JINDALEE
Resources Limited

Corporate Presentation

September 2023

Disclaimer

This Presentation has been prepared by Jindalee Resources Limited ("Jindalee", "Company" or "JRL") and is authorised for release by its Executive Director, Mr Lindsay Dudfield. Certain information in this presentation has been derived from third parties and though Jindalee has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by Jindalee. Except to the extent required by law, Jindalee makes no representations or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any errors or omissions which may become apparent after this presentation is released.

This presentation is for information purposes only. It is not a prospectus, product disclosure statement or other disclosure document under Australian law or any other law (and will not be lodged with the Australian Securities and Investments Commission or any foreign regulator) and is not, and does not constitute, an invitation or offer of securities for subscription, purchase or sale in any jurisdiction. In particular, this presentation does not constitute an invitation or offer of securities for subscription, purchase or sale in the United States or any other jurisdiction in which such an offer would be illegal. The securities referred to in this presentation have not been and will not be registered under the U.S. Securities Act of 1993 as amended or the securities laws of any state or other jurisdiction of the United States and may not be offered or sole, directly or indirectly in the United States.

This presentation may contain certain forward-looking statements. Forward-looking statements include but are not limited to statements concerning Jindalee's current expectations, estimates and projections about the industry in which Jindalee operates, and beliefs and assumptions regarding Jindalee's future performance. When used in this document, the words such as "anticipate", "could", "plan", "estimate", "expects", "seeks", "intends", "may", "potential", "should", and similar expressions are forward-looking statements. Although Jindalee believes that its expectations reflected in these forward-looking statements are reasonable, such statements are subject to known and unknown risks, uncertainties and other factors, some of which are beyond the control of Jindalee and no assurance can be given that actual results will be consistent with these forward-looking statements.

Such factors may include, among others, risks related to results of current or planned exploration activities, changes in market conditions, obtaining appropriate approvals to undertake exploration activities in the portfolio of projects, changes in exploration programs and budgets based upon the results of exploration, future prices of minerals resources; grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining government approvals or financing or in the completion of development or construction activities; movements in the share price of investments and the timing and proceeds realised on future disposals of investments, force majeure events, as well as those factors detailed from time to time in the Company's interim and annual financial statements and reports, all over which are available for review on ASX at asx.com.au and OTC Markets at otcmarkets.com.

Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.To the extent permitted by law, Jindalee and its officers, employees, related bodies corporate and agents disclaim all liability, direct, indirect or consequential (and whether or not arising out of the negligence, default, or lack of care of Jindalee and/or any of its agents) for any loss or damage suffered by a recipient or other persons out of, or in connection with, any use or reliance on this presentation or information. This presentation does not constitute investment advice and has been prepared without taking into account any investor's particular investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentations are not intended to represent recommendations of particular investments to particular persons. You should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments.

All amounts are in A$ unless stated otherwise.

Introduction to Jindalee

JINDALEE Resources Limited

Pure play US lithium company focused on progressing the globally significant, Tier 1 McDermitt lithium deposit

Largest lithium deposit in the US: Significant Indicated + Inferred Mineral Resource (21.5Mt LCE) approximately 35km from Lithium Americas' Thacker Pass Project (19.1Mt LCE)

Exploration upside: total contained LCE increased 62% following 2022 drill program with potential to increase size of Mineral Resource further – drilling to commence in October 2023

Highly encouraging recent metallurgical results: encouraging results from beneficiation and acid leaching (~97%), ongoing testwork being managed by Fluor

Amenable to a low cost, bulk mining operation: Large scale allows flexibility in development and mine plan

Strong Government support for sector: tailwinds from the Inflation Reduction Act; US Department of Energy (**DOE**) expected to provide loan for up to 75% of Thacker Pass capital costs for construction of Phase 1

Strong OEM and industry support for North American lithium supply: General Motors to invest US$650m in Lithium Americas and have entered a binding offtake for Thacker Pass

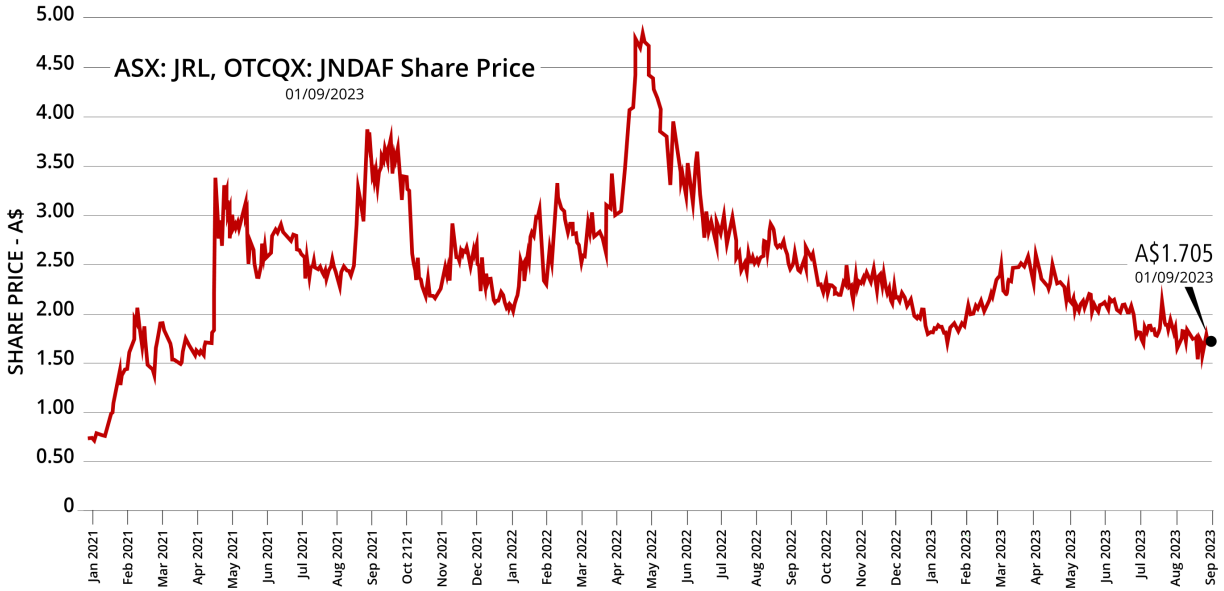

PFS due June Q 2024: McDermitt PFS commenced June 2023 (managed by Fluor)

Company Overview

JINDALEE Resources Limited

Corporate Snapshot

Share Capital (ASX:JRL, OTCQX:JNDAF)	57.4m
Share Price [1]	$1.71
Unlisted Options (from 40c to $5.00)	5.4m
Market Capitalisation [1]	$97.8m
Cash [2]	$2.3m
Investments [3]	$6.0m
Debt	Nil
Enterprise Value	$89.5m

