Quarterly Activities Report

Review of Operations

Indonesia

Alluvial Gold Project, Papua Province (WWI:50%)

West Wits Mining Limited ("West Wits" or "the Company") has yet to commence alluvial mining operations at its Derewo River Gold Project ("Derewo"), Papua Province, Indonesia. As previously announced PT Intan Angasa Aviation ("PTIA") was engaged with the objective of facilitating access at Derewo. The timeline originally agreed with PTIA has been extended and PTIA is confident it shall resolve the access issue imminently. As part of facilitating access PTIA has provided a fully operational helicopter and pilot to provide logistical support to the project pending reinstatement of the air strip to operational status.

The Company can report its employees are now on site at Derewo preparing for a commencement of an alluvial operation in the 81 creek. The mess base at Derewo was recommissioned last week and employees are now servicing the heavy machinery located at site. Some minor work will be undertaken on the airstrip and road as machinery is moved down to the initial alluvial site. In anticipation of the site being fully secured the Company has begun delivering supplies, fuel and provisions to the base at Derewo. Management are cautiously optimistic that commencement of operations at Derewo will soon be possible.

Under the agreement with our Indonesian subsidiary, PTIA is required to facilitate unimpeded access, mining and security for operations at Derewo. All costs incurred through the implementation process will be deferred until 30 days after commencement of mining and are then payable by the Company's local operating subsidiary (PTMQ).

On delivering the unimpeded ability for the Company, to enter, exit and safely control the entire alluvial mining area PTIA will receive a milestone payment. PTIA will be entitled to 50% economic interest in the alluvial project and a 20% shareholding in PTMQ on completion of the milestone. This does not dilute the Company's interest in the Derewo project.

The Company will providing further updates on developments at Derewo as they are achieved.

Exploration Project, Papua Province (WWI:80%)

Exploration plans continue to be held in abeyance pending commissioning of the alluvial circuit.

South Africa

Soweto Cluster underground rights, West Rand (WWI: 76%)

During the quarter West Wits received confirmation from the Department of Mineral Resources ("DMR") that its application for the renewal of its prospecting right has been approved for a further three years. After a long process the Company is again in control of developing the Prospecting Right for the DRD and Rand Leases area ("the Soweto Cluster").

The Company has made significant investment in the Soweto Cluster delineating a JORC resource of 287,000 ozs and now welcomes the opportunity to unlock value from that historical investment. Furthermore the technical team has identified a number of further prospective areas which it can now investigate. In conjunction with these investigations the Company will now seek to progress a number discussions, which had been placed on hold pending this decision, which relate to the development of the Soweto Cluster.

West Wits looks forward to providing further updates on both the technical investigations it plans to undertake as well as corporate discussions surrounding how the assets are managed going forward.

Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
