ASX RELEASE | CLEARVUE TECHNOLOGIES LIMITED

(ASX:CPV | OTCQX:CVUEF)

ClearVue receives $1.09 million R&D Tax Credit

HIGHLIGHTS

- **ClearVue receives A$1.09 million R&D tax credit under the Australian Government Research & Development Tax Incentive**
- **The R&D claim relates to work on ClearVue's Generation 2 technology and other development activities.**

16 April 2025: Smart building materials company **ClearVue Technologies Limited** (ASX:CPV) (ClearVue or the Company) has received an R&D tax credit from the Australian Taxation Office totalling **$1,093,692**.

ClearVue's R&D tax credit claim under the Australian Government Research & Development Tax Incentive relates to research and development activities undertaken over the past year, including:

- Development and production of its Generation 2 ClearVuePV pilot IGUs
- Further engineering of solar strips and connector blocks
- Advancement of the Company's proprietary PVB interlayer materials
- Ongoing collaborative research with D2 Solar in the United States
- Greenhouse research at Murdoch University in Western Australia
- And a variety of other innovation-focused projects across the ClearVue platform.

Martin Deil, Global CEO of ClearVue Technologies, said:

> *"This R&D tax rebate validates our ongoing commitment to innovation and excellence in solar-integrated building envelope solutions. We continue to invest strategically in product development and scientific research to support the commercialisation of our Generation 2 products and to maintain our position at the forefront of smart building design.*
>
> *The Australian Government's R&D tax incentive program provides valuable support for companies like ours that are building sustainable technologies of the future."*

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Ltd (ASX: CPV | OTCQX: CVUEF), headquartered in Australia, is a global leader in integrating advanced solar technology into building surfaces. Our patented solar glass technology allows energy generation from clear glass windows, making it unique in the market. This technology can be applied to windows, skylights, greenhouses, and facades, enhancing the sustainability and energy efficiency of buildings by generating energy from nearly all surfaces.

ClearVue's innovation extends to a range of Building Integrated Photovoltaic (BIPV) products, enabling entire buildings to generate electricity. This approach addresses the significant challenge of decarbonizing the global economy. The company aims to provide practical, actionable, and quantifiable net-zero or near-net-zero energy solutions, offering environmental, social, and shareholder benefits over the medium to long term.

Since its listing on the Australian Stock Exchange in May 2018, ClearVue has expanded its global footprint through license partners, ensuring compliance with international standards across key markets. The company has an extensive intellectual property portfolio for its key innovations and products and is guided by a board and executive team with extensive industry experience focused on rapid commercialisation of its products into a large and expanding global market.
