Enlitic Signs Three-Year Global Distribution Agreement with Darwinist

Highlights

- Enlitic signs three-year global distribution agreement with Darwinist, a distributor of clinical AI models.
- Enlitic's Ensight 2.0™ ENDEX and ENCOG modules will be integrated into Darwinist's middleware platform, called Beagle, and once Enlitic has completed an onboarding and integration process, will be distributed as a Supported Vendor through that platform
- The Agreement provides for scope to deepen the partnership, enabling Enlitic to become a Recommended Vendor
- Total potential aggregate contract value at the initial partnership level is up to US$300,000.

Enlitic, Inc. (ASX: ENL) ("the Company") is pleased to announce it has signed a three-year global distribution contract with Darwinist for its Ensight 2.0™ with ENDEX and ENCOG modules for AI Orchestration, DICOM Handling and DICOM Standardisation use cases. ENDEX and ENCOG will be integrated into Darwinist's middleware platform, called Beagle, which streamlines the integration of AI tools within the healthcare sector.

Darwinist is a distributor of clinical AI models, focused on delivering solutions for integrating AI diagnostics into clinical workflows. Through its middleware platform, Beagle, it aims to simplify the deployment and management of diverse AI tools from multiple vendors, reducing the complexity which often comes with integration and providing scalable solutions to IT infrastructure challenges.

Once Enlitic has completed an onboarding and integration process, Ensight 2.0 will be distributed to Darwinist's clinical trial hospital customers presenting Enlitic as a Supported Vendor. The agreement provides scope for Enlitic to be promoted to Suggested Vendor and Recommended Vendor status contingent on certain milestones. Any such promotion in status would be expected to bring increased revenues to Enlitic.

The contract will generate initial shared revenues of up to US$100,000 per annum to Enlitic across the three-year agreement. ENDEX and ENCOG will initially be rolled out to an agreed number of clinical trial sites with scope for expansion.

Michael Sistenich, CEO of Enlitic, said "Our new distribution arrangement with Darwinist provides us with an opportunity to be deployed in advance of AI analysis, standardising data prior to it being routed to the AI models that Darwinist supports. This is a great example of AI orchestration with Enlitic standardisation. We look forward to deepening our partnership with Darwinist and solving some critical healthtech problems for their customers."

– ENDS –

This announcement was authorised for release by the Board of Enlitic, Inc.

About Darwinist

Darwinist delivers a streamlined, powerful solution for integrating AI diagnostics into clinical workflows. Through our middleware platform, Beagle, we simplify the deployment and management of diverse AI tools from multiple vendors, ensuring seamless integration without the complexity. Hospitals benefit from a curated ecosystem of top-tier AI models, backed by trusted partners like Red Hat and IBM, offering reliable, scalable solutions that address IT infrastructure challenges. Whether on-premises or in the cloud, Beagle provides the flexibility and confidence needed to bring cutting-edge AI innovation to healthcare systems of all sizes. Read more at darwinist.io.

About Enlitic

Enlitic is a software company that uses artificial intelligence to develop software products that manage medical imaging data in radiology (such as MRI, CT scans, X-ray and ultrasound images) and licences such products to healthcare providers. Enlitic's products (including its current product offering and product suite under development) seek to standardise, protect, integrate, and analyse data to create the foundation of a real-world evidence platform that can improve clinical workflows, increase efficiencies, and expand capacity.
