ASX ANNOUNCEMENT
SENETAS CORPORATION LIMITED: MARKET UPDATE

Senetas partners with UXC to deliver Australian data security solutions

April, 22, 2014

Senetas Corporation Limited (ASX: SEN) announced today its partnership with UXC Limited as part of a strategic initiative to provide Australian government agencies, defence and large corporations with tailored data security solutions and services.

The partnership brings together Senetas' certified, high-speed, defence-grade encryptors with UXC's end-to-end ICT offering of advisory, consulting, and network infrastructure services and support.

Senetas specialises in protecting data transmitted across high-speed networks whilst retaining maximum network performance. Senetas products are the world's only triple-certified encryptors of their type - Common Criteria (Australia and international), FIPS (US) and CAPS (UK) certification - for government and defence use and protect much of the world's most sensitive data.

Senetas CEO, Andrew Wilson, said, "With the number of data network breaches on the rise, we're encouraging both the business and government sectors to understand that the true cost of data breaches extends beyond regulatory penalties, and often includes financial losses, the damage to reputation and trust, and loss of intellectual property. Businesses must be proactive in protecting their customers' data and aware that they will be held accountable when that data is compromised."

Cris Nicolli, managing director, UXC, said, "It is often assumed that data networks are inherently safe, but as the list of organisations affected by cyber-attacks continues to grow, it is clear that no company is immune. Data networks are vulnerable to security breaches. To be protected from a data network breach, cyber-attack or innocent routing error; organisations need strong encryption products.

"We expect that our ability to offer an Australian developed and manufactured security solution will be a strong selling point for government and defence agencies as well as corporates across Australia. Our partnership with Senetas will complement and extend UXC's position as a trusted services provider to our customers," said Cris Nicolli.

"Maximising our local R&D is helping us meet the rapidly growing needs of new customers around the world and making encryption more cost effective and easier to implement than ever before. Our partnership with UXC will help provide businesses with a data security solution that will drive results in a secure, sophisticated environment," added Andrew Wilson.

ABOUT SENETAS CORPORATION LIMITED

Senetas is an Australian public listed company (ASX: SEN), specialising in certified, high-speed data encryption - protecting network transmitted data whilst retaining maximum network performance.

Senetas certified encryptors are the world's only triple-certified products of their type - Common Criteria (Australia and international), FIPS (US) and CAPS (UK) certification - for government and defence use and protect much of the world's most sensitive data.

ASX ANNOUNCEMENT
SENETAS CORPORATION LIMITED: MARKET UPDATE

Senetas partners with UXC to deliver Australian data security solutions

Senetas secures: government information and secrets; defence and military information; commercially sensitive intellectual property, business and financial data; banking transactions; data centre traffic; high volume CCTV networks; and critical industrial and infrastructure control systems.

Senetas uniquely designs, develops and manufactures in Australia. Senetas encryptors have market-leading performance characteristics and are trusted to protect data in motion in more than 20 countries.

These customers include highly sensitive organisations such as the US defence forces and Swiss banks.
