IntelliAM AI plc ("IntelliAM")

Further Purchase Order from Major Agricultural & Commodities Customer

IntelliAM AI plc (AQSE: INT), the industrial software company applying artificial intelligence and machine learning to improve the productivity, reliability and sustainability of manufacturing operations, is pleased to announce a further purchase order from one of the world's largest agricultural processing and commodities businesses. This takes the combined value of orders from this customer to over £450,000 for the last 12 months.

The order involves a trial of IntelliAM's machine learning and AI capability within the customer's EMEA operations and could provide a significant opportunity to scale both Layer 1 and Layer 2 of the IntelliAM Platform across the customer's principal businesses in the region. Layer 1 provides predictive industrial maintenance and reliability intelligence; Layer 2 provides operational intelligence.

Tom Clayton, Chief Executive Officer of IntelliAM, commented:

"IntelliAM is expanding its established commercial relationship with this global agricultural and commodities business and scaling its deployment with this latest project by extending the relationship into a potentially much broader machine learning and AI opportunity."