1. Share price as at 01/09/2023
2. Cash on hand as at 30/06/2023
3. Share investments as at 30/06/2023 - DYM:ASX, EME:ASX

Major Shareholders

L G Dudfield	25.7%
Kale Capital Corporation Pty Ltd	7.2%
Perennial Value Management	5.5%
Elmix Pty Ltd	3.6%
Kevrex Pty Ltd	3.5%

Directors & Management

Justin Mannolini
Non Executive Chairman

- Justin has been a Non-Executive Director since 2013
- Justin is a partner in the Corporate Advisory Group of Australian law firm Gilbert + Tobin, and was previously an Executive Director with Macquarie Capital
- Justin has more than 20 years' experience in corporate finance as a lawyer and investment banker and has a combined degree in Commerce and Law (with Honours)

Paul Brown
Non Executive Director

- Paul has over 23 years' experience in the mining industry, most recently with Mineral Resources (ASX: MIN) where he was Chief Executive – Lithium, and Chief Executive - Commodities
- Paul has held senior operating roles with Leighton, HWE and FMG and has a strong track record in technical leadership, project/studies management and mine planning and management
- Paul has a Masters in Mine Engineering M.Eng (MI)

Lindsay Dudfield
Executive Director & CEO

- Lindsay is a geologist with over 40 years' experience in multi-commodity exploration, including senior roles with the mineral divisions of Amoco and Exxon
- Previous founding Director of Dalrymple Resources
- Founded Jindalee and has managed the Company since inception
- Member of the AusIMM and AIG

Brett Marsh
VP Exploration USA

- Brett is a geologist with over 25 years' experience in mineral exploration and mining in the Americas, including senior roles with Luna Gold, Newmont, Freeport-McMoRan, Phelps Dodge and Asarco
- Qualifications include a Master of Science (Geology) and an MBA
- Brett is a Certified Professional Geologist (CPG) and a member of the Society for Mining, Metallurgy & Exploration (SME)

Darren Wates
Non Executive Director

- Darren has over 23 years' experience in equity markets, M&A and project acquisitions/divestments
- Darren is the founder and principal of Corpex Legal, a practice providing corporate, legal and commercial services to ASX listed companies, including Neometals (ASX:NMT) since 2016 (previously NMTs' legal counsel)
- Darren has degrees in Law and Commerce

Carly Terzanidis
Joint Company Secretary

- Carly has 20 years' experience in the financial services industry, including roles with stockbroking and investment firms, with a focus on Corporate Finance and company secretarial support
- Carly is a Chartered Secretary, an Associate of the Governance Institute of Australia and holds a Bachelor of Commerce with majors in Accounting and Corporate & Resources Administration

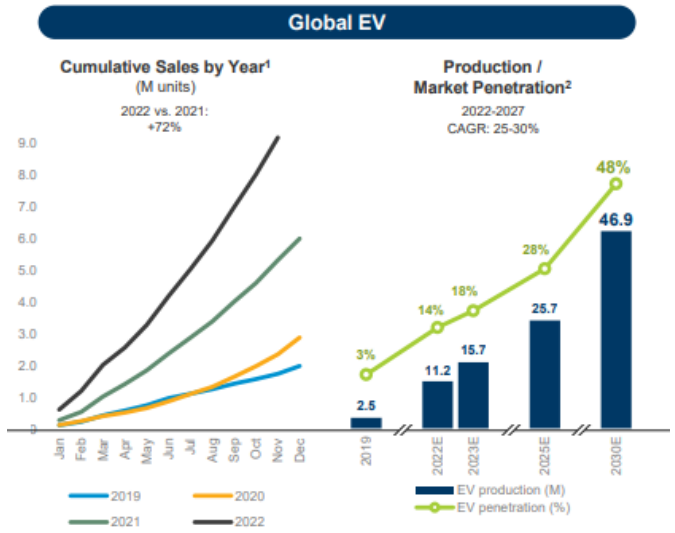

Lithium Supply – Demand and the US

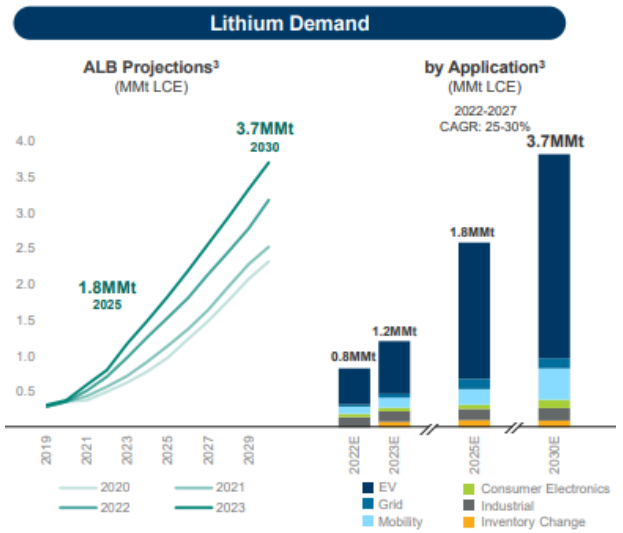

JINDALEE
Resources Limited

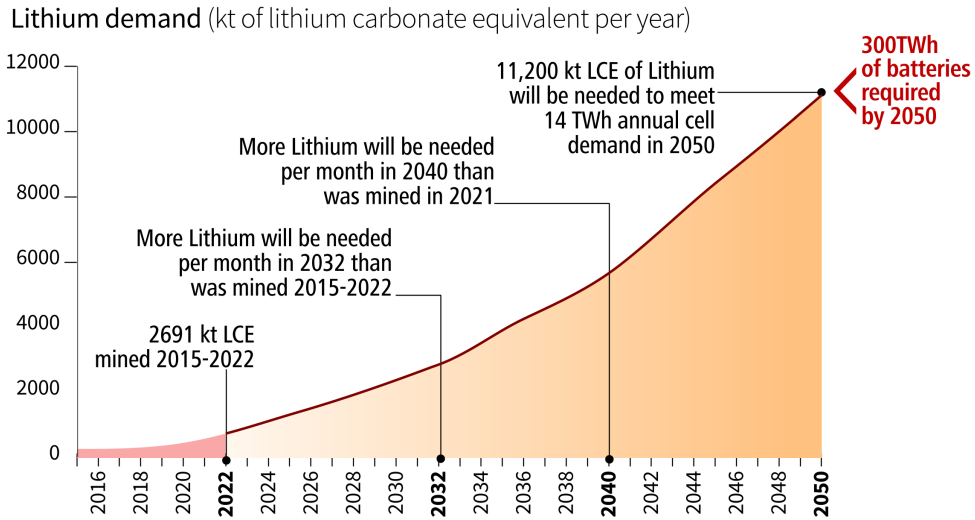

Global Lithium Demand is Accelerating

Forecast demand dominated by automotive industry – placing sustained pressure on lithium price

