Fulcrum Metals plc

("Fulcrum" or the "Company" or the "Group")

Appointment of Non-Executive Director

Fulcrum Metals plc (AIM: FMET), a company pioneering the use of innovative cyanide-free technologies to recover precious and critical metals from mine waste and support site remediation, is pleased to announce the appointment of Ms. Natasha Dixon as an independent Non-Executive Director with immediate effect.

Ms. Dixon brings significant capital markets experience, with a strong track record in supporting the listing, financing and growth of both public and private companies, predominantly in Canada. Over the course of her career, she has developed an extensive and well-established network across the business and financial communities.

Natasha was a member of the start-up and launch team at the Canadian Securities Exchange, where she held a number of senior roles. She subsequently worked with several resource companies, playing a key role in raising capital and broadening their investor base.

She previously served as Chair of 5SD Capital, a private company that built a successful mineral exploration portfolio which was ultimately acquired by Pelangio Exploration Inc. Following the transaction, Natasha joined Pelangio as Director of External Relations, while also providing corporate advisory services to a range of private and public companies across the fintech, consumer goods and natural resource sectors.

In 2021, Natasha co-founded Mink Ventures Corporation, leading the company through its successful Capital Pool Company (CPC) listing and subsequent graduation to the TSX Venture Exchange in January 2023. She continues to serve as President, Chief Executive Officer and a Director.

Natasha also served as a director of Vanstar Mining Resources Inc. through its C$45 million acquisition by IAMGOLD Corporation in February 2024.

She holds a B.A. with High Honours in Environmental Studies from Carleton University.

Ryan Mee, Chief Executive Officer of Fulcrum, commented:

"I would like to welcome Natasha to the board of Fulcrum as a Non-Executive Director. She brings a wealth of experience across Canadian capital markets, exchanges, M&A and the natural resources sector, along with a strong track record of supporting companies through growth and value creation.

"I look forward to working with her as Fulcrum continues to execute on its strategy"

Natasha Dixon, newly appointed Non-Executive Director of Fulcrum, commented:

"I'm delighted to join the team at Fulcrum and to be part of this exciting opportunity. The Company's use of innovative, clean, cyanide-free technology for mine waste processing and remediation is incredible and has the potential to unlock significant value from legacy assets, while delivering meaningful environmental benefits.

"I look forward to contributing to Fulcrum's next phase of growth and creating value for all stakeholders."

Regulatory Disclosures
The following information is disclosed pursuant to Schedule Two paragraph (g) of the AIM Rules for Companies:

Ms. Natasha Stephanie Dixon (former married name of Blackburn), aged 52, holds or has previously held the following directorships:

Current directorships and/or partnerships	**Former directorships and/or partnerships (within the last five years)**

Notes to Editors

About Fulcrum Metals PLC

Fulcrum Metals PLC (AIM: FMET) is an AIM listed technology led natural resources company focused on recovery of precious metals from mine tailings (previously milled and processed ore) in Canada using environmentally friendly leaching technology developed by Extrakt Process Solutions LLC and its associates (together "Extrakt"). The Company's current projects are the tailing sites of the former Teck-Hughes and Sylvanite gold mines, located in the Kirkland Lake region of Ontario. In addition, the Company has interests in a portfolio of highly prospective mineral exploration and development projects in both Ontario and Saskatchewan Canada.

Fulcrum has an agreement for exclusivity rights in respect of any licensed use of Extrakt's proven cyanide free technology on legacy gold mine waste sites over the mining districts of Timmins and Kirkland Lake. These are two of Canada's biggest gold camps with a historical production above 110Moz over the past 100 years, leaving more than 70 documented legacy mine waste sites.

Fulcrum is now focused on the development of its Teck-Hughes and Sylvanite projects towards production using Extrakt's technology and positioned to scale the concept across two of Canada's historically most productive gold regions. Fulcrum believes this represents a substantial, long-term opportunity to unlock significant and largely untapped value from legacy mine waste.
