ASX RELEASE
10 November 2026

ASX: KTK

RELEASE OF RESTRICTED SECURITIES FROM ESCROW

KTEK Aerosystems Ltd (ASX: KTK) (KTEK or the Company), advises that in accordance with Listing Rule 3.10A, 11,670,000 fully paid ordinary shares ("Shares") will be released from ASX imposed escrow on the dates set out below:

Fully Paid Ordinary Shares	Date released from escrow
2,500,000	17 November 2026
3,044,000	20 November 2026
2,359,915	24 November 2026
750,000	26 November 2026
1,125,000	27 November 2026
537,500	1 December 2026
400,000	2 December 2026
3,585	3 December 2026
425,000	4 December 2026
50,000	8 December 2026
350,000	9 December 2026
125,000	15 December 2026

The Shares became subject to ASX-imposed escrow in connection with the Company's admission to the Official List on Monday, 18 May 2026.

The Company will apply for the quotation of the Shares within 5 business days after the end of their respective escrow periods as required by Listing Rule 2.8.5.

Following the release of the above securities from escrow, 66,330,000 Shares and 12,000,000 Unlisted Options will remain subject to escrow restrictions until 18 May 2028.

This announcement has been authorised for issue by Alessandra Gauvin, Joint Company Secretary.

About KTEK Aerosystems

KTEK Aerosystems (ASX: KTK) is a Tier-2 supplier of composite airframes and electromechanical assemblies for military and commercial UAVs. The Company delivers built-to-spec, Full Turn-Key (FTK) sub-assemblies, combining mechanical, electrical and firmware components into qualified ship-ready units, across five product lines:

- composite airframes (UAV fuselage structures, wings and control surfaces, lightweight aerospace composites);
- electromechanical assemblies (actuation modules, avionics trays and mounts, power distribution systems);
- rugged defence systems (shock-isolated racks and cabinets, EMC-hardened enclosures and mission-system infrastructure);
- systems integration and kitting (MIL-spec harnessing, PCBA integration, firmware loading and acceptance testing); and
- SATCOM components and sub-assemblies (RF-transparent radomes, lightweight antenna structures and integrated assemblies for mobile defence and commercial platforms).

KTEK operates a scalable, asset-light Cordless Factory model, retaining engineering design, structural analysis and quality assurance in-house while outsourcing physical manufacturing to a certified global partner network across Israel, Europe, Thailand and the United States.