Source: Albemarle (01/23)

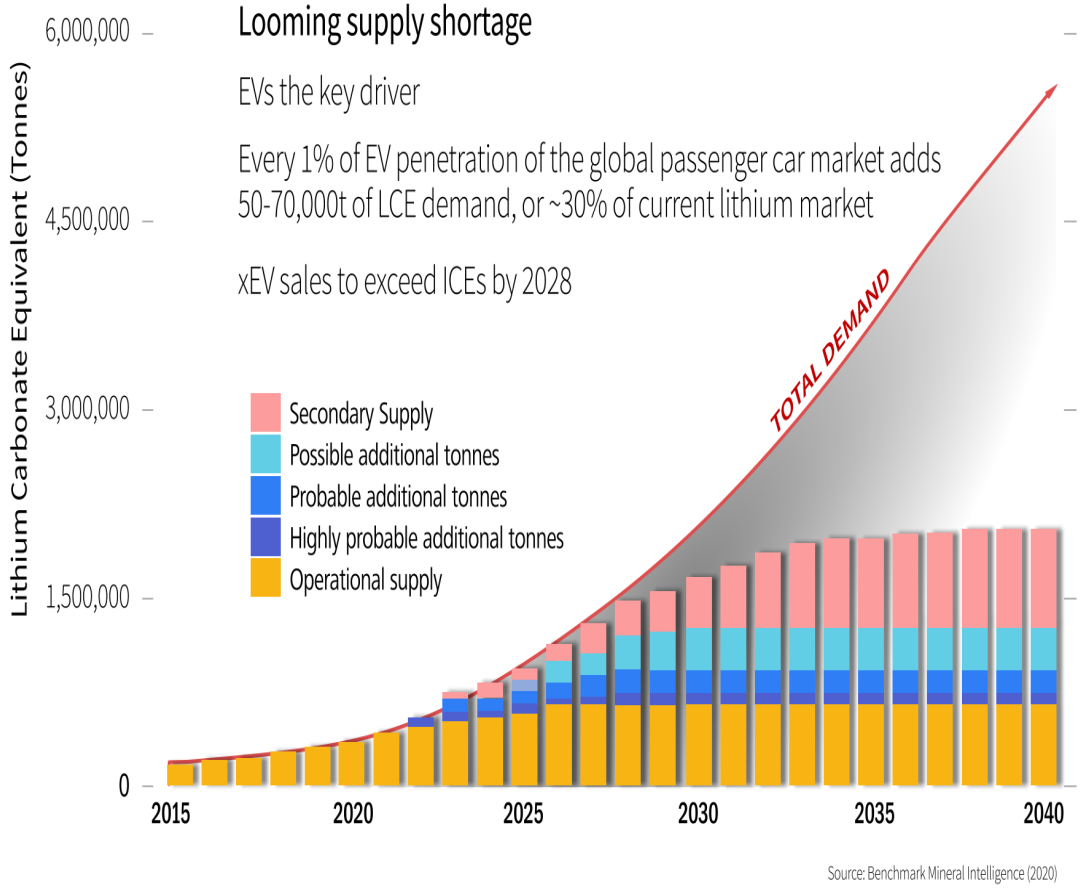

Source: Benchmark Mineral Intelligence

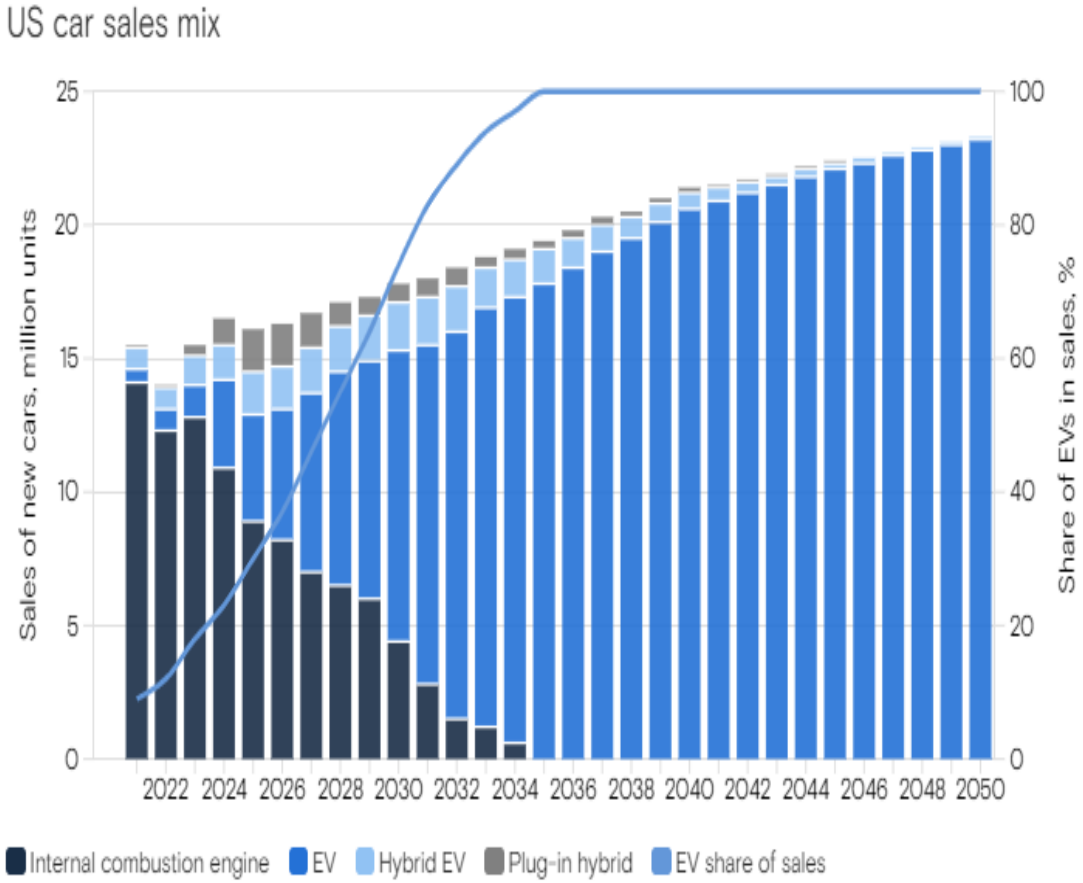

- Leading lithium producer Albemarle (NYSE: ALB) expects lithium demand to increase 5x by 2030 to 3.7Mt LCE pa, due to strong EV demand & Inflation Reduction Act (IRA)
- Benchmark Mineral Intelligence forecasts 11.2Mt LCE pa needed by 2050 (2022 production ~0.75Mt LCE)

Significant Supply Shortage Looming

Looming supply shortage as electric vehicles aggressively drive the need for lithium.

