Fourth Month Seaweed Sales Results – Sustained Strong Performance

Highlights

- **Gross sales of A$222,656 (IDR 2,449,000,000) for the August Sales Period (15 August – 14 September 2025)**
- **Sales during the period were made to wholesale buyers in Indonesia; international shipments are expected in the coming months**
- **Operations: Seaweed sourced through ongoing partnerships with coastal farming communities in the Nunukan region of Indonesia, reinforcing the Company's sustainability and community engagement commitments**
- **Leased 550m² warehouse in Makassar, South Sulawesi, now fully commissioned and operational, enabling BP8 to independently source, process and sell seaweed while maintaining its collaboration with PT Kebula Raya Bestari**

The Board of BPH Global Ltd **(ASX: BP8)** is pleased to report the sales results for the fourth month of trading from its new seaweed sales operations in Indonesia, which commenced in May 2025. The business — which sources, processes, and exports sustainably harvested seaweed — generated gross sales of approximately A$222,656 during the August 2025 reporting period, based on fulfilled purchase orders with payments pending settlement under standard trading terms (compared to A$267,530 in July 2025**)**.

This result demonstrates sustained demand for the Company's seaweed products, underpinned by strong domestic sales momentum and continuing customer engagement. While marginally lower than the previous reporting period, the performance remains consistent with the Company's growth trajectory and reinforces the commercial potential of its Indonesian operations.

Managing Director Matthew Leonard said: "August has been another solid month for BP8, with sales maintaining a strong level following July's record growth. Importantly, demand from our Indonesian wholesale partners remains robust, and we are steadily progressing international sales opportunities. With our Makassar warehouse now fully operational, BP8 has the flexibility to operate independently in sourcing, processing and selling seaweed while continuing to build on our valued partnership with Kebula. This dual-track approach strengthens our ability to scale volumes, broaden customer reach and deliver long-term growth in line with our sustainability commitments."

Trading Results

During the period 15 August to 14 September 2025, the Company generated gross sales of approximately A$222,656 (IDR 2,449,000,000), based on fulfilled purchase orders with payments pending settlement.

Sales were made to wholesale buyers in Indonesia, demonstrating continued traction in the domestic market. Following the initial sales in the May reporting period, additional sales to international customers are anticipated in upcoming reporting periods, supporting the Company's strategy to access global demand for high-quality seaweed products. All sales in this reporting period were conducted under the Company's previously announced Sales Cooperation Agreement with PT Kebula Raya Bestari.

Seaweed was sourced through established partnerships with local farming communities in the Nunukan region of Indonesia, ensuring traceability and responsible harvesting practices. These relationships remain central to the Company's commitment to environmental sustainability and community development.

Operational Focus

The operational focus remains on scaling volumes to meet rising demand, progressing international sales opportunities, leveraging the Company's trade financing facility and finalising additional offtake discussions. The Company expects trading volumes to continue to increase over the coming months.

Importantly, the Company's leased 550m² warehouse in Makassar, South Sulawesi, is now fully commissioned and operational. This facility, with a capacity of up to 1,000 metric tons of raw seaweed per month and equipped with a quality control laboratory and hydraulic press (to be operational from next month), and dedicated teams, provides BP8 Indonesia with the ability to commence independent operations in sourcing, processing, and selling seaweed to third-party customers. At the same time, the Company remains committed to maintaining and building upon its existing collaboration with PT Kebula Raya Bestari, ensuring that both independent operations and cooperative arrangements continue to support BP8's growth trajectory. The Company expects trading volumes to continue to increase over the coming months.

The Company will continue to provide monthly updates on sales volumes from its Indonesia-based seaweed operations.

This announcement has been authorised by the Board of Directors.
