CleanTech Lithium PLC ("CleanTech Lithium" or the "Company")
Preliminary Events Schedule for H1 2023

CleanTech Lithium (AIM:CTL), an exploration and development company, advancing the next generation of sustainable lithium projects in Chile, announces plans for an extensive IR programme for the first half of 2023.

The programme is aimed at helping inform existing and potential investors on the Company's progress and to also improve understanding of the Company's value potential and investment case. Attended by one or more of the CEO, Aldo Boitano, Non-Exec Chairman, Steve Kesler, CFO, Gordon Stein and Head of Strategy & Business Development, Jason Baverstock, the Company will also be updating shareholders on the significant programme of operational activity planned for 2023 through traditional channels, including the regulatory news service.

The preliminary schedule of events the Company intends to attend in the first six months of 2023, include:

Date	**Event**	**Location**
15-16 February	OTC Investor, Battery & Precious Metals Virtual Conference	Virtual
23-34 February	Mines and Money Conference	Miami, Florida
5-8 March	PDAC, Annual Mining Conference	Toronto, Canada
21-22 March	Swiss Mining Institute Conference	Zurich, Switzerland
28-29 March	121 Mining Investment Global Conference	Las Vegas, Nevada
28-29 March	Benchmark Minerals Intelligence, Battery Gigafactories Europe 2023	Budapest, Hungary
4-6 April	Resource Connect Asia, Future Facing Commodities Conference	Singapore
17 April	CESCO, Mining Exploration Forum	Santiago, Chile
20 April	Battery Tech Expo	Silverstone, U.K.
5-6 May	Deutsche Goldmesse, Mining Conference	Frankfurt, Germany
10-12 May	Canaccord Genuity, Global Metals & Mining Conference	Palm Springs, California
13 May	UK Investor Show	London, U.K.
24-26 May	Swiss Mining Institute, Virtual Conference	Virtual

In addition to the above table, the Company is planning face-to-face meetings over the coming months with investors in the U.S., Canada, Germany, Switzerland, and possibly France and Belgium.

Notes

CleanTech Lithium (AIM:CTL) is an exploration and development company, advancing the next generation of sustainable lithium projects in Chile. The Company's mission is to produce material quantities of battery grade lithium by 2025, with near zero carbon emissions and low environmental impact, offering the EV market a green lithium supply solution.

CleanTech Lithium has two prospective lithium projects - Laguna Verde and Francisco Basin projects located in the lithium triangle, the world's centre for battery grade lithium production. They are situated within basins entirely controlled by the Company, which affords significant potential development and operational advantages. The projects have direct access to excellent infrastructure and renewable power. In addition, the Company has applied for a further 119 exploration licences at Llamara, as a low cost and commitment greenfield project to complement the existing more advanced projects.

CleanTech Lithium is committed to using renewable power for processing and reducing the environmental impact of its lithium production by utilising Direct Lithium Extraction. Direct Lithium Extraction is a transformative technology which only removes lithium from brine, with higher recoveries and purities. The method offers short

development lead times, low upfront capex, with no extensive site construction and no evaporation pond development so there is no water depletion from the aquifer or harm to the local environment.