Source: Benchmark Mineral Intelligence (2020)

Source: Goldman Sachs (04/23), US Bureau of Transportation

A Lot More Lithium Production Is Required

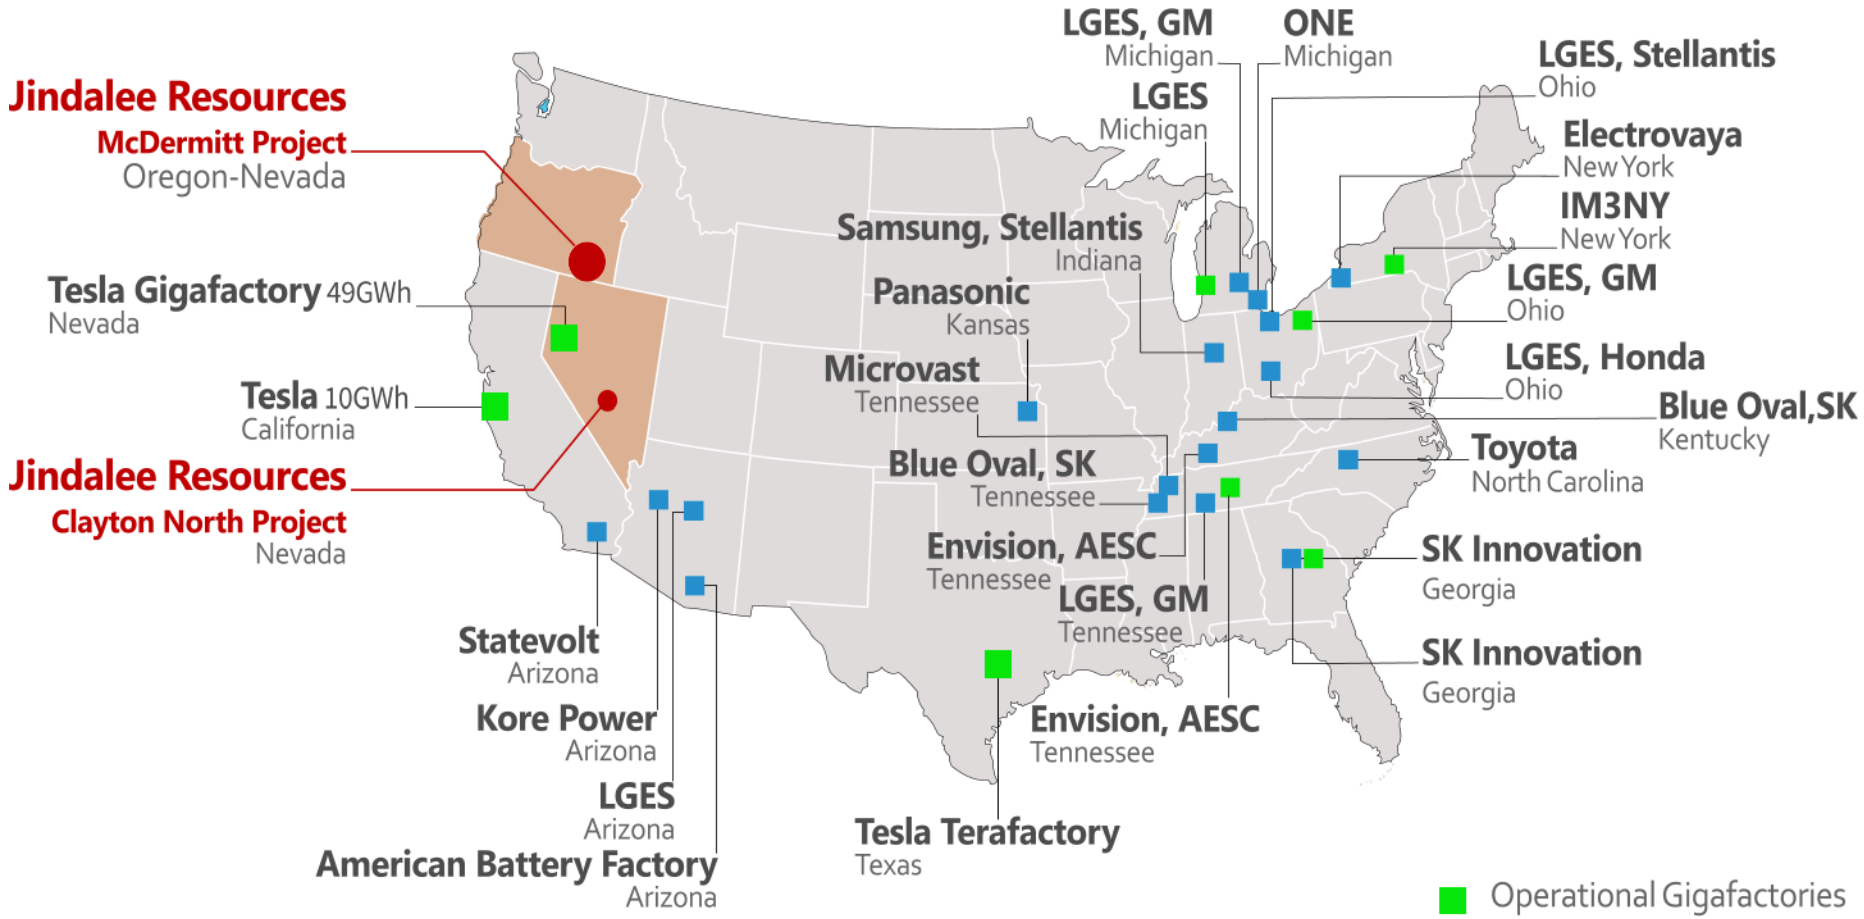

Many more lithium mines and plants are required to meet expected demand requirements by 2035

The McDermitt Lithium Project is one of many lithium operations which will fill the breach

Source: Benchmark Mineral Intelligence

USA Battery Production Operating and Announced

Gigafactory Demand	Forecast LCE Demand
2021(a) 57GWh 4 gigafactories 2026 - 393GWh 21 gigafactories 2031 - 703GWh 21 gigafactories	~337kta of LCE ~602kta of LCE

Source: Benchmark Mineral Intelligence Report – Gigafactory Assessment, January 2022

Strong Bipartisan Support for US Critical Mineral Projects

JINDALEE Resources Limited

Both sides of US politics expressing concern with the current dependence of the US on foreign sources of critical minerals (including lithium)

