

Change of AGM Date

2 September 2024 – Melbourne, Australia: PharmAust Limited (ASX:PAA) (**PharmAust** or the **Company**) advises that the date and time of the Company's 2024 Annual General Meeting (**AGM**) has been changed to Wednesday, 9 October 2024 at 11.00am (AEDT). The change of date is to provide the Company with sufficient time to complete the Notice of Meeting, following additional work resulting from the Company's transformation undertaken in late FY24 and the lodgement of the Company's Appendix 4E and 2024 Annual Report on 30 August 2024. The Board looks forward to meeting shareholders at the AGM.

Shareholders will be advised of further details regarding the AGM in a separate Notice of Meeting, which will be dispatched to shareholders in due course. The Notice of Meeting will also be available on the ASX Company Announcements Platform and the Company's website at:

About PharmAust Limited:

PharmAust Limited is listed on the Australian Securities Exchange (ASX Code: PAA). PAA is a clinical-stage biotechnology company developing therapeutics for neurodegenerative diseases. The company is focused on repurposing monepantel (MPL) for amyotrophic lateral sclerosis (ALS). ALS is the most common form of motor neurone disease (MND) and affects both upper and lower motor neurons.

MPL is a potent and safe inhibitor of the mTOR pathway. This pathway plays a central role in the growth and proliferation of cancer cells and degenerating neurons. The mTOR pathway regulates the cellular "cleaning process", where toxic proteins are broken down into macromolecules to be reused. This autophagic process is disrupted in most neurodegenerative diseases, including ALS.

The company announced positive top-line results for its Phase 1 MEND study in patients with ALS in February this year. MPL was recently selected for inclusion in the HEALEY ALS Platform Trial and anticipates commencing enrolment in Q4 CY 2024. This single pivotal study could potentially lead to accelerated approval with the US Food and Drug Administration for monepantel for the treatment of ALS in 2026.

In 2024, the Neurodegenerative Disease Market size is estimated to be worth USD 55.12 billion, with a forecast growth (CAGR) of 7.14% the market size is expected to reach USD 77.82 billion by 2029.³
