Company Update and Impact of COVID-19

West Wits Mining Limited (ASX: WWI) ("West Wits" or "the Company") provides the following update on the Company's actions in relation to COVID-19 and the South African Government declaration of a 21-day lock down, commencing midnight on Thursday 26th March.

The Company has continued to make progress on the mining right application and is increasingly confident it is nearing a successful outcome of that process. The proposed shut down in South Africa will have minimal direct impact on our people and consultants who are all able to work from home. However, it may affect our capacity to engage with government officials who in most cases, from Thursday this week, are required to stay at home. Whilst we will continue to monitor the situation some delays may now be expected over the 21-day period from Thursday's shut down.

In the interim, West Wits and its advisors will be continuing to work on the feasibility studies and plans for reopening the mine following grant of the mining right. Furthermore, the team is working with Australian geologists to progress exploration on the Mt Cecelia project which borders the East Pilbara and Paterson Province regions in Western Australia. The current desktop work focused on target generation, is due to be completed in April and will be subject to a further Company announcement.

Approved for release by the Company's Chairman (Michael Quinert),

Michael Quinert
