from within vSignal.ai, including to social media platforms, improving accessibility and engagement with visual data.

Further updates, including launch timing and shareholder access, will be provided in due course.

Investor Q&A Update

Vault will be hosting an **Investor Q&A broadcast** via its retail investor platform, **Investor Hub, on 5 November 2025**. Shareholders and prospective investors are invited to submit questions in advance for the Company's leadership team to address during the session.

About Vault
Vault Ventures PLC is a UK-based technology development company focused on building and commercialising proprietary products in the blockchain, AI, and fintech sectors. Product development is undertaken through its operating subsidiary, System7, which is responsible for the design and launch of new technologies with the potential to generate revenues. To support its operating strategy, Vault also maintains a digital asset treasury with holdings in Ethereum.

Engage with the Vault management team directly by asking questions, watching video summaries and seeing what other shareholders have to say. Navigate to our Interactive Investor Hub here.

Important Notice:
The Company operates a cryptocurrency treasury. The Company's treasury activities involve investment in financial instruments that may fluctuate in value and are subject to market, credit and liquidity risks. These investments are undertaken for corporate purposes and are not offered to the public. This announcement does not constitute investment advice or an offer or invitation to invest. Past performance is not a reliable indicator for future results. Capital is at risk and returns are not guaranteed.

1. **Capital at risk**

Investments made as part of the treasury strategy may fluctuate in value. There is a risk that capital may be lost.

2. **No guarantee of returns**

Returns generated through treasury activities are not guaranteed and may vary depending on market and economic conditions.

3. **Liquidity risk**

Some treasury assets may be illiquid or subject to market constraints, which could affect the company's ability to access funds when needed.

4. **Market and Interest Rate Exposure**

Changes in interest rates. Inflation or broader market conditions may adversely impact the value or performance of treasury investments.

5. **Credit and counterparty risks**

The Company is exposed to the risk that counterparties may default on their obligations, potentially resulting in financial loss.

6. **Regulatory and Taxation Uncertainty**

Future changes in regulation or tax treatment may affect the structure or outcomes of the treasury strategy.

7. **Not a financial promotion**

This communication is provided for information purposes only and does not constitute an offer or invitation to invest. The treasury strategy is managed for corporate purposes and is not marketed to the public.
