Linius to present at Virtual Conference

Melbourne, Australia – 10 March, 2021: Linius Technologies Limited (ASX: LNU) – the only cloud-based solution that transforms static video into hyper-personalized video experiences with its world-first Video Virtualization Engine™ (VVE) – is pleased to provide an opportunity for Shareholders and Investors to view a virtual presentation by the Linius team, to be held at 11:30am (AEST) on Wednesday 17 March, 2021.

The Linius team would like to provide Investors with a commercial update which includes details of:

A briefing by Steve O'Meara, CEO of Swanbay, and other key team members who will provide information on:

- Swanbay's investment in developing their sports product on Linius' platform.
- The deployment into their first English Premier League Club, Wolverhampton Wanderers, and the very encouraging early results.
- Their new partnership with IMG, a global leader in sports content and event management in over 30 countries.
- An overview of Swanbay's vision and go-to-market plans.

Swanbay Limited is an international media and technology company which provides web and mobile services for Content Owners, Advertisers and Mobile Operators across the world. Their success marks a key milestone for Linius Technologies, where a partner has developed their own solution on the Linius Video Services (LVS) platform and successfully commercialised it.

Further updates will include:

- The commercialisation of Whizzard and demonstration of new features.
- An update on the roll out of Linius' technology to sports broadcasters around the world, including the National Basketball League (NBL).

About Linius Technologies Limited:
Linius is a global software-as-a-service company headquartered in Australia, with operations in London, New York and Europe. Linius has invented and patented the Video Virtualization Engine™ (VVE), which indexes, analyzes and tags each frame in a conventional video file and transforms it into a fully searchable Virtualized Video.

Linius' technology exposes the data that makes up the video file, making cumbersome video as flexible as all other forms of data. Accessing the data within the video file is the missing link for video cloud service providers, creating unparalleled value across the internet video industry. Linius' VVE powered hyper-personalization and search solution enables anyone to instantly search the data within video, from across an infinite number of sources, and automatically assemble the results in a single stream on-the-fly. No human hands required.
