About Invion
Invion is a life-science company that is leading the global research and development of PhotosoftTM technology for the treatment of a range of cancers. Invion holds the Australia and New Zealand license rights to the PhotosoftTM technology. Research and clinical trials are funded by the technology licensor, RMW Cho Group Limited, via an R&D services agreement with the Company. Invion is listed on ASX (ASX:IVX). This announcement was approved for release by the Board of Invion Limited. For further information please contact investor@inviongroup.com.

About Photodynamic Therapy (PDT)
Invion is developing Photosoft™ technology as an improved next generation Photodynamic Therapy. PDT uses non-toxic photosensitisers and visible light in combination with oxygen to produce cytotoxic-reactive oxygen that kills malignant cells, shuts down tumours and stimulates the immune system. A potential alternative to surgery, and in contrast to radiotherapy and chemotherapy which are mostly immunosuppressive, PDT causes acute inflammation, expression of heat-shock proteins, and invasion and infiltration of a tumour by leukocytes.