In March 2022, Senator Wyden (Democrat, Oregon) introduced legislation to support processing and production of critical minerals to increase and expand domestic manufacturing and ease reliance on foreign sources of oil and gas[1]

In March 2022 Defense Production Act invoked to accelerate domestic production of battery materials, including lithium[2]

In June 2022 President Biden announced $7.5B to build 500,000 EV chargers across the US and $7B for critical minerals supply chains, key pieces of the Bipartisan Infrastructure Law[3]

In May 2023 the Dept of the Interior released a Solicitor's Opinion supporting "the timely review of mining proposals on federal lands", noting the federal government is working on recommendations to update "existing mining laws, regulations and permitting processes."[4]

"We can buy electric car batteries from Asia, or we can make them in America"

– Jennifer Granholm (US Secretary of Energy)

Inflation Reduction Act - US Critical Mineral Projects

On 16 August 2022 the Inflation Reduction Act (confirming $369B in funding to reduce carbon emissions by 40% by 2030) became law:[1]

- from 2023 40% of EV's battery materials must be sourced from the US (or FTA partners) to qualify for the EV tax credit (rising to 80% by 2027)
- under the Advanced Production Credit miners producing critical minerals will be eligible for tax credits equivalent to 10% of production costs
- $40B is available to the DOE's Innovative Technology Loan Guarantee to support projects that bolster a domestic supply of critical minerals

On 13 January 2023 the DOE announced a $700M conditional loan to the Rhyolite Ridge Project (3.4Mt LCE[2]) to finance on-site processing of lithium carbonate[3]

On 22 February 2023 Lithium Americas announced receipt of a Letter of Substantial Completion for a loan from the DOE with funding expected to provide up to 75% of Thacker Pass Project capex[4]

US Department of Energy Support for ASX-listed companies

The US Department of Energy (DOE) has recently supported a number of ASX-listed companies developing battery materials projects in the US, including:

	Project	DOE grants / loans
SYRAH RESOURCES	Syrah is building an 11.25ktpa active anode material facility at Vidalia in the US (**Vidalia**)	• US$102m loan for Vidalia initial expansion[1] • Progressing several funding alternatives to fund a significant proportion of the Vidalia Further Expansion project including US$220m DOE grant and further DOE loan[1]
PIEDMONT LITHIUM	Planned lithium hydroxide production facility in Tennessee	• Selected for $142M DOE grant under Bipartisan Infrastructure Law (subject to finalisation of terms and conditions)[2]
NOVONIX	NOVONIX Anode Materials division, located in the US, manufactures synthetic graphite anode materials used to make lithium-ion batteries	• Selected to enter negotiations to receive US$150 million in grant to expand its domestic production of high-performance, synthetic graphite anode materials[3]

