OptiBiotix Health plc
("OptiBiotix" or the "Company")

Extension of territories for GoFigure®
with Extensor

OptiBiotix Health plc (AIM: OPTI), a life sciences business developing compounds to tackle obesity, high cholesterol, diabetes and skincare, announces it has extended the territories of its original distribution agreements with Extensor Robert Buczek ("Extensor") to distribute OptiBiotix's own label GoFigure® consumer weight management products in Ukraine, Estonia, Lithuania, Latvia, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, Armenia, Azerbaijan, Georgia, Belarus, Moldova and Russia.

Extensor is OptiBiotix's exclusive partner in Poland for distributing its GoFigure® product range (RNS: 22 May 2019) and SlimBiome® (RNS: 6 December 2019). The signing of an amendment to the agreement granting Extensor exclusive rights to distribute GoFigure® into additional territories highlights the positive evolution of the GoFigure® and SlimBiome® distribution agreements. The deal will create new commercial opportunities in new territories which may generate revenues with the commercialisation of the GoFigure® range on new online platforms such as Domo in Ukraine: https://domo.co.ua/search?string=Gofigure&category=all.

Dr. Fred Narbel, Managing Director of OptiBiotix's prebiotics division, commented: *"We are very pleased to strengthen our partnership with Extensor to distribute our GoFigure® range beyond the Polish borders as they have proven to be a very reliable commercial partner and have recently placed additional orders for GoFigure® branded products to replenish their stocks. The signing of a territory extension amendment to the original agreement shows a positive evolution of the relationship and increases the global reach of our trademarks thus contributing to increasing the value of our portfolio of trademarks."*

About OptiBiotix - www.optibiotix.com
OptiBiotix Health plc (AIM: OPTI), which was formed in March 2012, brings science to the development of compounds which modify the human microbiome - the collective genome of the microbes in the body - in order to prevent and manage human disease and promote wellness.

OptiBiotix has an extensive R&D program working with leading academics in the development of microbial strains, compounds, and formulations which are used as active ingredients and supplements. More than twenty international food and healthcare supplement companies have signed agreements with OptiBiotix to incorporate their human microbiome modulators into a wide range of food products and drinks.

OptiBiotix is also developing its own range of consumer supplements and health products. The Company's current areas of focus include obesity, cardiovascular health, and diabetes.
