About genedrive plc (http://www.genedriveplc.com) genedrive plc is a molecular diagnostics company developing and commercialising a low cost, rapid, versatile, simple to use and robust point of need molecular diagnostics platform for the diagnosis of infectious diseases and for use in patient stratification (genotyping), pathogen detection and other indications. The company are currently developing a genetic test for CYP2C19 metaboliser status.

The Genedrive® MT-RNR1 ID Kit, selected as 1 of the 10 EVA pilot projects, is the world's first commercial point-of-care genetic test for emergency care. It helps to avoid irreversible lifelong

hearing loss in specific infants exposed to aminoglycosides by rapidly detecting the m.1555A>G gene variant that can cause lifelong deafness, allowing for alternative antibiotics to be prescribed. Product information can be found at https://www.genedrive.com/assays/rnr1-product.php
