ASX RELEASE

25 November 2026

IMG OBTAINS TYPE 1A LICENCE, EXPANDING ADT'S GOVERNMENT AND DEFENCE OPPORTUNITY

Intelligent Monitoring Group Limited ("Intelligent Monitoring", "IMG" or "the Company") (ASX: IMB) is pleased to provide the following update:

IMG enters the Australian "high security" market

- Intelligent Monitoring Group Limited has obtained a Type 1A licence, enabling its subsidiary ADT Security Group Pty Ltd ("ADT Security Australia") to sell and install Type 1A security systems.
- The licence expands ADT's addressable market, positioning it to pursue government, Defence and high-security projects where Type 1A capability is required within a broader integrated security package.
- The licence and recruitment of key specialists represent a targeted investment in organic growth, building on IMG's established service network and monitoring infrastructure.
- ADT already monitors Type 1A systems. Adding sales, installation and service capability creates opportunities to deepen customer relationships and grow maintenance, monitoring and upgrade revenue.
- This investment completes ADT's Australian commercial security offering and complements the Group's full-service capability in New Zealand (following the acquisition of Red Wolf).
- Entry into "High Security" will support the continued growth of our commercial security services from the $2m revenue level pre-2023 to ~$100m in 2026. It will also help continue to grow the commercial pipeline, which stood at $82.7m in Q127, up 2.3x from $36.6m in Q126.

STRATEGIC RATIONALE

A Broader Market, With Long-Term Service Potential

Type 1A is a high-security alarm standard used to protect sensitive Australian Government facilities and assets, including Defence and intelligence environments. Type 1A system is endorsed by the Security Construction and Equipment Committee ("SCEC").

The licence expands ADT's addressable market to include broader electronic security work within facilities requiring Type 1A protection.

Where Type 1A is one requirement within a larger security tender, the capability positions ADT to compete for the wider scope, including access control, CCTV, intrusion detection, monitoring, and maintenance.

A typical Type 1A client requires sustained protection, specialist maintenance and periodic upgrades.

Combining these requirements with ADT's service reach and IMG's monitoring infrastructure supports the Group's strategy of building enduring customer relationships and a larger recurring revenue base.

Specialist Capability In A Market With High Barriers To Entry

Delivering Type 1A solutions requires approved equipment, manufacturer partner authorisation, appropriately trained and cleared personnel, and independent design and commissioning assurance.

These requirements take time and investment to establish. The licence and recruitment of specialist personnel strengthen ADT's position in this market, supported by the group's national service network and monitoring operations.

Managing Director's Comments

Managing Director Dennison Hambling commented:

"The investment in high security provision in Australia adds specialist capability to our existing national platform and will allow us to compete for a broader range of long-tailed work and recurring revenue, thus improving our overall business potential.

"Type 1A can be a relatively small component of a much larger security project, but it can determine whether a provider is able to compete for that work. Obtaining this licence strengthens ADT's ability to pursue the broader opportunity.

"We already have the service network, monitoring infrastructure, and customer reach. Adding experienced specialists and Type 1A capability gives us another avenue to grow that platform organically.

ASX RELEASE

"This investment strengthens our commercial offering today, which has gone from $2m in sales prior to 2023 to ~$100m as of June 30, 2026, and creates opportunities to build long-term government and Defence customer relationships."

IMG INVESTOR DAY

IMG will host its Investor Day on Thursday, 3 December 2026, from 9 am to 1 pm at The Fullerton Hotel, Sydney. Investors will hear from members of the leadership team on the Group's strategy, growth opportunities and outlook, including the expansion of ADT's high-security capabilities, with time for Q&A.

To register, visit intelligentmonitoringgroup.com/investor-day.
