About Livium

Livium Ltd (previously Lithium Australia) is dedicated to leading the clean energy transition by securing critical materials from sustainable material recovery. The company's core focus is the recycling of clean energy waste.

Livium's subsidiary, Envirostream, is Australia's market-leading lithium-ion battery recycler. Envirostream is seeking to expand its services into processing black mass, and recycling of solar panels and rare earth elements to meet its customers' needs.

Beyond recycling, Livium has developed other innovative technologies. Lithium extraction technology, LieNA®, has progressed to a 50:50 joint venture with Mineral Resources Ltd (ASX: MIN). Livium's subsidiary, VSPC, has developed next generation lithium ferro phosphate (LFP) process, the fastest growing battery material.

Forward-looking statements

This announcement contains forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties that it is beyond the Company's ability to control or predict and which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Investors should be aware that past performance should not be relied upon as being indicative of future performance.
