Thalia Therapeutics plc

("Thalia" or the "Company")

New article: RNA medicine enters its second act

Thalia Therapeutics plc (AIM: THAT), a biotechnology company developing innovative RNA therapeutics, is pleased to share a new article, 'RNA medicine enters its second act', in European Biotechnology Magazine's RNA Therapeutics Special.

The RNA therapeutics market continues to gather momentum, presenting significant opportunities for innovation and value creation. Dr David Solomon, Chief Executive Officer of Thalia Therapeutics, discusses the Company's strategic focus on RNA therapeutics, the potential for new RNA modalities including microRNAs and the opportunity to address new therapeutic areas such as cardiovascular disease and oncology.

About Thalia Therapeutics plc

Thalia Therapeutics is a pre-clinical biotechnology company developing innovative RNA-based therapeutics and delivery technologies in oncology and cardiovascular disease. With a growing, differentiated pipeline, de-risked by validated therapeutic targets, we aim to treat diseases at the source by silencing or modifying the genes that cause or contribute to them.

Our preclinical bispecific siRNA is a potentially long-acting treatment for atherosclerotic cardiovascular disease, which addresses two independent drivers of cardiovascular risk. Our proprietary delivery technology, Nuvec®, offers the potential to overcome the fundamental challenges of RNA delivery, enabling targeted, scalable RNA therapeutics.
