Notice of Investor Webinar

Manna Hill copper exploration success and Wudinna maiden REE resource underpinning Scoping Study

Cobra (LSE: COBR), a South Australian mineral exploration and development company advancing the Wudinna Rare Earths Project and Manna Hill Copper Project, invites investors to join Managing Director Rupert Verco for a live webinar to discuss recent exploration successes and upcoming milestones across both projects.

The webinar will cover recent copper discoveries at Manna Hill that significantly enhance the area's copper and gold potential, alongside the maiden Mineral Resource Estimate at Wudinna, which has significant growth potential and underpins the Rare Earths Scoping Study.

Mr Verco will outline forward work programmes at both projects. At Manna Hill, ongoing drilling is targeting the scale required to support potential low-strip-ratio open-pit mining, while exploration continues towards identifying the source porphyry system. At Wudinna, upcoming field trials will test key operating assumptions, alongside progress towards customer engagement, strategic partnerships and permitting.

Rupert Verco, Managing Director, commented:

"We are in an exciting phase of activity across both our copper and rare earths projects, with recent successes providing a strong foundation for the next stages of exploration and development. I encourage investors to join the webinar where I will discuss our progress, upcoming milestones and the opportunities ahead at this important time in the Company's history."

Date: Thursday, 5 November 2026
Time: 10:00 a.m. GMT
Registration: https://investors.cobraplc.com/webinars/PBJolP-manna-hill-copper-exploration-success-and-wudinna-maiden-ree-resource-underpinning-scoping-study

Investors are encouraged to register and submit questions in advance by 17:30 GMT on 4 November 2026. Questions may also be submitted during the live presentation.

A recording of the webinar will be made available on Cobra's website after the event. No materially new or financial information will be disclosed.

About Cobra

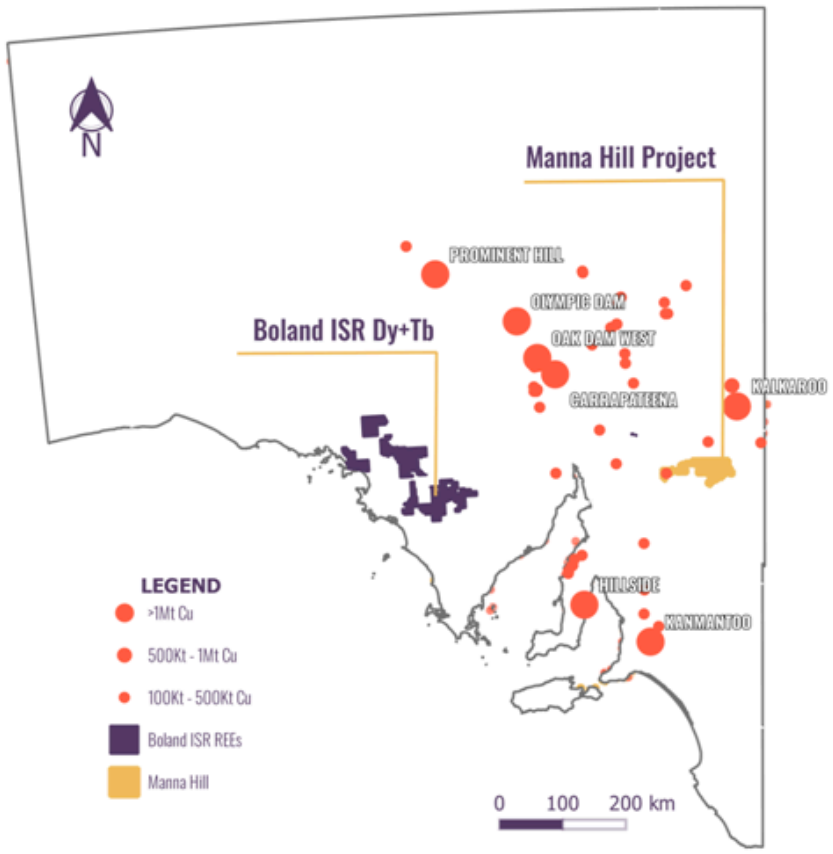

Cobra Resources is developing two South Australian critical minerals opportunities: the Wudinna ionic rare earth project and the Manna Hill copper project.

At Wudinna, Cobra has established a maiden JORC-compliant Mineral Resource Estimate of 150 Mt grading 470 ppm total rare earth oxides (TREO), with significant potential for further resource growth. The resource will underpin a Scoping Study as Cobra advances its staged development strategy incorporating low-disturbance controlled-aquifer in situ recovery (ISR), targeting bottom-quartile production costs and the potential to establish the Western World's first rare earths ISR operation.

Cobra is also advancing the Manna Hill copper project in the Nackara Arc, where drilling has confirmed copper-gold mineralisation across multiple prospects, including shallow skarn-hosted discoveries and encouraging indications of a potentially larger porphyry copper-gold system.

Cobra also holds a significant shareholding in Barton Gold (ASX: BDG), following the 2025 sale of its non-core gold assets for A$15 million in cash and shares.
