ASX ANNOUNCEMENT

VTEM Survey Commences over Braeside High Grade Zinc- Lead Project

9 August 2017

Rumble Resources Ltd (ASX: RTR) ("Rumble" or "the Company") is pleased to announce that a helicopter-borne electromagnetic geophysical ("VTEM") survey has commenced at the historic Braeside High Grade Zinc – Lead Project ("the Project"), located some 140km east of Marble Bar (East Pilbara region of Western Australia).

The VTEM survey is stage 2 of the first modern systematic exploration program to be conducted at the Project which is host to the Historic Ragged Hills small scale mine which produced lead, silver and zinc from 1901 to 1959.

VTEM is a proven exploration tool in discovering large scale base metal deposits and is consistent with Rumbles exploration strategy of using advanced exploration techniques and cutting-edge, modern technology.

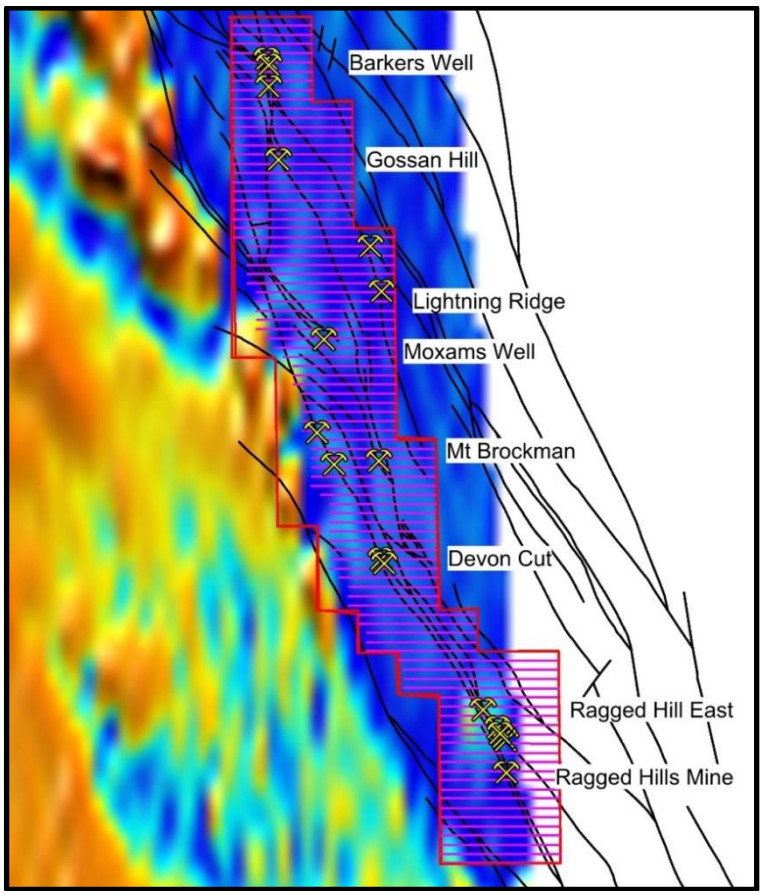

Image 1 – Proposed 400m line spacing VTEM Survey at E45/2032 (over image of previous Tempest AEM survey – 2 km line spacing).

The VTEM survey will cover an area of approximately 450 line kilometres at flight line spacings (perpendicular to stratigraphy) of 400 metres.

The VTEM survey is designed to locate conductors that are associated with mineralisation that may represent first order VMS drill targets.

Historic airborne Tempest AEM (image 1.) has given confidence that there are no, or very minor, lithological conductors such as graphitic shales along the known base metal mineralised system at the Project.

The program is anticipated to take one week to complete with the analysis of the results expected to be completed by the end of August 2017.

About Rumble Resources Ltd

Rumble Resources Ltd is an Australian based exploration company, officially admitted to the ASX on the 1st July 2011. Rumble was established with the aim of adding significant value to its current gold and base metal assets and will continue to look at mineral acquisition opportunities both in Australia and abroad.

Forward Looking and Cautionary Statement

The information in this report that relates to historic exploration results was collected from DMP reports submitted by government agencies and previous explorers. Rumble has not completed the historical data or the verification process**.** As sufficient work has not yet been done to verify the historical exploration results, investors are cautioned against placing undue reliance on them.
