CleanTech Lithium PLC ("CleanTech Lithium", "CTL" or the "Company")

Commencement of trading on OTCQX® Best Market for North American investors

CleanTech Lithium PLC (AIM:CTL, Frankfurt:T2N, OTCQX:CTLHF), an exploration and development company advancing next-generation sustainable lithium projects in Chile for the EV transition, has now qualified to trade on the OTCQX® Best Market. The Company has been upgraded to OTCQX from the OTCQB® Venture Market.

Today marks the commencement of trading on OTCQX Best Market under the symbol "CTLHF" as the Company has successfully met the high financial standards, best corporate governance practices, and complied with the U.S. relevant securities law. The graduation to the OTXQX Best Market demonstrates the Company's competency and will streamline any investment activity from investors from the United States and Canada.

Aldo Boitano, Chief Executive Officer, CleanTech Lithium PLC, said:

"By qualifying to trade on OTCQX Best Market, CleanTech Lithium welcomes existing and potential investors. Our qualification for the premium tier on OTC markets, will provide increased liquidity and disclosure for our shareholders and potential new investors.

"Joining the OTCQX Market is a strategic decision as CTL continues to make progress simultaneously across our three projects located in Chile, in the Lithium Triangle. With Chile being the only South American country producing lithium with a Free Trade Agreement with the U.S, the region is a key market on our path to production.

"Interest in battery manufacturing, electric vehicles and the drive to a green economy is developing at a rapid pace and the Inflation Reduction Act in the USA and Canada's 2035 EV mandate is evidence of this. CTL aims to play a significant role in this by supplying cleaner lithium via Direct Lithium Extraction ("DLE") technology and being part of the OTCQX Best Market is an important step towards delivering this."

U.S. and Canadian investors can find current financial disclosure and Real-Time Level 2 quotes for the Company on www.otcmarkets.com.

Notes

CleanTech Lithium (AIM:CTL, Frankfurt:T2N, OTCQX:CTLHF) is an exploration and development company advancing next-generation sustainable lithium projects in Chile for the EV transition. Proudly sustainable, committed to net-zero, our mission is to produce material quantities of battery grade, carbon-neutral lithium using sustainable Direct Lithium Extraction technology, powered by clean energy, we plan to be the greenest lithium supplier to the EV market.

CleanTech Lithium has three prospective lithium projects - Laguna Verde, Francisco Basin and Llamara - located in the lithium triangle, the world's centre for battery grade lithium production. The Laguna Verde and Francisco Basin projects are situated within basins entirely controlled by the Company, which affords significant potential development and operational advantages. Llamara is the Company's latest greenfield project, which offers material potential upside at a low initial cost. All three projects have direct access to excellent infrastructure and renewable power.

CleanTech Lithium is committed to using renewable power for processing and reducing the environmental impact of its lithium production by utilising Direct Lithium Extraction. Direct Lithium Extraction is a transformative technology which removes lithium from brine, with higher recoveries and purities. The method offers short

development lead times, low upfront capex, with no extensive site construction and no evaporation pond development so there is no water depletion from the aquifer or harm to the local environment.
