Aurrigo International plc

("Aurrigo" or the "Company")

Establishment of New UK Hub Facility

Facility to enhance advanced manufacturing, increase engineering capability and support international hub strategy

Aurrigo International plc (AIM: AURR), a leading international provider of autonomy software, fully autonomous vehicles and mobile robotics platforms, is pleased to announce the relocation of its global headquarters and core design and manufacturing centre to a new UK facility at Power Park in Coventry, marking a major milestone in the Company's growth and manufacturing capability.

The new site comprises 130,615 square feet, more than three times the size of Aurrigo's current UK facility, and will serve as its UK hub for advanced engineering, autonomous vehicle development, high-volume manufacturing and ongoing Automotive activities. The Board views the establishment of this hub as a key step in building a scalable platform to support long-term growth.

The expanded facility will support the delivery of the recently announced £6.28m contract with Ultra Global for 25 autonomous guided vehicles, demonstrating the importance of scaling manufacturing to meet increasing commercial demand.

The facility also complements the Company's recently announced international hub and licensing programme, which is designed to accelerate global commercialisation through local partnerships, funding and manufacturing support across Europe, the Middle East, South East Asia and the United States.

Once fully operational, and subject to customer demand, the facility is projected to be capable of manufacturing up to 500 autonomous vehicles per annum.

The Company expects to move its registered address to the Power Park site in due course. A further announcement will be made at such time in accordance with the AIM Rules for Companies.

Prof. David Keene MBE, CEO of Aurrigo International, commented:

"*This new UK Hub Facility marks an important milestone for our business and our unwavering commitment to the UK. It significantly enhances our manufacturing and engineering capability, provides the capacity to scale in line with demand, and underpins our ambition to build a sustainable, capital-efficient platform for long-term growth. Importantly, it also gives Aurrigo space for an on-site autonomous vehicle test track, supporting in-house validation, customer demonstrations, and accelerated development cycles.*

We are really pleased to have secured a new home in Coventry, just a few miles from our existing facility and, importantly, a place where we can create jobs for highly skilled people and the next generations of engineers and software specialists."

Notes to Editors:

Aurrigo International plc (AURR LN) is a UK based developer and producer of autonomy software, fully autonomous vehicles and mobile robotics platforms. Aurrigo's first application is autonomous airport Ground Support Equipment (GSE) designed to move cargo, baggage and people between terminals, baggage halls and airside next to aircraft. Thus, transforming operations that are manually intensive improving safety, operational efficiencies and meeting sustainability targets, while navigating growing passenger volumes, rising costs and increasing labour shortages.

Aurrigo's autonomy software and controls, designed to operate in safety, security sensitive and harsh environments, have an opportunity to transform airside logistics and bring autonomy to wider markets.

Headquartered in Coventry, UK with offices in Singapore, Cincinnati and Ottawa, the Group has a 33 year heritage designing and supplying automotive vehicle OEM's with highly advanced, innovative product and system solutions.
