Cobra Resources plc
("Cobra" or the "Company")

Notice of AGM

Cobra(LSE: COBR),the mineral exploration and development company advancing a potentially world-class ionic Rare Earth Elements ("REEs") discovery enriched with dysprosium and terbium at its Boland Project ("Boland") in South Australia, announces it has today published a notice convening an annual general meeting ("AGM") of the Company (the "Notice"). The Notice has been sent to shareholders and is available on the Company's website at:www.cobraplc.com.

The AGM will be held on Monday, 30 June 2025 at 10.00 a.m. BST as a virtual meeting, which is explained in the letter from the chairman of the Company set out in the Notice.

About Cobra

In 2023, Cobra discovered a rare earth deposit with the potential to re-define the cost of rare earth production. The highly scalable Boland ionic rare earth discovery at Cobra's Wudinna Project in South Australia's Gawler Craton is Australia's only rare earth project amenable for in situ recovery (ISR) mining - a low cost, low disturbance method enabling bottom quartile recovery costs without any need for excavation or ground disturbance. Cobra is focused on de-risking the investment value of the discovery by proving ISR as the preferred mining method and testing the scale of the mineralisation footprint through drilling.

Cobra's Wudinna tenements also contain extensive orogenic gold mineralisation, including a 279,000 Oz gold JORC Mineral Resource Estimate, characterised by low levels of over-burden, amenable to open pit mining.
