Reach - non-regulatory announcement

GreenRoc Mining Plc / EPIC: GROC / Market: AIM / Sector: Mining

29 March 2023

GreenRoc Mining plc
("GreenRoc" or the "Company")
Presenting at Battery Gigafactories Europe 2023

GreenRoc Mining plc (AIM: GROC), a company focused on the development of critical mineral projects in Greenland, is pleased to announce that Chief Executive Officer Stefan Bernstein will be presenting at Benchmark Mineral Intelligence's Battery Gigafactories Europe 2023 conference in Budapest, Hungary, today at 2.30 CET.

Mr Bernstein will take part in a panel discussion about the graphite market, its challenges and opportunities, and the role graphite will play in achieving net zero goals.

Battery Gigafactories Europe 2023 is hosted by Benchmark Mineral Intelligence, the world's leading market intelligence publisher for the lithium-ion battery to electric vehicle (EV) supply chain. The two-day conference is exploring the rise of Europe's lithium-ion battery gigafactory economy and the need to build secure, sustainable supply chains for lithium, nickel, graphite, cobalt, manganese, rare earths and other critical raw materials.

Speakers and attendees at the conference include representatives from major industry players across the battery to electric vehicle supply chain, finance, Governments and policymakers.

About GreenRoc

GreenRoc Mining plc is an AIM-quoted company which is developing mining projects in Greenland in critical, high-demand and high-value minerals.

Led by a group of highly experienced mining industry professionals, GreenRoc has a portfolio of 100% owned projects all of which have defined Resources:

- **Amitsoq Graphite Project**, one of the highest-grade graphite deposits in the world with a combined Measured, Indicated and Inferred JORC Resource of 23.05 million tonnes (Mt) at an average grade of 20.41% graphite, giving a total graphite content of 4.71 Mt;

- **Thule Black Sands Ilmenite Project** ('TBS'), which has an initial Mineral Resource of 19Mt at 43.6% Total Heavy Minerals with an in-situ ilmenite grade of 8.9%; and

- **Melville Bay Iron Project**, which has a Mineral Resource Estimate of 67Mt at 31.4% iron and has been proven to be processable to a high-grade, 70% concentrate with low impurities.

***About Reach announcements**

This is a Reach announcement. Reach is an investor communication service aimed at assisting listed and unlisted (including AIM quoted) companies to distribute media only / non-regulatory news releases into the public domain. Information required to be notified under the AIM Rules for Companies, Market Abuse Regulation or other regulation would be disseminated as an RNS regulatory announcement and not on Reach.

This information is provided by Reach, the non-regulatory press release distribution service of RNS, part of the London Stock Exchange. Terms and conditions relating to the use and distribution of this information may apply. For further information, please contact rns@lseg.com or visit www.rns.com.

Reach is a non-regulatory news service. By using this service an issuer is confirming that the information contained within this announcement is of a non-regulatory nature. Reach announcements are identified with an orange label and the word "Reach" in the source column of the News Explorer pages of London Stock Exchange's website so that they are distinguished from the RNS UK regulatory service. Other vendors subscribing for Reach press releases may use a different method to distinguish Reach

announcements from UK regulatory news.

RNS may use your IP address to confirm compliance with the terms and conditions, to analyse how you engage with the information contained in this communication, and to share such analysis on an anonymised basis with others as part of our commercial services. For further information about how RNS and the London Stock Exchange use the personal data you provide us, please see our Privacy Policy.
