About Fulcrum Metals PLC

Fulcrum Metals PLC (AIM: FMET) is an AIM listed technology led natural resources company focused on recovery of precious metals from mine tailings (previously milled and processed ore) in Canada using environmentally friendly leaching technology developed by Extrakt Process Solutions LLC and its associates (together "Extrakt"). The Company's initial

projects are the mine waste sites of former significant producing Teck-Hughes and Sylvanite gold mines in Kirkland Lake, Ontario. The Company also has interests in a portfolio of highly prospective mineral exploration and development projects in Ontario and Saskatchewan in Canada.

Fulcrum has exclusive licenced use of Extrakt's proven leaching technology on gold mine waste sites over the mining districts of Timmins and Kirkland Lake. These are two of Canada's biggest gold camps with a history of over 110Moz Au produced over the past 100 years and more than 70 documented legacy mine waste sites. This presents Fulcrum with opportunity to develop into a significant environmentally friendly gold producing entity in the near term.
