ASX Announcement

Released 11 April 2023

Field Exploration Commences at Tidili Copper-Gold Project, Morocco

BM8 engages industry expert to commence field works at prospective copper-gold project.

Battery Age Minerals Ltd (ASX: **BM8**; "**Battery Age**" or "**the Company**") is pleased to advise that it has commenced its maiden field work programme at the highly prospective Tidili Copper-Gold Project in Morocco.

The maiden field work programme has been designed to verify historical works and to undertake further mapping and sampling, laying the foundations for the development of a more expansive exploration campaign which will be executed later in the year.

Battery Age has engaged experienced consultant geologist Dr Simon Dorling of Rock Domain Consulting to progress the exploration and evaluation of the Tidili Project.

Dr Dorling has extensive experience in exploration, development and mining spanning base metals, precious metals, energy minerals and industrial minerals, having previously served as Principal Geologist at CSA Global.

Dr Dorling brings specialist technical knowledge to the project and will work with the Battery Age team to execute exploration programs at the Tidili Project. These will be completed in conjunction with General Manager – Exploration Nigel Broomham.

Battery Age CEO, Gerard O' Donovan, commented:

"We are very pleased to be kicking off our maiden field work campaign at the Tidili Copper-Gold Project, in a region we see very favourable for the development of mineral projects. Together with the significant progress the team has been making at our Falcon Lake Lithium Project in Canada, we are now also progressing a project that sits within the energy transition thematic. This initial phase of field exploration will provide the information required so that we can progress our systematic plan to unlock the value of this asset."

"We are also extremely pleased to have Simon on board. Simon is a highly regarded industry expert, and we are delighted to have secured his services to help plan and execute our exploration programs at Tidili."

Tidili Copper-Gold Project (Morocco, 85% interest)

The Tidili Project is located approximately 80km south-east of Marrakesh in Morocco and represents a greenfields copper exploration opportunity. Previous exploration work has included mapping and sampling, with geochemical analysis of the samples showing polymetallic mineralisation marked by high levels of base metals (copper and lead) and gold.
