IntelliAM AI plc

("IntelliAM" or the "Group")

Orders from New Business Vertical

IntelliAM Expands into Building Products Manufacturing Sector

IntelliAM AI plc (AQSE: INT), a leading provider of AI-driven software solutions for the manufacturing and engineering sectors, is pleased to announce expansion into a new manufacturing vertical. The Group has won new contracts and platform deployments in the building products sector with leading manufacturers including Tarmac, Marshalls, H+H Building Construction, and Knauf in the UK and Japan.

The orders cover a total of 15 manufacturing sites. In aggregate, income from this new vertical is expected to amount to £250k in the current financial year and this is expected to grow materially in following years.

IntelliAM has an established and rapidly growing position in the FMCG (fast moving consumer goods) manufacturing industry. These orders mark a strategic expansion into a new addressable market as our AI and machine learning platforms become more widely recognised for improving manufacturing productivity.

IntelliAM has now begun transitioning these new customers onto the IntelliAM AI platform, with connected predictive-maintenance deployments already underway.

These engagements span mortar, block, brick, plasterboard and related high-volume manufacturing environments where mechanical wear, abrasive operating conditions and engineering downtime present persistent operational challenges. Manufacturers in the building products sector are increasingly facing high mechanical stress environments requiring deeper predictive insight, and increased need for 24/7 visibility, workflow efficiency, and asset reliability.

IntelliAM's AI-driven connected maintenance platform provides this capability, enabling manufacturers to reduce unplanned downtime, improve reliability, and deploy engineering resources more efficiently.

Tom Clayton, Chief Executive Officer of IntelliAM, commented:

"This expansion into a new manufacturing vertical demonstrates significant progress for IntelliAM in diversifying beyond FMCG and into a large new industrial market, which aligns with the Company's strategy to broaden vertical exposure and increase platform adoption."