McDermitt Lithium Project

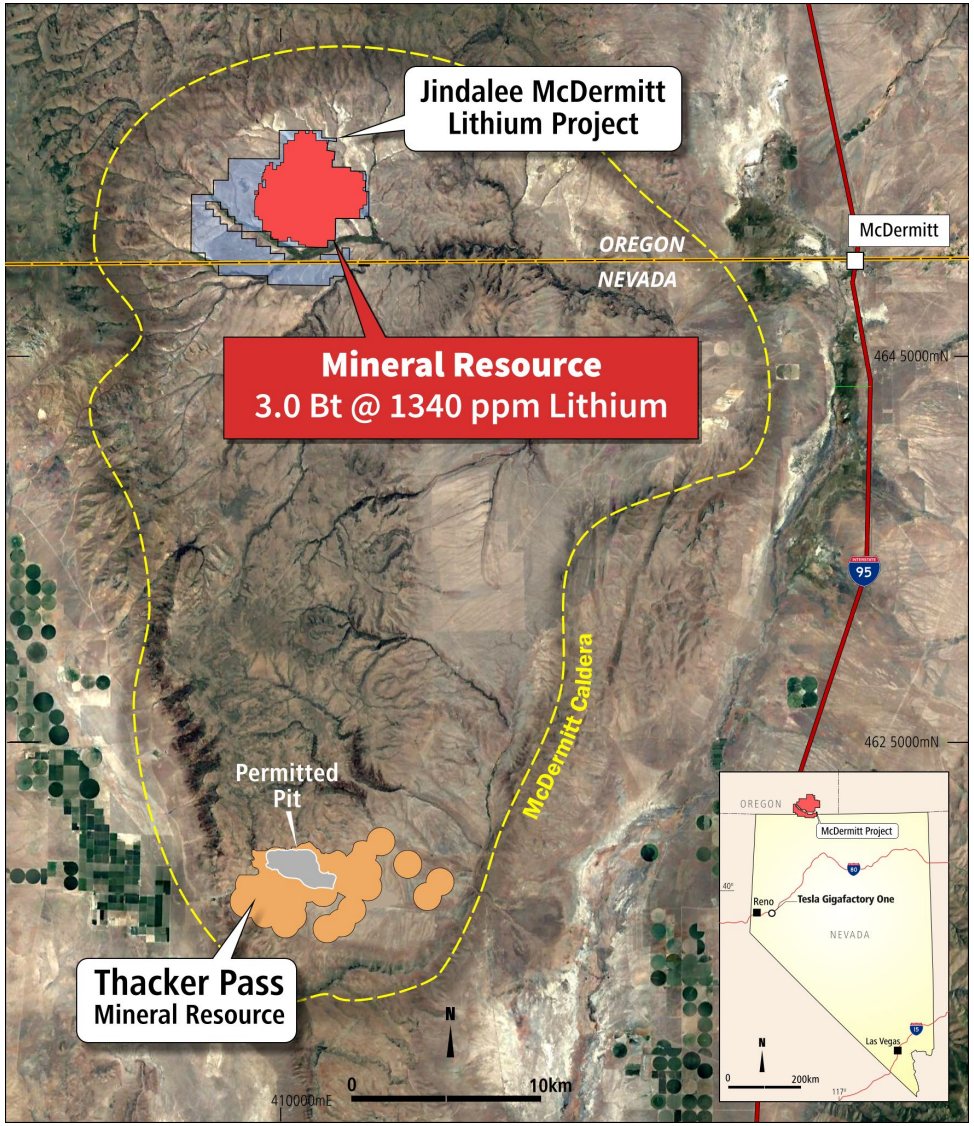

JINDALEE
Resources Limited

McDermitt Overview

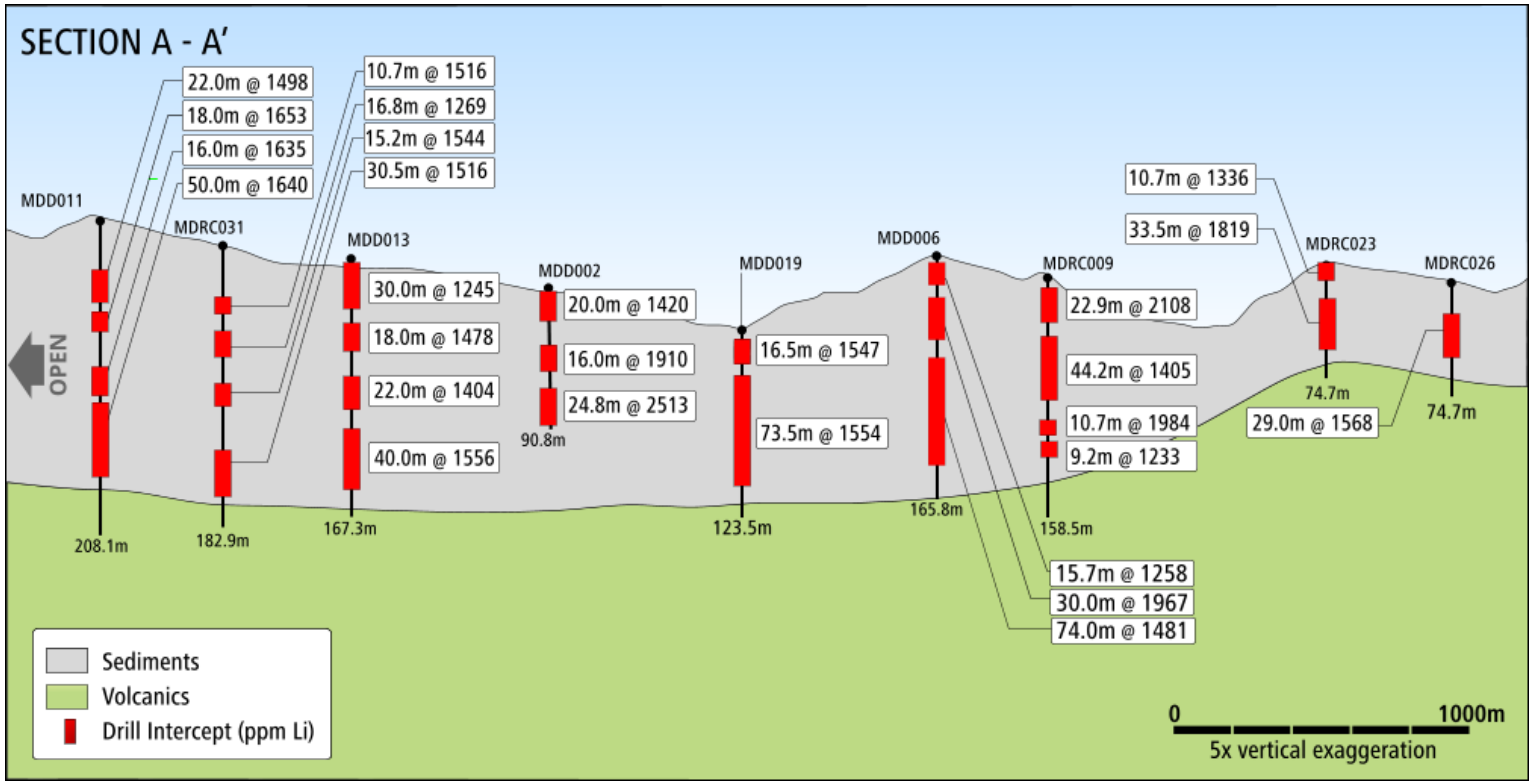

Ownership	• 100% owned by Jindalee
Location	• The Project is located in Malheur County located on the Oregon-Nevada border, ~35km west of the town of McDermitt at the northern end of the McDermitt volcanic caldera • ~35km from Lithium Americas' Thacker Pass Project (19.1Mt LCE) which is under construction
History	• JRL completed an initial 4 hole drilling program in Sept 2018, intersecting broad widths of sediment host lithium mineralisation • A total of 62 holes (33 RC & 29 Diamond) have now been drilled at McDermitt, with the Mineral Resource increasing after each drilling program • In Feb 2023 JRL announced an updated Indicated and Inferred Mineral Resource for McDermitt
Tenure & Resource	• McDermitt is the largest lithium deposit in the US (by contained Li) • Indicated + Inferred Mineral Resource: **3.0 Bt @ 1,340ppm Li (1,000ppm Li cut-off) for 21.5 MT LCE** • 54.6km² claims area

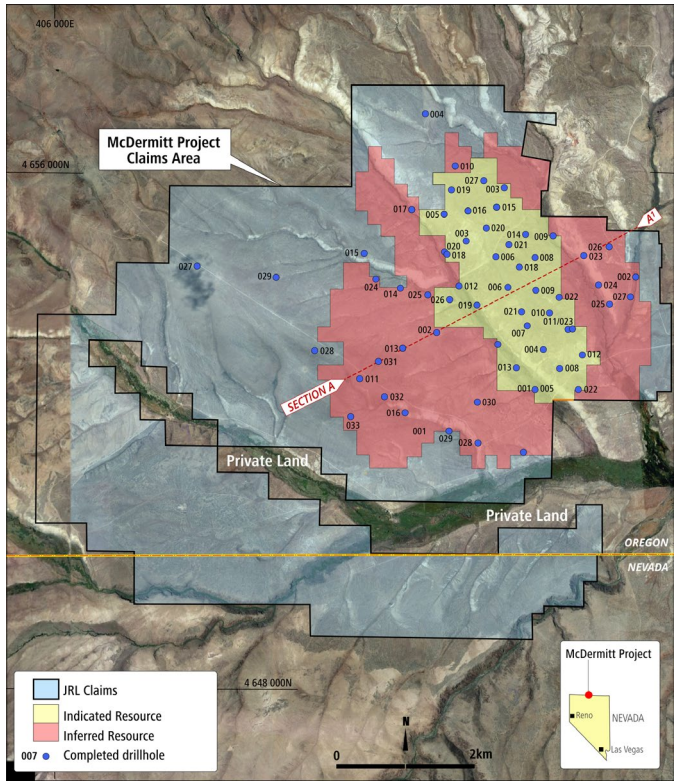

Features	• McDermitt will be a low cost mining operation:
	  • Flat lying sediments with low strip ratio
	  • Ore is soft, amenable to low cost mining and crushing
	  • Excellent metallurgical recoveries

2022 Drilling Program Highly Successful

2022 drilling (21 holes) across and outside McDermitt resource confirmed wide intercepts from shallow depths & excellent continuity

Significant intercepts recorded from 20 holes:

