New animation of the Hadrian X featuring Peter Maddison from Grand Designs Australia

Fastbrick Robotics Limited (ASX.FBR) ("FBR" or "Fastbrick Robotics") is pleased to announce that a new animation video of the Hadrian X is available for viewing on the Company's website, www.fbr.com.au.

The video features a dynamic simulation of the revolutionary Hadrian X commercial prototype, narrated by Peter Maddison, host of Grand Designs Australia and Director of Maddison Architects. The animation showcases how great Australian-led disruptive innovation, combined with imagination, is redefining how buildings are constructed with robotic technology.

The Hadrian X will be the world's first truck-mounted, fully automated end-to-end bricklaying machine, capable of delivering up to 1,000 standard brick equivalents per hour over a 30m boom from a single position on site.

About Fastbrick Robotics

Fastbrick Robotics is revolutionising the construction industry through robotic technology. Following the successful proof of concept achieved with the Hadrian 105 technology demonstrator, FBR is now building the Hadrian X commercial prototype, which will vastly improve the speed, accuracy and safety of global brick construction.
