New AS9100D Certification expands MTI's ability

to tender for Airborne Defence Contracts

MTI Wireless Edge Ltd (AIM: MWE), the technology group focused on comprehensive communication and radio frequency solutions across multiple sectors, is pleased to announce that it has achieved AS9100D certification, the internationally recognised quality management standard for the aerospace and defence industries.

Defence is an important market for MTI, and spending in the sector has risen significantly over the past two years. Investment in airborne defence, including aircraft, unmanned aerial systems and missile programmes, has been growing rapidly reflecting the shift to satellite defence and drone programmes in modern warfare, an area which is very reliant on antenna communication.

Leading international defence companies and government organisations typically require AS9100D certification from their suppliers. With this certification now in place, MTI is better positioned to tender for high-value contracts across the sector as it continues to grow.

The AS9100D certification demonstrates MTI's commitment to the highest standards of quality, reliability and operational excellence, and reflects the robustness of the Company's processes across design, development, manufacturing and supply chain management.

Moni Borovitz, Chief Executive Officer of MTI Wireless Edge, said:

"I am delighted that MTI has been awarded AS9100D certification. Defence spend has grown rapidly and is forecast to continue to do so. Given this, we took the decision to invest significant management time and resources in securing this certification led by our VP of quality assurance and I would like to thank him and the team for their excellent work. I believe we are now well placed to compete for new and potentially larger defence contracts."

About MTI Wireless Edge Ltd. ("MTI")
Headquartered in Israel, MTI is a technology group focused on comprehensive communication and radio frequency solutions across multiple sectors through three core divisions:

Antenna division

MTI is internationally recognised as a producer of commercial off-the-Shelf and custom-developed antenna solutions in a broad frequency range of HF to 170 GHz for commercial, RFID and military applications. MTI continuously invests in ground breaking technologies, explores new frequencies, and devises innovative solutions which empower our wireless communication customers with cutting-edge off-the-shelf and custommade antennas.

We are at the forefront of technology and innovation, being the first to introduce Dual Band parabolic antennas, E Band Automatic Beam Steering antennas, E Band FCC compliant flat antennas, and more.

MTI supplies directional and omnidirectional antennas for outdoor and indoor deployments, including smart antennas for 5G backhaul, Broadband access, public safety, RFID, base station and terminals for the utility market.

Military applications include a wide range of broadband, tactical and specialized communication antennas, antenna systems and DF arrays installed on numerous airborne, ground and naval, including submarine, platforms worldwide.

Water Control & Management division

Via its subsidiary, Mottech Water Solutions Ltd ("Mottech"), MTI provides high-end remote control and monitoring solutions for water and irrigation applications based on Motorola's IRRInet state-of-the-art control, monitoring and communication technologies.

As Motorola's global prime-distributor Mottech serves its customers worldwide through its international subsidiaries and a global network of local distributors and representatives. With over 25 years of experience in providing customers with irrigation remote control and management, Mottech's solutions ensure constant, reliable and accurate water usage, increase crops quality and yield while reducing operational and maintenance costs providing fast ROI while helping sustain the environment. Mottech's activities are focused in the market segments of agriculture, water distribution, municipal and commercial landscape as well as wastewater and storm-water reuse.

Distribution & Professional Consulting Services division

Via its subsidiary, MTI Summit Electronics Ltd., MTI offers consulting, representation and marketing services to foreign companies in the field of RF and Microwave solutions and applications including engineering services (including design and integration) in the field of aerostat systems and the ongoing operation of Platform subsystems, SIGINT, RADAR, communication and observation systems which is performed by the Company. It also specializes in the development, manufacture and integration of communication systems and advanced monitoring and control systems for the Government and defence industry market.
