Fulcrum Metals launches interactive investor hub to enhance shareholder engagement

Fulcrum Metals PLC [AIM:FMET], a company pioneering the use of innovative cyanide-free technologies to recover precious and critical metals from mine waste and support site remediationis pleased to announce the launch of our interactive investor hub, providing both existing and prospective shareholders with a centralised platform to access Company information and engage more directly with management.

The investor hub brings together Fulcrum's key content in a single, integrated platform, including:

- Regulatory announcements
- Reports
- Presentations
- Educational material
- Interviews
- Corporate research

The investor hub enables shareholders to submit questions directly to the Company via a dedicated portal. These will be reviewed by the management team, with responses provided in a timely manner.

How to sign up for the Fulcrum Metals PLC investor hub:

1. Visit https://fulcrummetals.com/link/PRVV0P
2. Follow the prompts to create an investor hub account
3. Complete your profile

Ryan Mee, Chief Executive Officer, commented:
"As we continue to advance our portfolio of high-quality mineral projects and unlock value across the business, it is important that our shareholders are kept fully informed and engaged.

"The launch of our investor hub provides a central platform for investors to access updates, insight and key milestones, while also enabling more direct interaction with the Company. This reflects our ongoing commitment to clear communication, transparency and building long-term relationships with our shareholders."

Notes to Editors

About Fulcrum Metals PLC

Fulcrum Metals PLC (AIM: FMET) is an AIM listed technology led natural resources company focused on recovery of precious metals from mine tailings (previously milled and processed ore) in Canada using environmentally friendly leaching technology developed by Extrakt Process Solutions LLC and its associates (together "Extrakt"). The Company's current projects are the tailing sites of the former Teck-Hughes and Sylvanite gold mines, located in the Kirkland Lake region of Ontario. In addition, the Company has interests in a portfolio of highly prospective mineral exploration and development projects in both Ontario and Saskatchewan Canada.

Fulcrum has an agreement for exclusivity rights in respect of any licensed use of Extrakt's proven cyanide free technology on legacy gold mine waste sites over the mining districts of Timmins and Kirkland Lake. These are two of Canada's biggest gold camps with a historical production above 110Moz over the past 100 years, leaving more than 70 documented legacy mine waste sites.

Fulcrum is now focused on the development of its Teck-Hughes and Sylvanite projects towards production using Extrakt's technology and positioned to scale the concept across two of Canada's historically most productive gold regions. Fulcrum believes this represents a substantial, long-term opportunity to unlock significant and largely untapped value from legacy mine waste.
