

**OptiBiotix Health plc
("OptiBiotix" or the "Company")**

SlimBiome® contract manufacturing agreement with Laboratoire PYC Inc.

OptiBiotix Health plc (AIM: OPTI), a life sciences business developing compounds to tackle obesity, high cholesterol, diabetes and skincare, announces it has entered into a contract manufacturing agreement with Laboratoire PYC Inc. ("Laboratoire PYC") in France.

Laboratoire PYC (<https://www.laboratoire-pyc.com/en/company/>) develops, manufactures and packages private label food supplements, nutricosmetics and high protein & sport nutrition products. Laboratoire PYC has more than 30 years of experience and belongs to the Solina Group (<https://solina-group.com>), a group with a turnover of approximately €450 million. The terms of the agreement grant Laboratoire PYC the exclusive rights to manufacture a new type of meal replacement shakes designed specifically to support the international expansion of OptiBiotix's own label GoFigure® consumer weight management brand.

This is another strategic step by OptiBiotix to de-risk its supply chain. The deal builds on the recent partnership with Fipros A/S in Denmark to produce SlimBiome under licence within the European Union (RNS: 2 April 2020) and creates a source of supply of GoFigure® products located within the European Union to support the international growth of the B2C brand in Poland (RNS: 6 December 2019), in Malaysia and Singapore (RNS: 6 December 2019) and Eastern Europe (RNS: 24 March 2020).

Dr. Fred Narbel, Managing Director of OptiBiotix's prebiotics division, commented: *"We are very pleased to work with Laboratoire PYC to manufacture a new range of meal replacement shakes formulated with SlimBiome®, and sold under the GoFigure® brand. The agreement helps us lower the cost of trade in case of a hard Brexit, supports our existing and future European distributors, and builds contingency into the supply chain: a key requirement from large retail partners who do not want to be single-sourced. In addition, Laboratoire PYC has a large portfolio of product formulations which can be formulated with SlimBiome® enabling us to increase the number of applications, extend our product range, and shorten the development of new GoFigure®, SnackSmart® and SnackWell® products without incurring significant development costs."*

About OptiBiotix - www.optibiotix.com

OptiBiotix Health plc (AIM: OPTI), which was formed in March 2012, brings science to the development of compounds which modify the human microbiome - the collective genome of the microbes in the body - in order to prevent and manage human disease and promote wellness.

OptiBiotix has an extensive R&D program working with leading academics in the development of microbial strains, compounds, and formulations which are used as active ingredients and supplements. More than twenty international food and healthcare supplement companies have signed agreements with OptiBiotix to incorporate their human microbiome modulators into a wide range of food products and drinks.

OptiBiotix is also developing its own range of consumer supplements and health products. The Company's current areas of focus include obesity, cardiovascular health, and diabetes.
