

ASX ANNOUNCEMENT

7 July 2017

Carnegie unsuccessful in tender for South Australian BESS

Carnegie Clean Energy Limited (ASX: CCE) has today been notified by the South Australian government that its submission to provide a utility scale battery energy storage into the South Australia electricity network has been unsuccessful.

Carnegie's Managing Director, Dr Michael Ottaviano, commented:

"We are disappointed with the outcome. We felt we had a compelling and local proposition but we wish the South Australian government well for the future success of the project. Carnegie and its subsidiary, Energy Made Clean, are the most experienced Australian company in the deployment of large scale batteries, and we are currently pursuing a number of utility scale battery opportunities in this rapidly growing market.

"Regardless of this decision by the South Australian government, Carnegie will continue its aggressive expansion throughout Australia and internationally."

About Carnegie Clean Energy Limited

[Carnegie Clean Energy Limited](#) is an ASX-listed (ASX: CCE) solar energy, battery storage and wave energy, project developer with over 10,000 Australian shareholders. Carnegie is the 100% owner and developer of the CETO Wave Energy Technology intellectual property and is also 100% owner of leading Australian battery/solar microgrid Engineering Procurement and Construction (EPC) company Energy Made Clean (EMC). EMC specialises in the delivery of mixed renewable energy microgrid projects to islands and remote and fringe of grid communities. Carnegie is the only company in the world to offer a combination of wave, solar, wind, battery storage and desalination via microgrids which are ideally suited to islands, off grid communities and fringe of grid locations. Within Australia, Carnegie delivers its solar energy and battery storage projects via a joint venture between Energy Made Clean and multinational property and infrastructure company Lendlease (ASX: LLC).