MDD025:	**182.2m @ 1197 ppm Li from 21.4m**	MDRC024:	**68.6m @ 1669 ppm Li from surface**
MDD028:	**131.6m @ 1219 ppm Li from 21.9m**	MDRC025:	**50.3m @ 1512 ppm Li from surface**

Refer to ASX release, 14/12/2022, "Outstanding Final Assays at McDermitt Lithium Project"

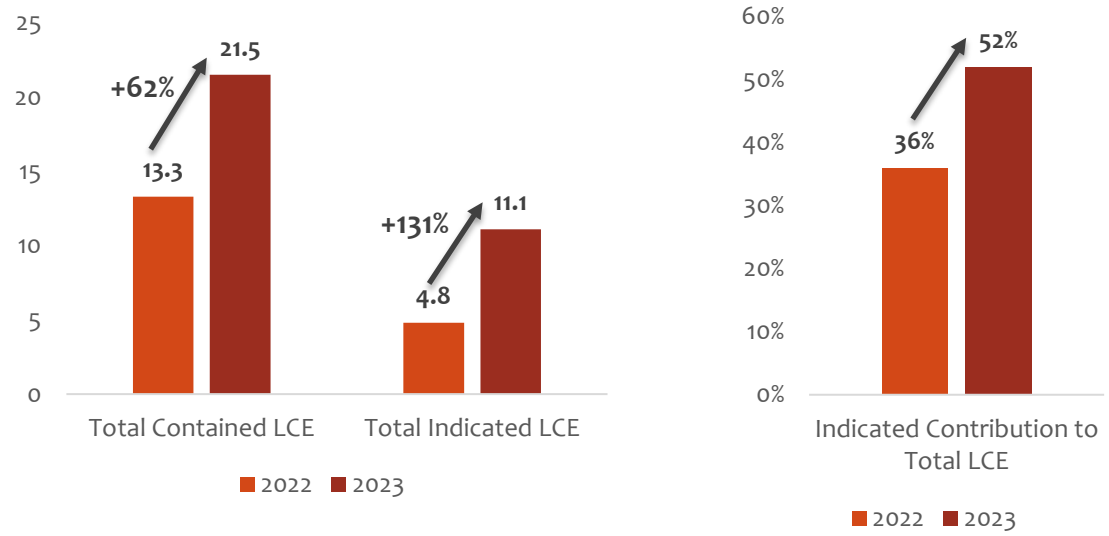

2023 McDermitt Resource = 21.5 Mt LCE

McDermitt Mineral Resource (2023)

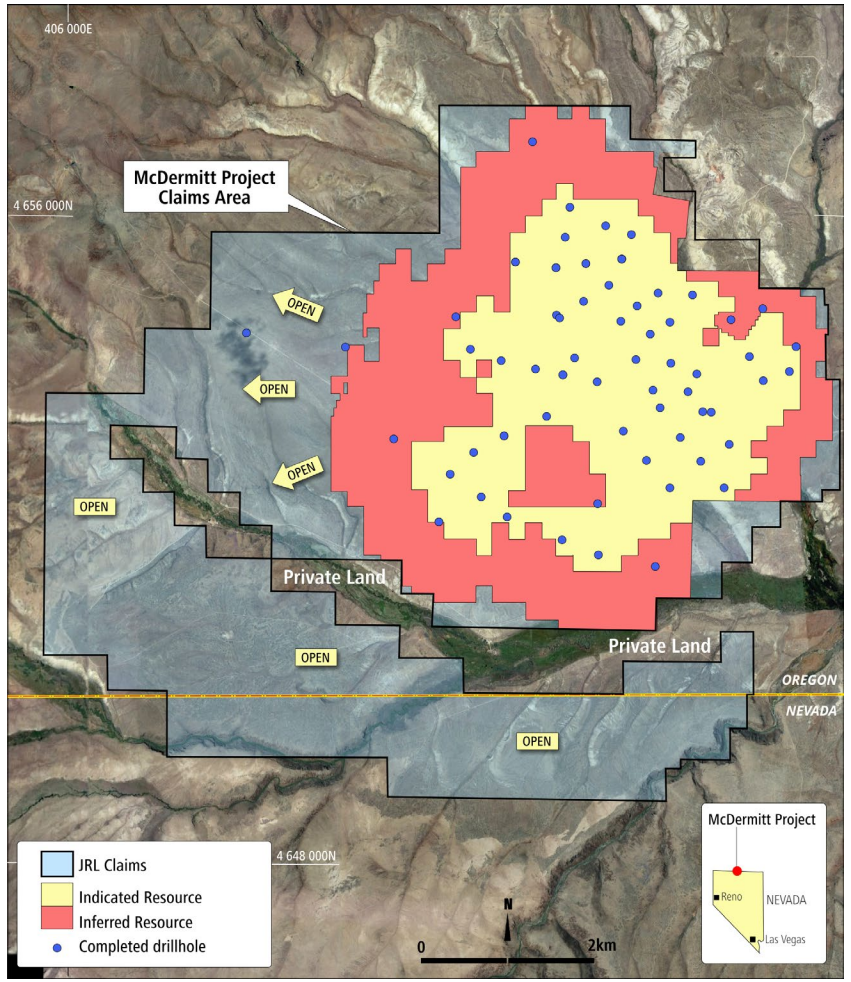

Cut-off Grade (ppm Li)	Indicated Resource			Inferred Resource			Indicated & Inferred Resource		
	Tonnage (Mt)	Li Grade (ppm)	LCE (Mt)	Tonnage (Mt)	Li Grade (ppm)	LCE (Mt)	Tonnage (Mt)	Li Grade (ppm)	LCE (Mt)
1,000	1,470	1,420	11.1	1,540	1,270	10.4	**3,000**	**1,340**	**21.5**

Summary of 2023 McDermitt Mineral Resource Estimate at the reporting cut-off of 1,000ppm. Note: totals may vary due to rounding.

Huge increase in McDermitt Resource from 2022 to 2023

... with potential to grow further...

