Cobra Resources plc
("Cobra" or the "Company")

Launch of New Interactive Investor Hub

Platform provides shareholders with a more proactive way of communication and enquiry support

Cobra (LSE: COBR), an exploration company prioritising a strategy to lower the cost of critical rare earth production at its Boland Project in South Australia, is pleased to announce the launch of its interactive Investor Hub. Designed for existing and prospective shareholders, the new Investor Hub, accessed through the Company's website, brings all Cobra content into a single integrated platform to facilitate investor and stakeholder communications, including:

- Regulatory announcements
- Reports
- Presentations
- Educational material
- Interviews
- Corporate research

The Investor Hub also provides an interactive online experience enabling Cobra stakeholders to comment on and ask the Company questions via a portal which will be monitored and responded to in a timely manner.

How to sign up for the Cobra Investor Hub

1. Visit investors.cobraplc.com
2. Follow the prompts to sign up for an Investor Hub account
3. Complete your account profile

Rupert Verco, CEO of Cobra, commented:

"Maintaining open communication with our shareholders has always been a priority. Having seen the effectiveness of the Investor Hub for ASX companies in Australia, we regard it as an essential tool for

strengthening our engagement, allowing both current and prospective shareholders to connect with Cobra and better understand our projects and strategies.

The Investor Hub will feature a wide array of video content, information, and insights about our activities and future plans. We encourage our stakeholders to explore the Investor Hub and provide feedback as we continuously enhance our communication channels."

The person who arranged for the release of this announcement was Rupert Verco, Managing Director of the Company.

About Cobra

In 2023, Cobra discovered a rare earth deposit with the potential to re-define the cost of rare earth production. The highly scalable Boland Project in South Australia's Gawler Craton is Australia's only ionic rare earth project amenable for in situ recovery (ISR) mining - a low cost, low disturbance method. Cobra is focused on de-risking the investment value of the discovery by proving ISR as the preferred mining method which would eliminate challenges associated with processing clays and provide Cobra with the opportunity to define a low-cost pathway to production.

Cobra's Wudinna Project tenements also contain extensive orogenic gold mineralisation, including a 279,000 Oz gold JORC Mineral Resource Estimate, characterised by potentially open-pitable, high-grade gold intersections.
