16 March 2026

Harena Rare Earths Plc
("Harena" or the "Company")

Exercise of Options and Total Voting Rights

Harena Rare Earths Plc (LSE: HREE) (OTCQB: CRMNF), the rare earths company focused on the Ampasindava ionic clay rare earth project in Madagascar (the "**Ampasindava Project**"), announces that it has received notice of exercise of options in respect of 500,000 new ordinary shares of 0.5 pence each with an exercise price of 3 pence each, raising a total of £15,000.

Admission and Total Voting Rights

Application has been made for the new ordinary shares to be admitted to trading on the main market of the London Stock Exchange ("**Admission**") and Admission is expected to take place at 8.00 a.m. on or around 17 March 2026.

The new ordinary shares will rank pari passu in all respects with the Company's existing ordinary shares.

Following Admission, the Company will have 684,060,108 ordinary shares of 0.5 pence each in issue, each with one voting right. There are no shares held in treasury. Therefore, the Company's total number of ordinary shares in issue and voting rights will be 684,060,108 and this figure may be used by shareholders from Admission as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the Company under the FCA's Disclosure Guidance and Transparency Rules.

Notes to editors

Harena (www.harenaresources.com) is a rare earths exploration and development company focused on the Ampasindava Ionic Clay Rare Earth Project in Madagascar (Harena's interest is 100%). The project hosts one of the largest ionic clay rare earth deposits outside of China, with significant concentrations of high-value magnet metals, specifically heavy rare earths, including neodymium (Nd), dysprosium (Dy), and praseodymium (Pr), which are critical for the composition of neodymium magnets (NdFeB). Harena is committed to low-impact, high recovery mining, providing a sustainable supply of critical minerals for the global energy transition and military defence industries as well as meeting the ever-growing demand for NdFeB from the robotics sector.