Plan view of the 2023 Mineral Resource (at 1523mRL)

Refer to ASX release, 27/02/2023, "Resource at McDermitt increases to 21.5 Mt LCE"

Highly Encouraging Recent Metallurgical Results

JINDALEE Resources Limited

2 main processing routes for sediment hosted Lithium deposits:

1. **Acid Leaching** (H_2SO_4 or HCl): Thacker Pass (LAC), Rhyolite Ridge (INR)
2. **Alkali Salt (sulphation) Roasting**: Sonora (Ganfeng)

….with excellent results achieved at McDermitt from both process routes = **Options!**

Acid Leaching:

- Beneficiation (attrition scrubbing) increases Li content in clay fraction by >50%
- Li extraction rates of 97% (H_2SO_4) & 98% (HCl) at moderate T, atmospheric P
- Thacker Pass extraction rates ~84% (0.5t H_2SO_4/t solids in leach slurry)*

Alkali Salt Roasting:

- Produced Li_3PO_4 assaying 5.89% Li from ore grading 0.15% Li (40x uplift, before purification)
- Testwork also confirmed Li extraction of 89.5% using salts recycled from roasting & leaching
- Li_3PO_4 can be converted to Li_2CO_3 or LiOH

Li_3PO_4 produced from McDermitt ore

Review by Fluor (24 March 2023) recommends Acid Leach with Beneficiation as preferred flowsheet – testwork to optimise this flowsheet and support PFS underway

*Source: Thacker Pass Feasibility Study 02/11/2022 – www.lithiumamericas.com

MOU Signed with POSCO Holdings (NYSE:PKX) (POSCO)

Non-binding MOU to undertake joint research to optimise lithium extraction at McDermitt

POSCO (market cap US$33.4B) is a leading Korean company and lithium producer and supplier of cathode active materials to major US auto maker General Motors

POSCO will fund testwork on composite sample of McDermitt ore. Initial analysis of a smaller sample was undertaken by POSCO in 2022

Testing of the McDermitt ore will investigate three separate metallurgical processes

The testwork is expected to take approximately six months at a cost of approximately A$2M, which will be funded entirely by POSCO

POSCO and Jindalee will jointly evaluate the commercialisation of McDermitt following completion of the testwork

Source: JRL ASX Release 13.02.2023. MOU Executed with POSCO Holdings

Responsibility to the Local Environment

JINDALEE Resources Limited

Social Responsibility in the United States

McDermitt is located on open rangeland in SE Oregon, administered by the Bureau of Land Management ("BLM"). The area is sparsely populated and has a long history of both ranching and mining.

Jindalee takes its responsibility to the environment and the local community seriously and employs a dedicated team of highly experienced environmental consultants to help manage all aspects of our licence to operate. **Extensive environmental and cultural baseline studies were completed in 2022, with no red flags noted.**

Measures undertaken to minimise our impact on the environment and community include:

- Restricting drilling programs to summer & autumn months to reduce impact on fauna and ranching activities
- Cultural resource surveys undertaken before commencing drilling
- Drilling on existing cleared areas (tracks, fencelines) wherever possible
- Holes plugged on completion and disturbed areas rehabilitated and re-seeded
- Preference given to local contractors and services, where available
- Building internal capacity for community engagement in the US

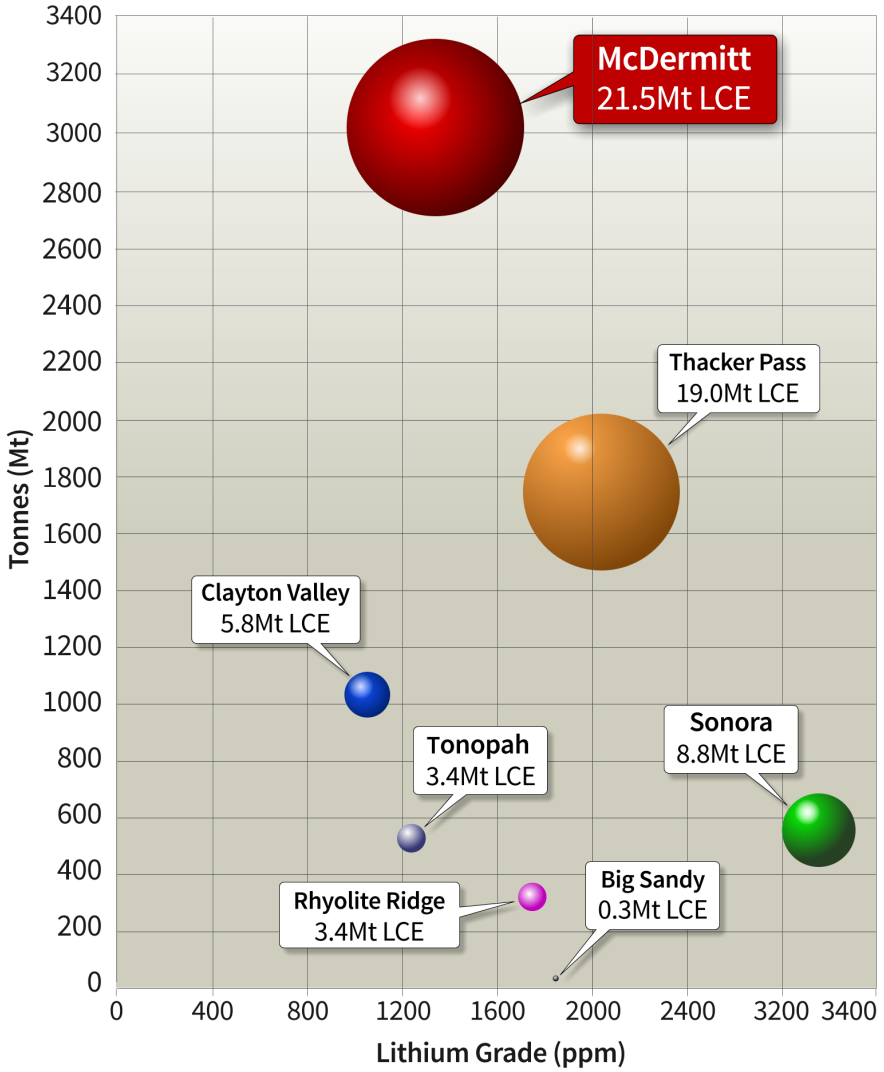

Historic Opalite Mercury Mine (abuts McDermitt Project)

Comparable Sediment Hosted Lithium Deposits

JINDALEE Resources Limited

Tonnes v Grade (contained LCE indicated by size of bubble)

Jindalee is undervalued compared with our Peers

Upcoming Milestones and Activity

- Major Mineral Resource update announced Feb 2023
- MOU with POSCO announced Feb 2023
- Flowsheet optimisation underway (Fluor)
- Exploration Plan of Operations (EPO) deemed complete by BLM May 2023
- PFS commenced June 2023, managed by Fluor; Study Manager appointed
- Further drilling planned to commence Oct 2023 (scale of program subject to approvals)
- Building and strengthening team, both in the US and at Board level
- Engagement with additional US end users and strategics ongoing
- Geological, metallurgical, engineering and environmental baseline studies ongoing
- Completion of PFS targeting June Q 2024

Additional Information

Competent Person Statement

The Exploration Results and Mineral Resource estimates referred to in this presentation were first reported in accordance with ASX Listing Rules 5.7 and 5.8 in the announcements as cross-referenced. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of the Mineral Resource estimates, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.
