

14 September 2026

Cobra Resources plc
("Cobra" or the "Company")

Invitation to Investor Presentation & Q&A with MD

Rupert Verco, Managing Director of [Cobra \(LSE: COBR\)](#), a South Australian mineral exploration and development company advancing the Wudinna Rare Earths Project and the Manna Hill Copper Project, invites investors for a presentation and Q&A with drinks in central London on Thursday, 17 September at 4 p.m. BST.

Cobra is advancing Australia's only rare earth project suitable for low-cost, low disturbance in situ recovery mining, as well as the Manna Hill Copper Project in the Nackara Arc which has the potential to deliver copper at scale.

This is an opportunity to gain an in-person update on how Cobra is advancing these projects towards significant value inflexions, including further drilling at Manna Hill, as well as a maiden Mineral Resource Estimate, Scoping Study and in-field production study at the Wudinna Rare Earths Project on the near horizon.

Attendance is strictly by RSVP. Please email cobra@vigoconsulting.com to register your attendance and to be provided with details of the location.

About Cobra

Cobra Resources is advancing two South Australian critical minerals opportunities: the Wudinna ionic rare earth project and the Manna Hill Copper Project.

Cobra is advancing a rare earth discovery amenable to low-cost, low-disturbance controlled-aquifer in situ recovery (ISR), with the potential to progress towards small-scale production and bottom-quartile recovery costs, becoming the Western World's first rare earths ISR operation.

Cobra is also advancing the Manna Hill Copper Project in the Nackara Arc, where multiple underexplored prospects offer potential for large-scale copper-gold discoveries, including shallow skarn mineralisation and deeper porphyry potential.

Cobra also holds a significant shareholding in Barton Gold (ASX: BDG), following the 2025 sale of its non-core gold assets for A\$15 million in cash and shares.
