ASX Announcement

The Company Announcement Officer ASX Ltd *via electronic lodgement* 10th October 2019

WEST ERREGULLA-2 UPDATE

Highlights

- **Flow test package mobilised to West Erregulla-2 well site**
- **Production test of Kingia sandstone formation to follow**

Since completion of West Erregulla-2 and installation of the Christmas tree, Easternwell Rig 106 has been demobilised from location. The flow test package has now commenced mobilisation to site in preparation for the production testing of the Kingia formation.

Forward Plan

Once all equipment has arrived at site and been rigged up, a multi-stage production flow test will occur in order to gather the required formation pressure and performance data that will indicate gas column height and field boundary. The flow test will also give an indication of a sustained production flow rate that in this instance may indeed be constrained by the tubing diameter of the West Erregulla 2 production completion.

Further gas sampling and compositional analysis will also be undertaken to support the project development process for commercialisation of this significant resource.

Strike Energy Limited (**Strike** - ASX: STX) is the operator and the holder of a 50% joint venture interest in EP469, and Warrego Energy (ASX: WGO) the holder of the other 50% joint venture interest.
