FULCRUM METALS - BACKGROUND

Fulcrum Metals PLC (LON: FMET) is an AIM quoted exploration company which finances and manages exploration projects focused in Canada, widely recognised as a top mining jurisdiction.

Fulcrum currently holds a beneficial 100% interest in highly prospective gold and base metals projects in Ontario and uranium projects in Saskatchewan.

Fulcrum's strategy is to focus on discovery and commercialisation of its Projects through targeted exploration programmes. The primary focus is to make an economic discovery on the flagship Schreiber-Hemlo Properties and establishing the prospectivity of its wider Ontario and Saskatchewan portfolio with a view to securing potential joint venture and/or acquisition interest.

The Schreiber - Hemlo properties have a history of prospecting and localised extraction since the late 19th century. However, coherent, property-level exploration programmes have been limited or absent, particularly in recent times. Fulcrum has an opportunity to carry out such a programme and this approach provides the best opportunity to fully explore the significant prospectivity of the properties.

While highly prospective, Fulcrum's mining assets are in the exploration phase, so Fulcrum stands to be able to add significantly to the inherent value through exploration success. Fulcrum will continually review opportunities with potential and with a view to increasing shareholder value. It is the Board's intention to deliver medium and long-term growth and to establish the Group as a significant exploration company.
